

THE AUTUMN FIELDS

My heart is in the Autumn fields,
Away from grimy town,
Away from dusty, trodden streets
To fields of golden brown.
The wind-swept, smiling western
fields,
Close where the sun goes down.
The trees upon each little hill
Are clad in bright array
With dresses all of red and gold,
As for a holiday.
And in the morning sun they shine,
Bedecked with jewels gay.
Oh, haunting sweet is autumn-tide,
With evenings cool and still,
An amber haze upon the land,
The soft voice of the rill
Where all the wild things of the wood
Come down to drink their fill.
Oh, smiling, golden autumn fields,
By kindly sun caressed,
And by the silver harvest moon
In nightly splendor dressed;
I faint would dwell with you, and find
Within your stillness, rest. —J.R.G.B.

DOES THE WOMAN PAY?

We often hear girls complaining
That it is the boys who get all the advantages in life; they would have us believe that it is the women who always gets the worst of a marriage contract; they complain that boys can do as they please at home while the girls are bound by all sorts of restrictions; not one of them believe a man when he tells of the disadvantages of being a man. Read what a woman has to say about it. —Writing in The Saturday Evening Post.—
Marilyn Brown says: "I have never known a man who is not a better man than a woman. In the first place, man has no control over his wife's property, even what he's given her himself. When he dies, his property goes to her. Leave her."

one-third of his wealth, the half if there are no children. But what's her own, in life and death. If he owns real estate, he can't dispose of it without her consent; if he cuts off her income, he is incarcerated; if he divorces her, he has to pay alimony; if he refuses, he's jailed. If he dies from her, he is pursued by the police and triumphantly returned. There's no possible way he can escape supporting her and her offspring.
"And she has an equal authority in managing and disposing of the children—even more than he while they're infants. With rare exceptions, this is the law in the United States."
"And in return for all this, what does the law require her to do? Not a blooming thing! She can't be compelled to do the family washing, not even the family dishes. For all the law can do about, she can spend her entire life in the kitchen picture house. The Supreme Court itself can't force her to make a bed, nor even wipe the children's noses. She doesn't even have to have children if she doesn't want to."
"But supposing her husband decides to take matters into his own hands and insist on her providing the food and keeping the house clean? Supposing he attempts this?"
"What a weird do the law books say against a wife employing all the weapons in the feminine arsenal—tears, headaches, suggestions—but let her attempt to use his own weapon, the fist, and the police are right around his neck. There's plenty about the masculine fist in the statute book. There's only one thing she can't do, and that is to leave him."
"This world would be a pleasant place if there were not so many fools in it."
"Yes, but it would be more difficult to make a living."

News and Information For the Busy Farmer

Ontario Farmer Has Cleared the Weeds from Twenty-five Acres of Pasture by the Use of Common Salt.
The method is so simple that the farmer can fully work out at home. The Ontario Farmer was convinced of its efficiency. The weeds were cleared from twenty-five acres of pasture by the use of common salt. The method is so simple that the farmer can fully work out at home. Little Things to Fight
Dr. Lionel Stevenson, Provincial Zoologist for Ontario, in a recent review of work being done in connection with the control of internal parasites of animals states that the most important cause for concern in the livestock industry are comparatively few. Of these, the most important are the stomach worms of sheep, two in swine, two in cattle, three in horses, two in poultry, and five in man. In the case of most of these parasites it is possible to check their ravages by simple control measures.

Higher Price Indicated for Ontario Potatoes
"If market trends conform to those of the past few years," commented Charles E. Broughton, Ontario Department, "we can anticipate an increase in the price of potatoes."
The Ontario potato crop for 1931 amounted to 20,000,000 bushels, with a market value of \$4,738,770. In 1930, however, when the crop amounted to 18,770,000, or almost two million bushels less than the previous year, the market value was \$10,000,000. The 1929 crop was still less, amounting to 14,150,000 bushels or about 6,000,000 bushels less than the crop of 1931. At present prices the 1932 crop, estimated at 17,000,000 bushels, is worth only \$4,124,000, but past experience indicates that there is ample reason to believe that potato prices will increase.

Boys' Grain-Potato Clubs
Teams representing the Boys' Potato and Grain Clubs of the province held their provincial contest at Ottawa recently. The team from Renfrew County, composed of Stewart Sparling and John Chisholm, were the winners. The team from Ottawa, composed of Fletcher and Blaine Sharwin of Wentworth County were declared champions. The Boys' Potato Club team for 1932. These two teams will represent Ontario in the International contests in grain and potato at the Boys' World Fair this month. R. S. Duncan, director of agricultural extension, has been in charge of the competition, assisted by the Ontario Marketing Board. The boys' potato club has been interested among the juniors throughout Ontario. In all, 50 clubs with a total membership of 1,215, engaged in the above contests during the past year.

Flourishing Match a Success
The twelfth of the International Flowering Match at Ottawa took the form of a banquet at which interesting addresses were read. D. A. McIntyre of Ottawa, past president, made the presentation of silver platter to J. Lockie Wilson, managing director of the Ontario Flowermen's Ass'n. for the past twenty years, and reading factor in the success of the organization. The Association now has over 7,000 members over the whole province. "These members," said McIntyre, "are carrying back to their various communities the doctrine and practice of better planting, better cultivation of the soil, better seed and better live stock. I believe that to their addresses and example may be credited in large measure the comparatively secure position of the Ontario farmer at the present time."

