

MINING AND METALLURGY

Mining in Canada, now second largest of the country's industrial gross employment to 10,000 workmen and has a production valued over \$300,000,000 per annum.

As an accompaniment of this great and growing mining industry, Canada is building up a smelting and refining industry of world importance. There are now huge plants in Ontario, Quebec, Nova Scotia, British Columbia and Manitoba. These plant products:

Copper • Nickel • Zinc • Lead • Cobalt • Iron
Pewter • Gold • Silver • Brass • Tin
Cadmium • Selenium • Alumina • Tungsten • Uranium

The plants give direct employment to 10,000 workers, and indirect employment to many thousands more; have a production value of \$200,000,000 per annum; purchase coal and electricity to the value of \$12,000,000, pay for

equipment, supplies, freight, etc., some \$10,000,000 per annum; and add some \$100,000,000 to the export value of Canada's mineral products, without counting the value of the gold recovered from base metal dues.

Prominently identified with the upbuilding of the smelting and refining industry of Canada from its inception, the Bank of Montreal gives that industry financial service through every stage. Thousands of workers are dependent, sharing in the safety and facilities of the bank with their employing companies.

The Bank's services include: Commercial accounts; foreign currency accounts; financing of shipments, loans and discounts; collections; trade and credit information; safe-keeping of securities; savings accounts; money orders; travellers cheques; banking by mail; personal loans.

MANY AGAINST ACT

That the country is being aroused against the Farmer's Creditors' Arrangement Act, was proven very conclusively by the number of county councils in Ontario and the number of town councils that have voted to support the bill.

That the Act is inflicting all kinds of hardships upon men and women who live and toil in the farms of their home, is apparent from the facts which they later told, only to find they cannot enforce payment from men who had undertaken to buy them because they preface charity to work.

CORNS REMOVED WITH CASTOR OIL

Day follows day to misery and sick hours. A new liquid called KORNKLEEN has been developed and failed to dampen the enthusiasm of the crowd. W. N. Robinson, of Oakville, called upon Thomas Blake, M.P.P., who introduced Mr. McQuesten's bill.

"It gives me great pleasure to be here on this occasion," said Mr. McQuesten, "marking as it does the completion of one of the largest

Oakville's new high-level bridge over the Oakville Creek at the spot during the hundred years preceding the building of the new structure, and predicted that the boys and girls of the gathering would be the last to recall the occasion.

He also predicted that the opening of a gathering of about 300 people, which included Halton's representatives in the Dominion parliament and provincial legislature, the members of the county council, the mayor of Oakville, township and town officials, local business leaders, prominent Halton officials, engineers and workers of the Vernon Construction Co. Limited, who built the bridge, and a number of visitors.

Rain fell in torrents a short time previous to the ceremony, but stopped just before the opening, and failed to dampen the enthusiasm of the crowd. W. N. Robinson, of Oakville, called upon Thomas Blake, M.P.P., who introduced Mr. McQuesten's bill.

"It gives me great pleasure to be here on this occasion," said Mr. McQuesten, "marking as it does the completion of one of the largest

Oakville's new high-level bridge over the Oakville Creek at the spot during the hundred years preceding the building of the new structure, and predicted that the boys and girls of the gathering would be the last to recall the occasion.
