According to the report of the scattered over the county, public sentiment is generally favorable to the campaign to eliminate warbles. In this connection Ross Stewart states that there were two years ago before the programme started. A number of other keymen spoke along the year lines. Record Service Given Ontario's Children By Hospital For Sick Children

Generosity of Public Permits Care For All Regardless of Race, Creed or Circumstance

The Hospital for Sick Children in Toronto is surely an institution in which every citizen of Ontario will take real pride. Operated as practically one big Public Ward, it makes possible medical treatment and hospital care for needy children from every corner of Ontario.

During the twelve months just ended, 2,245 out-patients were served for a total of 130,747 patient days. Over 2,000 operations were performed. Over 60,000 meals were served.

Every day dozens of doctors come to the Hospital to donate their time and talent in the operating room, the out-patient clinic and in hospital service.

It is a notable fact that the Hospital for Sick Children has one of the largest staffs of volunteer doctors in North America, despite the fact that the care of children involves so much extra service including, in many cases, pre-school training. And despite the fact that the many, many children cases directed to this institution create extra costs over and above ordinary hospital requirements.

Over 600 of the 420 beds in the Hospital are for those in very movable circumstances or those who are receiving municipal relief.

The rate per day, chargeable to the patient's parents (if able to pay) or to their municipality, is fixed at \$1.75. There are no extra charges. The use of serum, modern health appliances and many other costly but vitally necessary items, cannot be provided for out of the fixed allowances for needy patients. Nor do they provide for the medicines, orthopaedic appliances, etc., supplied in thousands of cases.

Despite the fact that kiddies require especially expensive hospital care, the government allowances are the same as for those children who are able to pay for their care.

The cost of serving patients is therefore \$1.00 per day more than the combined income from parents for municipality plus the government grant in spite of the low expense ratio and the free service of the doctors.

So, each year, the Hospital for Sick Children appeals to you for a donation to help meet the deficit resulting from the service to the needy. This deficit cannot be eliminated; in fact, it must increase if the demand for service to more and more children is to be met.

Everyone who understands the fact that this great work continues despite the fact that the more patients who are treated the greater the annual deficit becomes. Remember, the Hospital receives no support from the Toronto Federation for Community Service. Cause patients are accepted from all parts of the province. Nevertheless, no Ontario child should be denied health if every money makes the difference.

Mail a donation today to the Appeal Secretary, The Hospital for Sick Children, 67-College Street, Toronto.

The thanks of 67,000 children will be your reward.
