Syrup Symphonies C.P.R.B. 8 p.m. every Monday.
Harry "Red" Porter, Crown Brand Sports Club, CRCT 7.15 p.m. Tuesdays and Fridays.

CANADIANS AND THEIR INDUSTRIES...AND THEIR BANK

THE FOREST INDUSTRIES

The forest area of Canada on which there is timber of merchantable size is larger than the total area of France and Germany combined, the standing timber on this is estimated at 274 billion cubic feet. An area of even greater extent is covered with young growth.

This vast reservoir of wood is the source from which Canada drew wealth in excess of \$110,000,000 in 1934 (the latest figures available) in the form of primary products such as

- raw material for saw-mills, pulp mills, wood distillation, charcoal plants;
- logs, pulpwood, bolts, etc., for export;
- firewood, railroad ties, posts, poles, fence rails, mining timbers;
- maple sugar, balsam gum, resin, casare, tanbark, moss, etc.

The total value of manufactured products made principally from raw materials of forest origin was \$404,455,948. Forest products in 1936 afforded an excess of exports over imports—\$158,360,000—very important to Canada's international trade.

The Bank of Montreal has co-operated with every activity of the forest industries—assisting in every phase of production and marketing. The Bank has had the privilege of financing a large share of the export business of these industries. Thousands of workers are dependent, sharing in the safety and facilities of the Bank with their employing companies.

Some of the Bank's services most frequently used by employers and employees in the forest trades: Commercial accounts, foreign currency accounts, financing of shipments; commercial loans and discounts, collections, trade and credit information, safeguarding of securities, savings accounts, postal loans, money orders, traveller cheques, banking by mail.

BANK OF MONTREAL

"A Bank Where Small Accounts Are Welcome"

Georgetown Branch: J. R. SMITH, Manager

MODERN, EXPERIENCED BANKING SERVICE THE OUTCOME OF 119 YEARS' SUCCESSFUL OPERATION

Railroader-Actor

Roy Emerson (above), English actor who played Moody, the railway contractor, in the Gaumont British epic of Canadian Pacific Railway construction through the Rockies, "Silent Barriers", found himself right at home in the part when he went to the C. P. R. mountain division on location. The division was by no means new to Emerson who with his brother Percy served the railway there in 1912. Roy, the actor, as a fireman on "pusher" engines, and Percy as a round-house huffer at Revelstoke where much of the film's local color was filmed. Roy Emerson was a popular figure during the filming of the Canadian railway epic among the railroaders, many of them former associates.

Wood for Sale

Choice Birch and Maple at \$30.00 single cord; Mixed Hails \$25.00 per cord; Mixed Wood \$25.00 per cord.

A Sensational Discovery

Two eminent scientists, Doctors LEIST and Kochergin of Gorkin, Russia, discovered a formula, whereas Vitamin contained in Cod Liver Oil, which is so beneficial when taken internally, as also as effective, when applied externally, as in their formula, to all kinds of wounds, and skin diseases, and more particularly in cases of "ECZEMA". It helps to rebuild the tissues, by feeding them. VITAGAN is prepared according to that formula, and contains surtamin-methyl Cod Liver Oil, and is concentrated solution of the Vitamin "A" and "D". It is agreeably scented, and for VITAGAN, sold and recommended by MacCarusack's Drug Store, Phone 327, Georgetown.

HE DARE NOT MOVE IN BED

Nights were Torture through Lumbago

Only those who have suffered from lumbago know how exceedingly painful it can be. Add when they discover, if remedy for this complaint, they are anxious to pass on the good news to other sufferers. Let this man tell you how Kruschen brought him relief—

"I had a bad attack of lumbago. When I got into bed I had to stay in that position—I could not move, for pain. I didn't know what to do. About a month ago, I was advised to try Kruschen Salt, and I am very grateful I did so. After taking a few doses, I felt relief, and after taking one large bottle, I am glad to say that my lumbago had entirely gone, and that my back has returned to its normal state."—G.A.V.

Kruschen is a combination of mineral salts which has the effect of stimulating your liver and kidneys, to excrete regular activity. They cause further elimination, and so help to keep the bloodstream pure.

PRAYERS

To say my prayers, to be happy unless I mean the words I say. Unless I think to whom I speak, And with my heart—God's blessing let me, when I time to pray. Not only heed the words I say, But let me know the earnest way, To have my deeds go with my prayer.

NO BANK CASUALTIES

In a recent issue of the Canadian Chartered Accountant, P. C. Beggar, secretary of the Bank of Commerce, contrasts Canada's record with numerous bank failures in the United States. He points out that during the period from 1929 to 1935, the end of 1934 more than 13,500 banks in the United States, or over 45 per cent of the 1929 total, suspended payments. These banks carried \$7,800,000,000 in deposits and every one of their depositors was deprived of the use of this money for a longer or shorter period. A few got their money back in full; a great many of them lost from 25 to 50 per cent of their savings, and a number recovered nothing.

