

**YOURSELF**  
Just stand aside and watch yourself go by.  
Think of yourself as "he" instead of "I".  
Peek over, find fault, forget the man is you.  
And strive to make your estimate ring true.  
The faults of others then will dwarf and shrink.  
Love's ocean grow stronger by your mighty link.  
Where you "will be" as substitute  
have known since and watched your self go by.

**ALL THERE!**

Look not, O friend, with unavailing tears  
into the past—look to the brave young years!  
Look to the future; all be there, in time.  
All that you sought for by the broken gate—  
The faint and faltered and the hope that fell—  
The song that died into a lousy yell—  
It's all the love—the love that went with him—  
With his cry out that remained all day.  
The joys that were so needed by the soul—  
And all the tender dreams you may deplore—  
Nothing is lost forever that the soul can find; all is waiting at the goal.  
—Edwin Markham.

**WARNING FROM ENGLAND**

Canadian cattle raisers, at least such as might hope to export animals to the United Kingdom, have been told to wait before sending the shipment of stock with any mutilations in the ears. According to a decision of the committee which administers the Cattle Fund, no horned or bare cattle is to be shipped unless the ear is made no animal with a punch hole or a sharp shape in any position in the ear or half an inch or more from the top or bottom of the ear extending half an inch or more into the ear, will be eligible for the subsidy when sold for beef.

It has been officially nodded that horned cattle which have suffered from frost bite, which have suffered from frost bite as a result, it will be imprudent to prepare them for export to Old Country. They can be shipped, but would probably bring a much lower price because they would not qualify for the subsidy. This was the view taken through the office of the Canadian High Commissioner to Canada.

**The SNAPSHOT GUILD**  
MAKE A SILHOUETTE

Silhouettes make excellent greeting cards, book plates, and place cards.

With the arrival of cooler days and nights that do not allow much time for outdoor activities, there is a very undesirable interest by amateurs in making up the household hobby.

Once you start this fascinating hobby you will undoubtedly agree that it is a real pleasure and an ideal way to occupy your time profitably during the long evenings of fall and winter.

All of us are familiar with the ordinary type of snapshots but few have made silhouettes pictures. With this type of camera you are sure that with a judicious usage, it is important that the pictures tell a story—unless, of course, you are a profile head and shoulders study—for you have only outlines to work with, unsupported by perspective or detail.

The first essential of silhouettes pictures is a perfectly flat background, devoid of detail. And the easiest way to obtain such a background is to stretch a bed sheet across a broad doorway between two rooms. It is important that the sheet be tucked up so all creases and wrinkles are eliminated.

To light up this background, a strong light must be put back of it, about five feet away, either centered or placed directly back of the major feature of the picture. You have a wide choice of lamps for your lighting. You can use a couple of
