THE PRESER BRITISH EXPEDITION TO It may be sad, but still 'tis true,

There's one thing that And that is, blame the printer. He does his best, without our help,

Then cuss, and blame the printer We write our manuscript by pen. To read it is Beyond our ken, Yet we expect the printer . 1. To dope it out and get it right, We think not of his time or sight;

For all we do is stand and yelp,

We hold our stuff until the last, Then try to rush it through so fast The printer gets snowed under, But still we camp upon his trail. And prod him on with woeful tale,

II wrong-we blame the printer.

Or rant and roar like thunder. He shoots it through, the proof we Hell's bells! the job is not right ye We chop the proof to splinters. It takes two days before he knows Just' what each hieroglyphic shows-

The job's delivered. Some relief! To know we're through with rush We ought to thank the printer. But not the poor gink's out of luck-He overcharges us one whole buck,

A dumb lot are those printers.

Once more we damn the printer. SPRING FOR WAFFLES

By Betty Barclay when the men come in Iron that the last when the guests have finished the last celebrated with Canada in setting up celebrated with Canada in setting up a friendly evening alone corve waffles attaion at Fort Rac on the north arm of the Great Slave Lake but this arm of the Great Slave Lake but this When the men come in from fishing,

ter and real syrup, are fit for a king. 2 cups special cake flour, sifted 3 teaspoons baking powder teaspoon salt

3 egg yolks, well beaten

1 cup milk 4 teaspoons melted butter 3 egg whites, stiffly beaten Sift flour once, measure, add baking powder and salt, and sift again. Combine egg polics, milk and butter. Add to flour, beating until smooth. Fold in egg whites. Bake on hot, greased waffle iron, Serve hot with butter and syrup. Makes six 4-section waffles.

Proma Waffles

2% cups special cake flour, sifted

3 teaspoons baking powder

1 tablespoon salt 1 tablespoon sugar 114 cups milk 2 egg yolks, well besten
2 tablespoons melted butter
3 egg whites, stiffly besten

% cup pecan means, chopped
Sift flour once, measure, add baking powder, salt and sugar, and sift together twice, Combine milk, agg yolks, and butter; add to flour, Bold in egg whites. Just before baking, add pecans. Bake on hot, greased waffle iron. Serve hot with butter and syrup. Makes six 4-section wiffles.

HAM WITH ORANGE (Serves 6) 6 servings fried ham 2 tablespoons flour

2 cups orange juice 2 to 3 oranges for slices

Fry ham. For this number of newings a ham steak of about 1½ lbs. will
be required, add flour to 2 tablespoons
of fat from frying ham and cook until lightly browned. Add Grange Juice,
stirring well to evoid lumps. Cook 5
minutes or until sauce is thick. Pour sauce around ham on serving dish. Garnish with paraley and orange slices

French Fruit Breasing
(Makes about ½ cup)
3 tablespoons lemon juice
3 tablespoons orange juice
4 tablespoons oil
½ teaspoon salt

1 tablespoon sugar Mix all ingredients thoroughly.

Dinner Punch
(Serves 4-6)

1 cup orange juice
14 cup lemon juice
14 cup grapefruit juice
2 cups water

5 tablespoons sugar or honey Orange slices 7
Blend thoroughly. Chill if desired.
Variations: Add to the above mixture one cup of the juice of another fruit, such as grape juice, raspberry juice, loganherry juice, pineapple juice, cider or the juice from any canned fruit.

Or add one cup of a puree made-by forcing peaches, pears, apricots, ba-names or berries through a potate ricer

Maple-Nut Ice Cream 2 junket tablets 2 tablespoons cold water 1 quart milk

%pint heavy oneam I oup maple syrup % cup finely chopped nuts.
Dissolve junket tablets in cold water. Warm milk, cream and maple syrup o lukewarm NOT HOT. Remove from stove. Add dissolved tablets; stir to mix well, and pour into the freezer can. Let stand in a warm room until tirm; then cool. Add muts. Pack in 169 and salt and freeze, using about one part of salt to eight parts of ice. Re-

FOR LEAP YEAR WEDDINGS

cipe makes 10 to 12 servings.

The suggestion was made that in the newspaper accounts of weddings during Leap Year the attire of the groom and best man should be described instead of the gowns of the bride and brideemaid. That sounds reasonable enough. Another sugges-tion is that the groom be given the kisses that usually go to the bride.

If the custom should be adopted or giving the groom a square deal in the write-ups of Leap Year weddings, paragraphs as the following might beome common. "The groom, who was attired in the usual black, looked charming as he

"The groom's going-away suit was of navy blue, with black derby hat, and he wore the gift of the bride, a "The beautiful young groom was at

tired in the conventional black, with trimmings to match, and he carried a bouquet of roses. His dainty little nephew was graceful as a flower boy." "The bride's gift to the groom was an alarm clock and to the flower boy a boy's scout-knife." "The sweet young groom looked -J. Ollier in Shelburne Economist

Lest For Words It was the first time the shy young man had been to a big dance, and when his partner decided she did not want to dance the next he was at a loss for something to talk about. "Do you ever have indignation?" he saked in a desperate effort to make conversation.

The girl looked at him queerly "No," she replied shortly." "What a pity !" murmured the youth I know such an excellent remedy." Talk is cheep especially when your your neighbour's telephone.

