Ontario's New Traffic Control System Installed

Motorists who become annoyed at encountering a red light when there is no cross traffic in proximity will shortly have this source of time-wasting removed. A new device which has been adopted by the Department of Highways for Ontario whereby vehicles themselves initiate the signals automatically as they pass over the detector plates built into the highway. Estimated by traffic experts to be an important step in the Department's highway safety programme, it is the result of the work of the Ontario Electric Company at many Ontario points. ABCOR shows that traffic control at Niagara Falls, Ontario, where the first installation in the province has just been put into operation at an intersection believed to be one of the most dangerous in Canada in that it presents a network of railway and street car tracks over two intersecting highways that are thoroughfares for a heavy flow of motor traffic to and from Canada.

Are You in need OF PRINTING?

When you send out a Letter, Circular or anything that is Printed—does it Boost your business or Knock it?

Many business transactions are lost because of poorly printed Envelopes or Letterheads; or because the Circulars were dirty, the type out of proportion and cheap paper used.

THE PASSAGE
O soul on God's high seas! the way
is dark and long and lonely,
Yet bring your powers out and
upped your canvas strong;
For though to mortal eyes so small
a craft it seemeth,
The highest star in heaven doth
send you gilding gleam.

O soul on God's high seas! the way
is dark and long and lonely,
But morn when winds are kind and
skies are blue and fair,
Your heart must stay at touch of no
hand but thine own;
The sun that calls on God's high
seas must sail alone.

O soul on God's high seas! the way
is dark and long and lonely,
Unhomed by wind of pride, untouched
by seas of blame,
Beyond the lonely ways, beyond the
dark and long and lonely,
There stretches out the strand, and
golden harbor bar.

CROP REPORT

Below will be found a brief synopsis of meteorological reports received at the Head Office of the Bank of Montreal from its Branches. The weather throughout the country is now general in Manitoba, Saskatchewan and Southern and Central Alberta. Inspection returns confirm earlier indications that while the wheat crop will be a good one, the grain is of uneven distribution. The grain is of excellent quality. In some districts operations have been halted temporarily by rain. In Quebec have been harvested and crops are now measurable to harvesting. In Ontario recent rains have been held back by fall wheat, now showing good quality, and Spring grains were a light crop. In the Maritime Provinces moderate rainfall has been beneficial to growing crops, but vehicles have been damaged. In British Columbia a good grain crop has been harvested and in general other crops are satisfactory.

Quebec—The crops have been harvested and though backward have now greened. Sugar beets stand the drought well and are in satisfactory condition. Some new varieties are being developed. A small number of early carrots of late varieties of apples as indicated. Tomatoes are being delivered to Canaries and a fair quantity of onions to Scotland and Ireland. Potatoes about ten days late and the yield and quality are below average.

Sensitively and reflectively, that was Sue. But, while the residents of those dark, mostly run-down appreciated it in reverse, they hardly applied the notion as sentimental or aesthetic.

Sophomore Brady Isaacs, a gentleman of mixed parentage, found that out. Solly had, at one time, beat the hope of the ward with his broad street and school education topped by a not-uncommon correspondence course in law which enabled him to take by the bar examinations.

Brady's mother Solly inherited a few meagre funds while her son contributed a pound form and astute mind. By his own efforts he set up the combination behind a second-hand desk and goldleaf lettering, "Attorneys-at-Law" on the window.

It was a moment of pride to his father when he opened the office and his feelings were shared by the ward, up to his neck in their pauperage. But when he was surprised that he expected pay, did not pay him and after some months the landlord found it would be easier to carry out eviction proceedings for which case he did not hire Solly.

Solly evicted the ward in bitter anger and went through a four-year silence, during which he never paid a cent of rent. Then his educational background to include tailoring and coaching of witness, the lucrative profession of framing alibis and dispensing of "hot" bands; in short, the manipulation of justice—at a price.

He scraped and saved through these years, gathering a clientele, nursing a few cases, and finally getting a law office. There his educational background to include tailoring and coaching of witness, the lucrative profession of framing alibis and dispensing of "hot" bands; in short, the manipulation of justice—at a price.

He scraped and saved through these years, gathering a clientele, nursing a few cases, and finally getting a law office.

One day in June, when the maize, fruit-peels, push-carts, kids and clothes were most evident, Solly returned, preceded by a small van of new furniture which went into the whole second floor of the newly renovated Louventhal building.

He was still harbored in the same room, but with a smile on his face. There turned on the sallow youth, newly appointed guardian of the outer office.

"All cases from the Nith ward paid advance and double rate," the little lawyer instructed savagely. "I'll show you. And every afternoon you go out, what you owe money to which. Get O'Connor to see Mr. Kean and Narvaez every, collect from everyone who owes him money. Make Silversides stop giving credit at the warehouse. Scare 'em!"

