THE MAN WHO WINS

ANOTHER REDUCTION IN LONG DISTANCE RATES

On calls to points over 130 miles

Once again we have cut the cost of Long Distance. On September lat a new schedule of rates became effective on calls (both person-to-person and stationto-station) to points over 130 miles distant. This reduction will mean an annual saving of over \$200,000 to telephone users in Ontario and Quebec alone.

This is the second time this year that Long Distance costs have been reduced. In the past seven years, we have made six substantial rate revisions. At the same time we have constantly improved service, as evidenced by the fact that, while in 1929 it took an average of 3.4 minutes to complete a Long Distance call, today the average is only 78 seconds.

Today, your telephone is within easy reach of any one of 33,000,000 tele-phones scattered throughout the world." Low night rates from 7 every evening and all day Sunday!
