### Overflowing milk palls

Spring is the season of overflowing milk pails. Every pound of this huge supply bas to find an outlet. Months of planning must\_ precede high production taum puilles lo sattsom bus follow so that cash for the spring wilk crop can flow

back to the producer in an uninterrupted stream. To help this along, Borden advertising and selling elfort are aggressively pushing every opportunity to find and develop new markets for milk and milk products. Berden research is dedicated to increasing the usefulness of the sation's basic food.

In flush season and out, salesmanship and research are the twin forces that keep milk moving from farm to household.

ask your friends.

You'll be surprised at the number of people who really want you to have a telephone. Many of them don't even know you but they're interested nevertheless because of what your telephone means to their service. Too few telephones curtails service and the value of each individual instrument as well. The more telephones in service, the greater the value to each user. From the viewpoints of both service cost and service scope, every farmer is interested in seeing that every other farmer has a telephone.

NEW LOW RATES for farm telephone service are now in effect!
