MARK LICENSE PLATES

Careless motoirsts would learn salutary lesson if a system of marking infractions of the law on their icense plates was introduced. A "novel" system prevails in Bel-grade, Yugoslavia, where the number plates have a large blank portion on which infractions are recorded with an "X." Pive "X's" on the plate cancels the driver's license automatic-

This would appear to apply the demerit dark system fund in certain industries to motoring with the added advantage of branding the guilty driver so that all who run might read and likewise avoid. The three or four "X" license plate on a car would be slightly less abnoxious than a case of smallpox and none would care to be found in the some pany of such a driver, and all would likewise give him a wide berth on the highway. Also such drivers would receive special attention from traffic policemen and their brother officers.
