One of the distinctive feature: modern agriculture in Ontario L. the promulence of youth in all that pertams to the industry. This was not always so. In times gone by, owing to force of circumstances there was little inducement to youth on the farm further than a love of hard work. but, since the interest of young peopel has been aroused, the love of achierement in the oldest and greatest of all industries has placed the young turner in a position of commanding

This commanding position is reality the outcome of one of the mest progressive and encouraging movements of modern times, namely, farm club organization for girls and boys. Officially known as "Hoys" and Cirls' Parm Club Work in Canada. the movement is designed to develop interest in the farm and farm life; to provide a practical education agriculture and home economics: improve farm practices; to encourage the use of better livestock and seed; and to train young people for citi-

Emergencies, 20-22 the darkness. Lite is not all autilight ever. There are many hours of such peace and power that we think the solution of life's problems has seen finally found, but this may be followlearn to distinguish between our grown to be the largest mohair-producmoods and our circumstances. Are our low feelings the result of wrong mood and let the radiant life cominste again? If our perplexity arees from circumstances can we anproach the problem in faith believing that our needs are God's opporhis plan for our lives? The lone straughing caravan of the Hebrew migrants needed a cloud of smoke to tollow by day and a fire to follow in the darkness of the night, Their varying needs were met in the providence of God. The emigration of the Aryans to Western Europe, of the Normans to England, of the British tern lands have all given rue to convictions as to the leading hand God. Much more was happening in

every case than ownership of land or the gaining of business opportunities. Fears and Frettings, 10 - 13 The children of Israel were rightly grow up. They were children in their fears and reasonings. They forgot the sufferings in the brickyards along the Egyptian river and wanted to turn back. With grim humor they recalled Egypt, the land of tombs where the pyramids of the dead overshadowed the homes of the living. Many Israemes also had died in Egypt and the people felt that they were deserting the tombs of their ancestors. Moses was living for the future, not for the past and although from a military point of view his situation was hone-

Mohair Is From Angora

Goat: Used in Fabrica Mohalr is's fiber which has been sed in various textile fabrics for a creat number of years, and while it is a filter with which the public comes in contrast almost daily, there is little doubt that the characteristics accus are offered but what is needed in the Boston Herald.

Mohair is the hair of the augura goat and originated in Turkey. For a number of years Asia Minor was the God leads us both by the light and only mohair-producing section, but it was later found that some of the counbut neither does an eclipse last for- try in British South Africa was suitable only for the breeding of goats, and goats were imported to that coun-

At a later period goats were brought from South Africa to America, and from that time on this country has ing country in the world. The acctions of the United States which are most mitable for the production of mobalr are the southewstern states, partleslarly Texas, Arizona and New Mexico. although mechair is grown to some extent through the middle western states and in California and Oregon. The state of Texas seems to be best suited. both in climatic and range conditions. and preduces practically 90 per cont of the entire clip of the country.

Water Easy to Purily Water is one of the easiest of substances to/purify, and yet the most fantastic precautions are necessary to bring it into the state of purity required for certain physical measurements. For example, notes a writer in the Chicago Tribune, it must be treated with certain powerful chemical respents and then distilled in a still of tip or quarts or platinum. Glass cannot be used, since readily detectshie amounts of it dissolve in water. Such water must then be carefully protected from contact with the atmosphere lest it dissolve gaseous impurities. And even after all this care. reasoning from certain indirect measprements shows that this water is not

"Safety First" Creatures Many creatures pretend to be what they are not, in order to avoid being seen and captured by their fore. An example is the stick insect, says Tit-Rits Magazine. Less thown is the cuternillur of the peppered moth When these caterpillars have stripped a twig of its follage, they would be very conspicuous on the bare plant. so they stiffen themselves and pretend to be parts of the twig.

absolutely pure