Canadians can well be proud of the fact that the banks in this country were a veritable rock of Gibraltar all through the depression, and while the banks have been criticized for exacting the last pound of flesh in some cases for placing too rigid requirements on loans, it must be remembered that their requirements were necessary to protect the millions of depositors. The fact that Canadian financial institutions were able to weather the depression without a single casualty is actually a great credit to them.

These banks have followed in the wake of even one bank failure.

AUCTION SALE!

—OF—
IMPLEMENTS, FURNITURE, ETC.
The undersigned will sell by public auction at Georgetown

WEDNESDAY, APRIL 3rd, 1937, at 1 p.m., the following:

HORSES—Brown mare, good worker; grey horse, good worker; grey horse, good worker, 1600 lbs.

CATTLE—Holstein cow, 5 years, bred January 12th.

PIGS—12 Pigs, 3 months old.

Furniture sale at building formerly occupied by Fred Sinclair. Implements sale at Alex. MacCarusack's. All articles to be settled for with clerk on day of sale.

TERMS—Cash.
FRANK PETCH, Auctioneer.

GOD THE CREATOR

International Uniform Sunday School Lesson, April 4, 1937.

GOLDEN TEXT: "In the beginning God created the heaven and the earth." Genesis 1: 1.

LESSON PARAGRAPH: Genesis 1: 1 - 5: 26 - 31.

O Master of the beautiful Creation, from hour to hour, Give me this vision to the full To see in lightest things Thy power.

This vision give, no power afar, No throne, and yet, I will adore, Granting benefits and rest a star, Thy word in every wandering voice.

The Creator, I may see the Creator at work, By the stars on the rocks, the shells in the earth, and the partial deposits, now and then, how our earth has been and is being built up. Astronomers, with their telescopes, their records of eclipses, comets and meteors, their theories of gravitation, let us have an insight into the Creator and wonderer of our universe. Creation, also, giving examples of emergent evolution in the plants, the animals, and the man, the Creator, if a great chemist, The physicist, telling of the laws and properties of matter, the mathematician, Attuned by the intelligence, beauty and purpose of nature, we can understand a little of what God meant when he said that God is a Spirit. The more we know, the greater the mystery becomes. How did the universe get its start? Is there a power apart from things? Was there something before the world, at some very remote period of time? When thought has done its utmost, we gain a little more than the first verse of Genesis "In the beginning, God." Our mood turns from analysis to wonder and worship.

Light, 2 - 3

Man has had a very fractional part in creation. The Book of Genesis is right in ascribing all power to God, it is the Lord's doing and it is marvelous in our eyes. Humanism gives a high place to man, but in the days of Job, if we wander out beneath the aspens, we know that man has had no part in the creation of sun, moon and stars. The alteration of day and night, summer and winter has gone on so long that it has become commonplace, but upon reflection the sheer miracle of it almost appals. We know something of the rate at which light travels, the distance of the earth from the sun, the daily turning of the earth on its axis and its annual revolution around the sun, yet dawn and sunset give us humble ourselves before the God of Light. Is it any marvel that primitive people worshipped the sun, moon and stars? The ever present electric switch has freed us from the fear of darkness; we can have radiant light twenty-four hours a day, twelve months in the year, yet though we do not feel, as our ancestors did, the contrast between night and day, the glow of light reveals to us the resurrection of God.

Man, 26 - 28

In thinking of God's creation of man we alternate between humiliation and glory. A painter has pictured God as repentant for having created man—man has been such a disappointment to God. At the same time a great Puritan preacher has a sermon showing that man is glorious even in moral ruin and decay. Human physiology, the coordination of bones, muscles, nerves, and brain cells makes us walking marvels even to ourselves. Who could endow man with mind, with his capacity for reason, memory, imagination, emotion and will, who but an infinite Mind? And man, the creature, may enter into a sense of unity and rapport with God, the Creator, while some only fertile human action are in men, women and children! How can evolution account for one such character as Jesus Christ? With all our limitations and sins, we creatures of a passing day may still be temples in which the spirit of God may dwell. Because God's spirit is in man, man is the crowning glory of creation. The spirit of man is the crown of the Lord. Small wonder that Joseph Addison felt that eternity would be too short for man to praise God.

