

# 3 BIG VALUES

## For Housewives Everywhere!

**RIGHT** "In tune with the times" are these three Coleman necessities... priced so reasonable that they quickly pay for themselves in the time and labor-saving service and satisfaction they give.

**THE INSTANT-GAS IRON** "Smooths the Way on Ironing Day". Saves time, work, and clothes. Lights instantly... no waiting. Has Roto-Type Generator with cleaning needle, which can be operated while iron is burning. Double-pointed... same perfect results on forward and backward strokes. Tapered ironing base makes it easy to iron under buttons. Use it anywhere... no cords or wires.

# Coleman

## INSTANT-GAS APPLIANCES

**THE SPORT-LITE LANTERN** - It's an instant lighting... single mantle type. Just the light for any camping trip or outdoor task. Small in size but big in brilliance. Weighs only 3 lbs., yet gives up to 150 candlepower of pure white light. Pyrex glass globe protects mantle. Has built-in pump and many features of larger lanterns. It's a Double-Duty lantern for use indoors or out.

# Coleman

## THE NO. 10 CAMP STOVE

Just the stove for camp cooking and general utility purposes. It's a miniature gas range... always ready to cook "good eats". Wind baffles protect cooking flame. Windproof, gray cast iron burner tips, won't burn out. Has blast producer quickly generates stove to full cooking heat. One quart fuel tank... two hours' supply for both burners... easily removed for filling. Everything packed inside for carrying. Hand-screwed finished in maroon-bronze baked-on enamel.

**Model No. 10**

THE COLEMAN LAMP AND STOVE COMPANY, Ltd.  
TORONTO, & ONTARIO

### CASEY AT THE RAT

Published by Request

It looked extremely rocky under the mud-ville mine that day. The score stood two to four, with but an inning left to play. So, when Cooney died at second, and Burrows did the same, A pallor wreathed the features of the patrons of the game.

A straggling few got up to go, leaving the rest of the crowd in a state of suspense. With that hope which springs eternal within the human breast, For they thought, "If only Casey could get a walk at that."

They'd put up even money now, with Casey at the bat.

But Flynn prodded Casey, and likewise so did Blake, And the former was a peevish, and the latter was a fake!

So that on the stricken multitude a deathlike silence sat, For there seemed but little chance of Casey's getting to the bat.

But Flynn let drive a "single" to the wonderment of all, And the much-depressed Blakey "tore the cover off the ball."

And when Casey had lifted, and they saw what had occurred, There was Blakey safe at second, and Flynn a-hugging third.

Then, from the gladdened multitude went up a joyous yell, At rumbled in the main-line-top, it rattled in the dell;

It struck upon the hillside and rebounded on the plain, For Casey, mighty Casey, was advancing to the bat.

There was ease in Casey's manner, as he stepped into his place; There was pride in Casey's bearing, and a smile on Casey's face; And when, responding to the cheers, he lightly doffed his hat, No stranger in the crowd could doubt 'twas Casey at the bat.

Ten thousand eyes were on him as he bobbed his hands with dirt, Five thousand tongues applauded when he wiped them on his shirt; Then while the New York pitcher ground the ball back into the deftance gleamed in Casey's eye, a smiler curled Casey's lip.

And now the leather-covered sphere came hurtling through the air, And Casey stood a-watching it in haughty grandeur there. Close by the sturdy batsman the ball unheeded sped— "That ain't my style," said Casey. "Strike one!" the umpire said.

From the benches, black with people, there rose a muffled roar, Like the beating of storm waves on a stern and distant shore. "Kill him! Kill the umpire!" shouted someone on the stand, And it's likely they'd have killed him had not Casey raised a hand.

With a smile of Christian charity great Casey's visage shone; He stilled the rising tumult; he bade the game go on; he signalled to Sir Timothy, he made more sure the spheroed ball; But Casey still ignored it, and the umpire said, "Strike two!"

"Fraid!" cried the maddened thousands, and an echo answered "Fraid!" But one scornful look from Casey and the audience was awed; They saw his face grow stern and cold, they saw his muscles strain, And they knew that Casey wouldn't let that ball go by again.