Terrestrial Magnetism, Aurora and Atmospheric Electricity

NORTHWEST TERRITORIES

The British Polar Year Expedition which will spend from August 1st 1932 to August 31st, 1933, studying meteorological and geophysical - prob-lems of high latitudes, will establish its camp this year at Fort Rae, in the Great Slave Lake area of the Northwest Territories, and the members of the expedition have been book-ed for Canada by Canadian National Railways in conjunction with the Cunard Steamship Company. The leader of the expedition, J. M. Stage of the Meteorological Office of the Air Defence, will sail on May 14 for Montreal and the remaining members of the expedition will sail from Southampton on May 21. The scientific instruments and special foodstuffs required by the party of four members will weigh approximately nine tons. This expedition is one respect of an international scheme of general attack on the present day meteorological and geophysical problems of high latitudes. The scheme is of world-wide scope and will be perticipated in by all the larger countries which have the advancement of scientific knowledge at heart. From August 1, 1932 to August 31, 1933 each such country will maintain a temporary observatory at some selected site in high latitudes. This period of thirteen months terthe jubi-lee year of a similar successful pro-gramme and it has been strongly recommended that so far as possible each country which participated in 1882-83 should re-occupy the original site. During that first Polar Year Britain

o the 1812-83 site, The aim is to get a complete set of the following properties: West half data for each Polar Year station for lot 16, con. 7; East half lot 16, con. 6; thirteen continuous months in the East half lot 17, con. 9 in the Townfields of meteorology, terrestrial mag-netism, aurora and atmospheric electricity and then by correlating the corresponding data from all such stations to attain a synoptic view of these various fields throughout the period. In this way it is hoped to gain valuable insight not only into the phenomena as they occur in the high latitudes where they will be studied but into the general groblems which have presented themselves in the subjects mentioned at all latitudes. Britain's participation in this international scheme is being spongored by the Government through a grantin-aid and her main contribution—the expedition to Fort Ras—is being organized by a joint National committee.

No one could have had more experience of constipation than this man. His method of correcting the trouble would surely put right anybody who suffers in a similar way.

"I gas now approaching my 48th birthday and have used fermether Salts for many years. As a boy and youth I suffered at frequent times agoniss from constipation. This was, after a time, somewhat relieved by a special pill compounded to a prescription, but which, at times, had a weakening effect. On someone's recommendation I tried a bottle of Kruschen falts, and since then—a matter of at least 20 years ago—have used nothing cise. My daily doe I take in hot water at 7,65 a.m.,"—B. A. D.

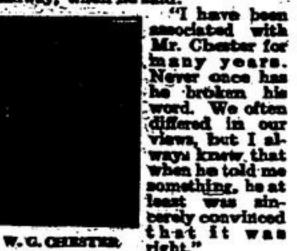

The six salts in Kruschen are Nature's own prescription for keeping the organs of elimination working properly—gently but surely expelling all pisonous waste matter every day.

Burt on "the little daily does " of Kruschen to-morrow and so take the first step along the foyal road to perfect health.

Combine to Honor Railroad Veteran

W. G. Chester Serves Order Railway Conductors for Quarter Century

When W. G. (Billy) Chaster, of Winnipeg, retired after twenty-five years service as general chairman of the Canadian Pacific section of the Order of Railway Conductors, something of the character that had won him the esteem of not only the men for whom he acted as chief spokesman, but of the company with which he negotiated was revealed by Grant Hall, semior vice-president of the Canadian Pacific Railway, when he said:

Speak to the conductors whom he represented so well for a quarter of a century and one learns that "Billy" Chester was "a square shooter," than which in the ranks of his kind there is no prouder title. Chester is sparing of words and always has been. Throughout his career as head of his order he has maintained the balance of a keen loyalty both to his men and to the Canadian Pacific Railway, with a resilisation that discipline was as important for the protection of the former as the latter. He knew how to be firm when what he thought were the rights of his men were at to be firm when what he thought were the rights of his men were at stake, without creating ill-feeling in the minds of company officials with whom he might be negotiating.

This is what Chester himself has to say of these relationships: "My relations with the members of the organization and with the general officers of the company have been most friendly and satisfactory and the boys on the road have always given me a fair break. I have had the same treatment from the comthe same treatment from the com-pany's officials. I have tried to

Mr. Chester began railroading away back in 1881, and had 25 years with the Company before entering the service of his Order. ALL INSIDE

"Better plead guilty," said Sam's hayer, "The Judge will give you only two years in jail at the outside."

"Year," replied the colored man, dubiously, "de trouble is dem two years at de outside will be on de inside."

Mommate: "Is it vold enough ordiside

GOODYEAR PRIZE CONTEST

ficre's a profitable way to spend half an hour . . . Glance at that prize list and you'll say "profitable is right."

Anyone except tire dealers, employees of tire companies and the families of both can, without a cent of expense, try for one of the prizes. All you have to do is to examine the six

tires of various sizes, types and plythicknesses on display here. Figure out how many cords you think would be in each; then add the six figures and divide by six to find the average. Use the section of tire cord fabric also on display to help you.

Submit your estimate on a standard entry blank. There is nothing to buy, no other special requirement, no cost to you.

Closing date: June 5th, 1932. Address; The Goodyear Supertwist Cord Contest," New Toronto, Toronto 14, Ontario,
