Starting the New Year Right

HERE must be a point to that conviction we have come to that a good start is an excellent thing. Having started well, a man may make a fool and fizzle of things anywhere along the road thereafter, but that makes no convincing argument against starting well To turn aside from a very good beginning is at least a little more difficult than it is to keep on, having started badly. In a general way, good habits and right tendencies are quite as difficult to get tired of and to break away from as are bad habits and wrong tendencies, no matter what sarcastic pessimists may say. Starting right is that much anyway, and sometimes that much is a very great deal.

But what is it to start the New Year right and to make a really hopeful beginning on that first day of Ianuary? That isn't such an easy question to answer. Perhaps the easiest and surest way to get at it would be to think of some ways of beginning that would no be wise and right and good. For instance, it couldn't be a good beginning to start out in a mood of depression and filled with a multitude of fears and misgivings. No matter how easy it might seem to drop into such a mood, there isn't anything that could possibly meet us throughout the year that such a mood at its beginning could possibly help us to face. We could say, therefore, that to start out with a fine spirit of hopefulness and with the most invincible and strong-hearted courage that we can possibly rally ourselves to would be, so far at least, starting well. We can be rather sure that the year will be such as to make some real demands on that sort of mood, if we can begin with it and carry it with us more or less throughout its days and months.

But perhaps we think that there is not much to justify us in such a mood, and not much likelihood that we can hold to it for any great length of time or with any real certainty and assurance. Life looks so uncertain and gloomy ahead, both for ourselves, perhaps, and for the world in general, that it seems a poor time to be preaching optimism and courage. Well, all that can be said in answer to that is that it is a poorer time to be giving way to any other mood. Putting everything at its darkest, isn't it true that life nowhere or for any of us is so bad or hopeless that a fine courage and a spirit of real adventure cannot do something to make it better. We talk of the hoplessness of the situation, but as a matter of fact there has seldom been any one situation in the whole history of the world that has been anything like hopeless. The one great fact back of all our living is that fact of the remedial and recreative forces lying everywhere to hand with the Eternal God behind them working in His omnipotence to make all things better. Yes, it would be a very fine way to start the New Year-with a strong and cheerful faith in God for the realization of a new and better world which we would help Him to bring in.-