Psalm, 23, 39

Leaving for the moment the subtleties of nature and man, let us face the fact that nearly two billion people upon this planet require their daily bread. Primitive man suffered from hunger and fear of want. His desire for plentiful food for variation in food has helped to develop agriculture and transportation. At the morning breakfast table we partake of North American cereals, South American fruits, Asiatic condiments and beverages, served on dishes manufactured in Europe. Two facts stand out. Potentially there is sufficient food for all and to spare. The earth is naturally so fertile and scientific agriculture can increase the natural productivity many times over. The privations suffered by millions in the last seven years have not been due to lack in God's provision but to man's failure in distribution. Another fact worth meditating is that we take great pleasure in eating our food. God's purpose is evidently not nourishment alone, but daily delight through the pleasures of taste. An octogenarian in a burst of candor stated that he had enjoyed more in his long life had been his meals.

Very Good, 31

It was said of Emerson that he took a rose-colored view of everything. He was a chronic optimist. Once Carlyle took Emerson for a walk through London slums at midnight, asking him with grim humor every few steps, "Do you believe in the devil now?" Emerson replied with praise of English people. Carlyle, on the contrary, saw universal murk. For him no easy optimism was possible. He believed in the good and fought for it, but "he was sorely wounded." Browning had a higher point of view. "In opposition to the pessimism of Carlyle on the one hand, and the 'rose-colored' optimism of Emerson on the other, Browning—seeing the worst, Carlyle saw it and seeing also the best beyond, as Emerson saw it—reveals a true, un-falling, and glorious optimism, which grounds itself upon the only sure, unmovable basis, a conviction resulting from the vision of the loving, powerful, regnant God. Evil may exist, goes, exist—point it, if you will in its blackest colors; but good exists, and good will triumph at last, because God and good are one." In our darkest mood "There's cheerfulness day outside."

BABY CHICKS

Barred Rocks, New Hampshire Reds, B. C. White Leghorns from stock bred for high production and conformity to standard. All eggs set from 24 to 30 ounces per dozen. Chicks March 20th and 27th. \$2.00 each by thought range.

Farmers Benefit Most from Telephone Rate Reductions

Farmers will benefit by over \$100,000 yearly through reductions in rural telephone rates, effective April 1st.

In this district rural telephone rates are reduced 25 cents per month—\$3.00 yearly.

Other reductions are—

Hand (cradle) telephones—reduced from 30 cents to 15 cents per month over Desk type (effective with May bill).

Installation charge—Business telephones reduced from \$2.25 to \$2.00.

Service connection—(where instrument is in place) on Business telephones, reduced from \$1.15 to \$1.00; inside move charges reduced from \$2.00 to \$1.00 (effective April 1st).

Short haul Long Distance Calls—20-cent person-to-person calls reduced to 15 cents. The extra cost for reversing charges on calls to nearby places is cancelled (effective April 1st).

Deaf Sets—The special type of equipment available for the hard-of-hearing is reduced from \$2.50 to \$1.50 per month.

These reductions, especially those affecting farmers' telephones, will tend to increase the general use of telephone service, making it of greater value to every user.

UNUSUAL OPPORTUNITY

Bargains in Cockerel Chicks

THE demand for sexed day-old pullets, for early April delivery, is leaving us with a temporary surplus of cockerel chicks. We are putting them for quick sale. This is your opportunity to get a flock of extra cockerels at dirt-cheap prices. Look at the list below:

DAY-OLD COCKERELS — 1c TO 2c EACH

Bray Standard grade Leghorns	\$1.00 per 100
Bray Xtra-Proof Leghorns	2.00 per 100
Bray Standard grade New Hampshires	3.00 per 100
Bray Xtra-Proof New Hampshires	4.00 per 100
Bray Standard grade Barred Rocks	4.50 per 100
Bray Xtra-Proof Barred Rocks	5.00 per 100
Other Heavy Breed cockerels	5.00 per 100

BARGAINS IN STARTED COCKERELS

We have a limited quantity of started cockerels of the heavy breeds. While they last, you can have them at the following bargain prices:

2-week-old heavy breed cockerels	\$10.00 per 100
4-week-old heavy breed cockerels	\$15.00 per 100

Also a limited number of started pullets, various breeds, for prompt shipment. Most of them 3 to 4 weeks old. Write for pullet prices.

PROFIT IN EXTRA COCKERELS

The outlook for poultry meat prices is improving week by week. From January 1st to March 30th, Canada exported 488,976 dressed chickens to the British market—almost HALF A MILLION. That's 2 1/2 TIMES as many as we exported in the same period a year ago. By the time the Coronation ceremonies have come and gone, I don't think we're going to have much dressed poultry left in cold storage in this country. Our Summer and Fall prices for dressed chickens should be good.

ORDER DIRECT FROM THIS ADVERTISEMENT

At the above prices, these chicks are moving fast. So don't delay if you want to get in on this unusual opportunity. Order direct from this advertisement.

Send us a deposit of \$1.00 on small orders, and pay the balance on the last of the month. On orders for more than \$10.00 worth, send 10% of the amount as your first deposit.