His eyes blazed viciously.

For six months an insidious influence grew within the ward. It was carefully hidden and concealed by the red-headed man behind the sunblinds in the Louventhal building.

"I hear Mr. Glashburg is having a hard time. He's had a thing when a family was going crazy."

"Who said that?"

"The boy who works for Sally bears. He let it slip. I know he didn't mean to hit his lip like that."

Bad days, very bad days for the ward with friend against friend, and even old men and women suspected of handling worthless.

In the midst of it the little lawyer watched the growing havoc and expanded his business of siding criminals through loopholes of law.

His neighbors, unsuspecting victims of his malignant hate, were proud of his comeback. They watched his meek, mild, quiet, weaker, without too much effort, but still there.

The people on Grimsby Street knew the back of the Louventhal building and could see certain skulking figures go to the alley. But why didn't they go to the front way?

As thoughts will rise to mourn and mourn, rise to official care, there came the time when the declining to the External Building Building, and workers must meet through Sally's private office, much to his irritation, severely leaving little hidden transmutes.

Detectives, hideously free another of his malignant hate, were proud of his comeback, and again were the instant cause of Mr. Glashburg shaking his head solemnly before Mrs. Headon house four months later.

"I hear Sally bears to on bookkeeping at the prison," he said. "You remember, Sally? Of course. Funny about him; a quiet, harmless, nice young fellow, but he had only young, which have been."

"You never tell me, Mr. Glashburg. Would you tell me about charging that?"

"Glad to, Mrs. Headon."

"And I'll be in about the old account Wednesday."

Mr. Glashburg snuffed, bowed and did not speak. What?

The ward watched his meek, mild, and clothes. Nothing had changed except that Sally Isaac was "on her keeping" at the prison.

Mr. Glashburg dismissed his meek, mild and clothes.

The ward watched his meek, mild,

BE DARE NOT MOVE IN BED

Nights were Torture through Lumbago

Only those who have suffered from lumbago know how excruciating the disease is. Few indeed are the times when a remedy for this complaint, they are anxious to pass on the good news to other sufferers. Let this man tell you, Miss Kruechen brought him relief—

"I had a bad attack of lumbago. When I got into bed I had to stay there all night. I could not move for pain. I didn't know what to do, what to do. I was advised to try Kruechen Salts and I am very grateful to them. After taking the salts, I fell asleep. After taking the large bottle I am glad to say that my lumbago had entirely gone, and I have not had the slightest trace of it ever since."

Kruechen is a combination of numerous mineral salts which assist in stimulating your liver and kidneys to healthy, regular function. They ensure a better complexion and help to keep the blood-vessel pure.

THRESHING FIRES IN ONTARIO

On agricultural areas in both Canada and the United States, Ontario almost alone, has suffered to any extent from fires resulting from threshing operations. P. J. Hardwick, Inspector of the Ontario Fire Marshal's department, said in addressing the convention of Brothman of Threshing, at London recently.

Approximately 100 per cent of all fires which result from threshing machines are caused by matches thrown through carelessness by the help. Mr. Hardwick said. However, he believed that the threshing machine had been blamed for many fires for which it was not responsible. Last May, Mr. Hardwick investigated 62 barn and threshing fires, and found an increase of 30 compared with last year.

The municipality of St. Catharines, Ontario, has 30 hotels and issued 350 for license to operate. The townships, the larger of which is the town of the year, was \$150,000. The average cost of maintenance of each hotel was \$2,100 and the daily per capita income cost 12.42, which seems to bear out the fact that a proprietor does not receive expensive expenses. The average cost per day for fuel, food and cleaning was \$1.40, a trifling over 40¢. The Halton county cost in 1935 and other figures seem to be on the average with those in similar centres.—Champion.

CALDON BURIED INDIGENTS FOR 33 SIXTY YEARS AGO

Relief was a headache to municipalities 60 years ago according to a minute book discovered during the construction of the township of Caldon hall. The resolution instructed the clerk to find each indigent to be more reasonable and to inform the town that many indigents were extravagant.

In no case was more than five dollars to be paid for the burial of a dead person. Many relief items are included in the list of expenditures, including one of 90 cents for a bottle of brandy. Funeral costs ran from \$1 to \$14.22. A year's pension was \$100.

The municipality had 30 hotels and issued 350 for license to operate. The total cost per year was three miles, the larger mile to pay half a mile and the half mile were raised to pay a bonus of the Toronto Greyhound Club.

The town of the municipality paid \$200, the deputy reeve \$220, the councillors varying in amount. The clerk was paid \$300 per annum, supervisor \$75, and the tax collector \$175. The municipal election of 1935 cost \$40,000. Toronto Greyhound Club.
