DEATH STALKS OUR HIGHWAYS!

If every human life in a village of 800 people in the untold suffering stalk our highways and this must stop! Province of Ontario were snuffed out in one day, newspapers throughout the entire world would carry the story of the ghastly tragedy.

If one of your loved ones-or even a friend-were a victim. it would become quite a grievous, horrible, personal loss

That is precisely what is going on in Ontario this year. Nearly 800 people will be killed on our highways. Nearly 14,000 will be injured - many of them crippled; many of them suffering almost unbearable pain. Death and RECKLESS DRIVERS BEWARE!

Motorists have been requested to be courteous on the road but the death toll mounts at an appalling rate. This Department, with the aid of our internationally famous police force and public-spirited citizens, intends to put reckless drivers off the road! You must stop cutting in, passing on hills and curves, crowding, racing, taking chances. Unless you have regard for the safety and convenience of other users of our highways you will soon find yourself in serious trouble.

MOTORISTS: WE ASK YOUR HELP!

When you see a motorist driving in a manner dangerous to the public, take his number, make a careful note of the actual time and place, and when you reach your destination write to the Motor Vehicles Branch, Department of Highways, Toronto, giving full details. We do not invite reports of minor infringements of the traffic laws; you are re-. quested to use sound judgment. We will deal adequately with offenders!

Eastern Canada's Giant Earner

Dairy products brought farmers of Eastern Canada more than \$171.000,000 during 1936. This represents over 40% of the total farm income for Quebec. Ontario and the Maritime Provinces. It is more income than is

produced by any other single farm product ten times as much as from wheat and more than double the revenue from cats. For thousands of farm families milk is a year-around source of money, esteady dependable income paid each month or oftener. To make this steady income possible, people must be reminded constantly of the goodness of milk and milk products. Borden halps to do this job by keeping milk foremost in the minds of millions of buy-

ers, making ever larger markets for dairy products.
