# LEISHMAN CLOTHES

**LASTING DISTINCTION**

There is an air of distinction so perfectly tailored into Leishman clothes that even after long wear there is no mistaking them for cheaper grade clothes.

Quality and satisfaction long outlasts any temporary price advantage and in the end Quality has the cost advantage too.

Leishman clothes are made and sold upon this principle.

Russell were successful in passing their Primary Theory examinations. Helen Williams passed her Introductory Theory examination. Pupils of Miss Margaret Dickie, A.T.O.M.

### ACTON

Mrs. Wm. McPadden, Mrs. John Gibbons and Mrs. George Elliott attended the funeral of the late Philip Bovair, Braintree, on Monday.

Mr. and Mrs. George Wingo, of Georgetown, Mr. and Mrs. Bertrand Conover of Brantford, were the guests of Mrs. R. Bennett and Miss M. Z. Russell last evening.

Mr. and Mrs. Russell Salmon were called to Brantford on Saturday evening to attend the funeral of Mr. Salmon. Mr. Salmon returned home that afternoon.

An X-ray examination of the injury received by Joe Woods at the hockey rink Monday night revealed that there was a separation of the outer end of the collarbone. Joe will be out of the game for four weeks before he will be able to use the arm. But Joe says it's just one of the "breaks" of the game.

Among the elderly ladies who have assisted very materially in the work of the Acton Relief Committee is Mrs. Jas. Moore, Mill Street. Mrs. Moore has not been in the best of health but has kept over twenty packages of mittens for distribution by the Committee. She also placed a quilt for the same purpose. An example such as this is worthy the emulation of every folk who enjoy a better measure of health.—Free Press.

### BUSINESS SUMMARY

The following is a brief summary of information received by the Bank of Montreal from its branches throughout Canada and from offices abroad has been issued under date of Feb. 23rd.

The quiet state of trade is characteristic of a season between holiday buying, followed by bargain sales, and the opening of navigation with resumption of fishery operations. Despite prevalent dullness, however, there is growing anticipation of better business in the not distant future. The measure adopted by the United States Congress to liquidate frozen assets, release hoarded currency, create credit and enlarge note circulation are expected to stimulate trade in that country and have favourable reaction upon conditions in Canada. The adoption by the Parliament of Great Britain of a comprehensive tariff upon imports, with preference to products of British countries, can hardly fail to increase the commerce of Canada with the United Kingdom, and show all that is reposed in the Imperial Economic Conference meeting in Ottawa in July to evolve a plan of preference within the Empire that will accord to the advantage of all British countries in matters of trade.

Meagre commodity prices have in several instances fallen this month to the lowest point in many years. The price of wheat, for example, has fallen to a point lower than it has reached in any year since 1914. The price of flour, also, has fallen to a point lower than it has reached in any year since 1914. The price of other commodities, such as sugar, cotton, and wool, have also fallen to a point lower than they have reached in any year since 1914.

With alfalfa seed cheaper today than a long time ago, the price of alfalfa seed has fallen to a point lower than it has reached in any year since 1914. The price of alfalfa seed has fallen to a point lower than it has reached in any year since 1914.

### PERSONALS

matter that the Canadian people out of their savings have readily absorbed bonds issued by the Federal, Provincial and Governmental. Of a total issue of \$1,246,854,000 bonds of Canadian Governments and corporations in 1931, no less than nearly 90% were placed in this country.

Automobile exhibitions in several cities have been very successful and a fair amount of business is reported to have been written. The industry, however, cannot be called active and production is not running above a year ago. Iron and steel industries are quiet. Silk and rayon industries are working at a high rate; textile mills and boot and shoe factories are moderately well employed. Retailers as a rule carry small stocks. Over the whole, the mild open winter has not been helpful to business.

Although the value of external trade of Canada continued its downward course in January, an aggregate of \$294,000,000 for the ten months of the current fiscal year to date comparing with \$1,068,000,000 in the corresponding period last year, it is notable that the balance of trade is showing a tendency to have definitely turned in favour of Canada. Last month the excess of exports over imports amounted to \$4,222,000, compared with an excess of imports last year of \$5,000,000. The value of exports of the current fiscal year exports have exceeded imports by \$14,000,000 against an import excess of \$7,441,000 in the corresponding period last year. This has resulted in Ontario's production always being a most disturbing factor in the domestic export market.

A feature of the return for the year is the growth of trade with Great Britain, exports to Great Britain amounted to \$9,871,000, an increase of \$1,200,000 over the corresponding month last year, while in January exports of Canadian products to Great Britain were \$4,767,000 less than in 1931.

The Budget is the feature of the Parliamentary session in Canada. This year tariff changes are not expected to be numerous in view of the impending Economic Conference. The Budget is expected to be rather deep cut in being made into expenditure, and increased taxation is expected to be a feature of the Budget. An early Budget, however, is not expected to be desirable.

Car-loadings are still decreasing, a further loss has been reported for January proving transitory. Total loadings at February 28th were 2,641 cars, a decrease of 100 cars from the corresponding date last year. Coal and coke alone has an increase occurred.

Activity in mining is at a rather low ebb in the case of coal, copper, zinc and nickel, while production of gold is being vigorously prosecuted. In January the output of gold was \$3,827,706, was approximately \$400,000 more than in the corresponding month last year.

The average index of wholesale prices of building materials is now down to 82.8, comparing with 144.9 in 1920. The price of lumber is down to 82.8, comparing with 144.9 in 1920. Contracts let in January are estimated at \$12,728,000, an increase of 13% over December.

The return of the Canadian banks for December shows that deposits by the public were \$28,410,000, compared with \$28,410,000 in the corresponding month last year. In the case of public deposits, the return shows a decrease of \$1,112,000, compared with \$1,112,000 in the corresponding month last year. The return shows a decrease of \$1,112,000, compared with \$1,112,000 in the corresponding month last year.

### By Plumbing and Heating

**WHAT ABOUT THE HOUSEWIFE'S FATIGUE?**

IN the business world they made studies of operations so that workers will not become too tired and thus, toward the end of the day, begin to be less efficient. No one thought until recently, to make such studies in connection with the work of the Housewife. But manufacturers of modern PLUMBING FIXTURES, for example the KITCHEN SINK, have really taken great pains to make light, wide, working-space and so on, so that they will keep the Housewife from over-fatigue in her important kitchen duties.

You will enjoy our display of modern SINKS in white and color.
