News and Information

For the Busy Farmer

Current Crop Report

Pull wheat harvest of snow practically all winter, is reported to be in good condition in most counties, and alfalfa and clovers are also doing well, but sweet clover has been considerably injured in numerous districts. Lincoln County reports that fruit trees have wintered satisfactorily.

As a result of the campaign to grow alfalfa, inquiries are reported by Peel County from all sections of that Ontario, and it is stated that owing to the abundance and low prices of alfalfa seed this year the farmers are going to seed down more than the normal acreage of this legume. Perth County reports a number of farmers they are cleaning seed grain and predicting a good demand for seed of the 1932 crop which was of very good quality.

Ontario farmers annually lose hundreds of dollars from parasites in sheep and hogs. Dr. I. S. Stevenson has made a special study of this problem and has written several leaflets, copies of which can be obtained from your local Department of Agriculture.

How to Keep Milk. Four little ways to keep the whole story about milk in the home. These are "Clean, Cool, and Covered." This is one of the best ways to keep milk at home economical. For best results milk should be served at the end of the day and should be kept in a cool place. It is the ideal food for children of all ages because of its high quality and quantity of protein, its abundance of calcium, its readily assimilable phosphorus content, its iron and its easily digested fat and sugar.

Branded Rutabagas. A premium of over 50 per cent. on prevailing price, is being paid the Ontario farmer for branded rutabagas. A. C. Carr, Secretary, Ontario Marketing Board.

On being asked to explain this encouraging condition, he said: "In Ontario, rutabagas have been imported to the United States annually, as many as 4,000 carloads of rutabagas, either table turnips. Until recently, however, few of these growers and shippers, have given any thought to developing the rutabaga slowly. It is the ideal food for children of all ages because of its high quality and quantity of protein, its abundance of calcium, its readily assimilable phosphorus content, its iron and its easily digested fat and sugar."