The sneer is gone from Casey's lip, his teeth are clenched in hate; He pounds with cruel violence his bat upon the plate.

And now the pitcher holds the ball, and now he lets it go, And now the air is shattered by the force of Casey's blow.

Oh, somewhere in this favored land the sun is shining bright; The band is playing somewhere, and somewhere hearts are light; And somewhere men are laughing, and somewhere children shout; But there is no joy in this stadium—mighty Casey has struck out.

—Arnett L. Thayer.

### News and Information

#### For the Busy Farmer

A new pamphlet on the feeding and management of turkeys has been prepared by the Poultry Department, O. and is available to farmers desiring information of this kind.

Norwich Woods

Mr. J. A. Carver, director of the Crops and Markets Branch, has compiled an interesting summary of proposals in the Wood Control Act, including a list of the weeds which are deemed noxious: Bladder Campion, Red-eye Daisy, Sow Thistle, White Cockle, Wild Oat, Canada Thistle, Blue Weed, Chicory, Docks, Ragweed, Ragwort, Stinkweed, Tumbling Mustard, Wild Carrot, Burdock, Wild Lettuce.

Treating Seed Potatoes

Naturally, the aim of the potato grower is to produce the biggest and best crop, at the lowest possible cost. This is especially true in the case of factors such as good soil, quality of seed, spraying and cultivation. While there are many methods of treating seed potatoes, the most common is the use of formalin treatment. A solution of one percent formalin in 40 gallons of water is made up and placed in a barrel. The seed potatoes, uncut, are placed in a sack and 400 lbs. of water is poured over them when the bag is pulled up and the solution allowed to drain back into the barrel. Then the seed may be cut and planted.

Soy Beans

An effort is being made to establish a mill at Chatham to handle soy beans and to market the products thereof. Interest has been shown by interested farmers of Kent and Essex in growing soy beans to supply this factory. It is well-known that the district is especially adapted to the growing of soy beans and a market for the products is established with a demand that at present exceeds the yearly importation of six million pounds of bean oil alone.

Sweet Clover as Manure

During recent years many farmers have been growing sweet clover in rotation with corn. A full crop of sweet clover plowed under may be considered worth as much as 25 to 30 tons of barnyard manure. When the crop is cut and plowed under it may not be desirable to grow sweet clover for the purpose of plowing it under, but it is profitable to follow the above plan of action. The most essential points to be made are that in growing sweet clover are to make sure that the soil is not acid, that it is well enough drained to prevent waterlogging and that the seed is inoculated.

A Problem With Chickens

One of the big problems in connection with raising chickens is cannibalism, when chicks pick at the feathers and flesh of their mates. Recent studies indicate that this is more likely to occur where the chicks in brooders are crowded together. Direct sunlight is exposed to direct sunlight. Direct sunlight should not be allowed to come into the room in which the chicks are carried in brooders. Artificial lighting is preferred to natural light and it should be so arranged as to cast no shadows. Ventilation is important, and provision should be made for cold air to come in at the top through an opening near the ceiling, but care must be taken to deflect this cold air so that it will be properly heated before coming in contact with the chicks.

Corn Hedges

Quality corn either for silage or for husking is the result of suitable soil and suitable preparation of the soil. Ontario growers of corn for husking purpose are warned that planting this crop later than the end of the first week in June may prevent its ripening. Tests have been conducted at the O.A.C. relative to different dates of planting coupled with fertilization with phosphorus and potash. Records obtained show that a week's delay in planting could be largely overcome by the use of suitable fertilizers. Fertilizers of an analysis of 3-12-6 or 3-10-6 used at the rate of 500 pounds per acre at the time of planting, have been found to hasten the ripening of the crop at least a week.

It is a well-known fact that corn well advanced toward ripening makes a richer quality of ensilage than does corn that is not so advanced. Corn grown at this time for silage purposes can increase the total weight per acre and also greatly improve the feeding quality of corn by proper regulation of manuring and fertilizing.

