## EGGS SCARCE NEXT FALL

**ACCORDING TO OFFICIAL MARKET FORECAST** this Means Good Prices and Good Profits for These Who have Public

in the Nests . . . Order Your Chicks Today THE official Key and Poultry Market Review from Ottawa, dated April 16th, contains the following striking statements:

"In Ontario and Quetec, particularly, there is reason to believe that laying stock is now away below normal . . . This condition, combined with reduced purchases of baby chicks, is causing real concern over the possibility of an erg shortage next Pall. The impression now is that eggs will be scarce from September to January . . ." These statements bear out what we have been saving all Winter and

Soring that there never was a more promising time to get into highquality poultry stock. So again we urge alert-minded poultrymen to get into Bray's "Xtra-Profit" stock at the low prices we are able to quote this season. May-hatched "Xtra-Profit" pullets will lay in October, if well reared, and will cash in all Pall on the high prices we are bound to have if eggs are scarce. Slower-growing birds would miss the first half of the high-price season. Better Sill - Buy Started Pullets

On the strength of the above forecast, we believe you will be still farther shead to buy started pullets, and get them into the laying house that much sooner. We can supply you with "Xtra-Profit" pullets, 3 to 6 weeks old, that are well started and should lay in August or early September, if you keep them growing. And our "Xtra-Profit" stock has the reputation for CONTINUOUS high production, without moults, slumps, or other set-backs

Law Prices for Immediate Shipment Xira-Profit Standard