RED CROSS OUTPOST HOSPITAL WORK IN ONTARIO

The Red Cross Outpost Hospitals are the backbone of the Red Cross work in Ontario. Some of these hospitals are in danger of being forced to close their doors unless the financial help is forthcoming. The need for their services is greater than ever before because of the hard times in towns and cities, conditions are harder by far in the isolated little communities where the isolated sick and feeble are in need of help. The Red Cross Outpost Hospitals are the backbone of the Red Cross work in Ontario.

THE LAUGH CORNER

Egbert—I can't believe that Phyllis is forty-two today. How did you find it out?
Algeron—Told her I wanted to get her a string of pearls—a pearl for each year.
He—What makes you think I was not behaving last night?
She—Your wife said you were trying to get the cuckoo clock and the canary to sing a duet.
The people who always want a back seat at church often pay extra money for a front seat at the show.
"Well," said a farmer to an Irishman who was employed on his farm. "I heard you had a little encounter with my bull yesterday. Who came off best?"
"Sure, you honor," said Patsy, scratching his head. "It was a tooth-up!"
An Irishman got a job at a railway station. When the first train came in, however, he forgot the name of the station; so he called out: "Here ye are for where ye are going. All in there for here, come out!"

Character
There is not a day in which, in one form or other, the spirit of fairness and justice is not tried and tested in the intercourse of our life. Sometimes it may be that you have to deal with those who are persistently unfair to you; sometimes it may be you are associated with those who impudently unworthy motives to you; sometimes you have to bear the intolerance, the impatience of the impatient, the meanness of the ungenerous. Depend upon it that these traits of the quality of your character will enable you, if you respond to them, to look upon the human life with large understanding, with a more generous sympathy with human infirmities, and with that spirit of mercy which is twice blessed, and which for all three shall make your life a better thing for yourself and a better thing for the world.

Little Things to Fight
Dr. Lionel Stevenson, Provincial Zoologist for Ontario, in a recent review of work being done in connection with the control of internal parasites of animals states that the most important cause for concern in the livestock industry are comparatively few. Of these, the most important are the stomach worms of sheep, two in swine, two in cattle, three in horses, two in poultry, and five in man. In the case of most of these parasites it is possible to check their ravages by simple control measures.

Higher Price Indicated for Ontario Potatoes
"If market trends conform to those of the past few years," commented Charles E. Broughton, Ontario Department, "we can anticipate an increase in the price of potatoes."
The Ontario potato crop for 1931 amounted to 20,000,000 bushels, with a market value of \$4,738,770. In 1930, however, when the crop amounted to 18,770,000, or almost two million bushels less than the previous year, the market value was \$10,000,000. The 1929 crop was still less, amounting to 14,150,000 bushels or about 6,000,000 bushels less than the crop of 1931. At present prices the 1932 crop, estimated at 17,000,000 bushels, is worth only \$4,124,000, but past experience indicates that there is ample reason to believe that potato prices will increase.

Boys' Grain-Potato Clubs
Teams representing the Boys' Potato and Grain Clubs of the province held their provincial contest at Ottawa recently. The team from Renfrew County, composed of Stewart Sparling and John Chisholm, were the winners. The team from Ottawa, composed of Fletcher and Blaine Sharwin of Wentworth County were declared champions. The Boys' Potato Club team for 1932. These two teams will represent Ontario in the International contests in grain and potato at the Boys' World Fair this month. R. S. Duncan, director of agricultural extension, has been in charge of the competition, assisted by the Ontario Marketing Board. The boys' potato club has been interested among the juniors throughout Ontario. In all, 50 clubs with a total membership of 1,215, engaged in the above contests during the past year.

Flourishing Match a Success
The twelfth of the International Flowering Match at Ottawa took the form of a banquet at which interesting addresses were read. D. A. McIntyre of Ottawa, past president, made the presentation of silver platter to J. Lockie Wilson, managing director of the Ontario Flowermen's Ass'n. for the past twenty years, and reading factor in the success of the organization. The Association now has over 7,000 members over the whole province. "These members," said McIntyre, "are carrying back to their various communities the doctrine and practice of better planting, better cultivation of the soil, better seed and better live stock. I believe that to their addresses and example may be credited in large measure the comparatively secure position of the Ontario farmer at the present time."

Let's Fire Some Customers

The Sales Manager jumped to his feet.

"Wait a minute, gentlemen. I have a better recommendation than that. Let's fire some customers. And let's tell our prospective customers that we don't want their business—"

"Do what?" interrupted the chairman. "Why what do you mean?"

"That's just what we are doing," was the answer, "when we decrease or cut our advertising. We fire our greatest asset: Our customers. When we quit telling them about the goods we have to sell, they will go elsewhere to buy products that they read about. Every year our business has grown, because our number of customers has increased.

"Instead of being in favor of fewer customers, I want to see more. I move the original full amount recommended by the advertising manager be approved."

Startled at the realization of what they might have done, the group, without further discussion, passed the motion.

Can any business grow and prosper without customers?

Without, in fact, a constant growing number of customers?

Obviously, no!

Certainly this is no time to discharge customers, to send them to buy goods in the city. Instead, isn't it a period when you must hold all your regular customers, and invite and attract new ones?