### TRANS-CANADA HIGHWAY

The Trans-Canada highway, a project that has been the subject of discussion for many years under various names, is now being actively constructed. Already considerable stretches of it are completed, and the total length of the highway in the more remote sections of Ontario, of the total length of the highway, which when completed will be 3,837 miles, over one third of it is in the province of Ontario.

In a statement to the Ontario Legislature recently the Minister of Lands and Forests stated that among the 40,000 men who had been working in the highway work one crime had been committed which was the result of the impatient respect for law and order among Canadians.

WHY?

The Canadian dollar is at a severe discount in the United States. Yet no Canadian city has failed to pay its debts promptly or has found itself unable to meet its pay rolls. Detroit owes a million dollars to its employees. Chicago is practically bankrupt. Of the total length of the highway, the banks turned down a loan to New York.

But in Canada, Toronto raises \$15,000,000 in two hours and a half. Montreal sold a \$11,000,000 loan without any trouble; Hamilton gets all the money it wants from the banks and so on. There is absolutely no question about Canadian credit. Our people have a habit of putting up deposits in the banks.

Yet with this clear record we allow the U.S. to say that the money is worth. —Orilla News-Letter

### END CERTAINLY EASIER

"Dad," said little Francis "teacher told us that the olive branch was an emblem of peace. What is the emblem of peace?"

"Orange blossoms," came the weary reply.

"No man ever bows to take as a matter of courtesy."

### COSTLY LUXURIES

A blind taphist who earns a good living taking letters from dictation, has a reputation for almost never making a mistake. She explains that it would not do for her to make mistakes because she would not be able to go back and correct them. Mistakes are the luxuries of people with normal vision, but they are not for her.

The reason the majority of us make so many mistakes is that we can. Unconsciously we take the attitude that if we make a mistake, we can correct it later. Carelessness, not ignorance, is the explanation of most mistakes, and even when the explanation is ignorance, it is seldom inevitable. You may misspell a word in your letter because you know no better, but you could have looked it up in the dictionary.

It is a pity that more young people do not feel as this blind girl does, that mistakes are too costly a luxury to be indulged in. For blundering and then correcting the blunder, is not as good a way as taking the task right in the first place.

### UNDERSTANDING OTHERS

How much happier we could be with people, how much more fond of them, if we understood them better. We could see from the viewpoint of others before we let our opposing emotions rise. If somebody says something to you of which you do not approve or if he says something that you do not like, what he thinks, you will see that there is some sense in it. There are always two sides to every question, and he is simply on the other side of the fence. A peep over to his standing ground will not only make you a broader person, but will usually enable you and him to come to some harmonious mutual understanding.

### PLUCK

We've jugged along in this world for years. We've had our joys, we've shed our tears. We've had our mixture of praise, jeers, and many's the time we've had our fears.

It's the man to-day with the steady grin. Who opens his soul, lets the sunshine in. It's not what he was, but what he might have been. That makes him buck up and work to win.

Life may be slow and dark and gray. To those who are down along life's way. To those who lack hope and are full of dismay. For them, to-morrow's just another day.

To one who has purpose and a goal ahead. Undaunted, clear and free from dread. He often works while the sluggard's in bed. To strike the iron while the iron is red.

There's many a man, you can see by his face; Won't make an attempt to take a man's place. He won't speed up to win, but is willing to chase; That's why he stands last at the end of the race.

With a purposeful will, where you know you are right, You can step out and conquer all that's in sight. Mountains dissolve, darkness breaks into light. And that's because you put up that fight.

—St. E. McMillen.

### JOHN W. HOBBS JOINS C. P. R. DIRECTORATE

Toronto Business Magnate Has Distinguished Career

John Wilberforce Hobbs, who has just been made a director of the Canadian Pacific Railway Company, is a typical Canadian and equally typical of business success. His now directorship being added to a series of executive connections with some of the most important business and financial concerns in the Dominion.

He was born in London, Ont., on December 2, 1875, son of William Richard Hobbs and Elizabeth Osborne, and graduated from the University of Toronto, with the degree of Bachelor of Arts, in 1898.
