

Esqueuing Fall Fair

AT GEORGETOWN

Thursday and Friday
September 16 and 17

SPECIAL PRIZES

HORSES

- 1 Single High Stepper, by T. A. Hinkley, M.P.P. \$ 5.00 \$ 3.00
- 2 Single Turnout (hand), 1st prize by L. K. Pyle 5.00 3.00
- 3 Turnout (hand) (single) by Hughes Clever, M.P. 5.00 3.00
- 4 Best Lady Driver, by Alliance Power Mills 5.00 3.00
- 5 Best Delivery Horse in harness 3.00 2.00
- 6 Best Road Horse 3.00 2.00
- 7 Best General Purpose Horse on relay 3.00 2.00
- 8 Best Agricultural Horse on rein, 1st Massey Harris donation No. 20; 2nd Alex. Hume donation No. 23 5.00 3.00
- 9 Peoria Race, 1st by Norval Garage donation No. 19 5.00 3.00
- 6 gal. oil; 2nd by D. Brill, donation No. 37 4.00 2.00
- 10 Best Heavy Team on the grounds, including Heavy Draft, Agricultural and General Purpose, 1st by Col. Mason, 2nd by T. J. Brownridge, President; 3rd by Sid. Mills, donation No. 24. 5 gal. Shell Oil 10.00 8.15
- 11 Best Spring Fowl, sired by either Wichard or Regent, to be deducted of 1938 fee 5.00 3.00
- 12 Best Mare in Foal in Kadigan or Janet, to be deducted of 1938 fee 5.00 3.00

CATTLE

- 1 Best Jersey Female \$ 3.00 \$ 2.00
- 2 Best Registered Shorthorn Female 3.00 2.00
- 3 Best Holstein Female 3.00 2.00
- 4 Best Ayrshire Female 4.00 3.00
- 5 Best group of Dairy Cows, consisting of one mature cow, one two-year-old heifer, and one yearling heifer, to be sired by a pure bred bull, a Haddon Plate Sheffield reproduction serving tray, donated by T. Hixon Co., Ltd., valued at \$12.00. Any family having won a T. Hixon Co., Ltd. prize at a Fair in 1937 not eligible 13.00
- 6 Best Calf, shown by boy or girl under 15 years, by Dr. Paul 1st \$5.00; 2nd donation No. 29 by Carroll's Store; 3rd donation No. 13 by Doughty & McParlane 5.00 3.00 2.00
- 7 Best Veal Calf, 1st donation No. 18 Million Hardware; 2nd donation No. 14 Guelph Feed Store 5.00 3.00
- 8 Best Registered Holstein Heifer, born since January 15th, 1937; exhibitor to be boy or girl under 15 years and resident of Halton County, by T. L. Harro 3.00 2.00
- 9 Best Calf, shown by boy or girl's member of a Calf Club, open to Halton and Peel counties, entry fee 25c; Holstein Class, one third of prize money donated by Holstein-Friesian Association 1st \$5.00, 2nd \$4.00, 3rd \$3.00, 4th \$2.00, 5th \$1.00, 6th \$1.00, 7th \$1.00, 8th \$1.00, 9th \$1.00, 10th \$1.00, 11th \$1.00, 12th \$1.00; Beef Breeds Class, 1st \$4.00, 2nd \$3.00, 3rd \$2.00, 4th \$1.00, 5th \$1.00, 6th \$1.00, 7th \$1.00, 8th \$1.00, 9th \$1.00, 10th \$1.00, 11th \$1.00, 12th \$1.00
- 10 Best Beef Animal, 3 years and under, by Neely & Black, Toronto 3.00 2.00

SHEEP

- 1 Best Pen of Fine Wool Sheep (not less than 4) 1 male, 3 females, by J. Bauman 3.00 2.00
- 2 Best Pen of Long Wool Sheep, 1 male, 3 females, by Glen Woolen Mills 3.00 2.00
- 3 Best Pen Sheep, any breed, 1 male, 3 females 3.00 2.00

MISCELLANEOUS

- Dressed Powl to be placed in Hall by 11 a.m. second day of Fair, Sept. 17
- Donor gets the article—
- x 1 Best Pair Dressed Chicken, by A. E. Farnell 5.00
 - x 2 Best Pair Dressed Chicken, by J. Robinson 4.00
 - x 3 Best Pair Dressed Chicken, by Mrs. Harry Wright 4.00
 - x 4 Best Pair Dressed Chicken, by R. Carter, Norval 4.00
 - x 5 Best Pair Dressed Chicken, by Harry Robertson 4.00
 - x 6 Best Pair Dressed Chicken, by Halton Creamery, Milton 4.00
 - x 7 Best Dressed Chicken, by W. O. Marshall 3.00
 - x 8 Best Dressed Chicken, by J. H. Harro 3.00
 - x 9 Best Dressed Chicken, by Jas. Graham 3.00
 - x 10 Best Pair Dressed Chicken, by Mrs. Preston 4.00
 - x 11 Best Pair Dressed Chicken, by H. Thompson 4.00
 - x 12 Best Pair Dressed Duck, by J. McBean & Co. 5.00
 - x 13 Best Pair Dressed Chicken, by Elmer C. Thompson 4.00
 - x 14 Best Pair Dressed Chicken, by Harry Robertson 4.00
 - x 15 Best Dressed Goose, by F. R. Watson 4.00
 - x 16 Best bushel of Snow Apples, by Hume Currie, to be delivered to the Sick Children's Hospital, Thistledown 3.00
 - x 17 Best bushel of Northern Spy Apples, by E. Harro 3.00
 - x 18 Best 10 lbs. of Butter, in 1 lb. prints, by W. Gray 4.00
 - x 19 Best 5 lbs. of Butter, in 1 lb. prints, by H. C. McClure 3.00
 - x 20 Best 3 lbs. of Butter, in 1 lb. prints, by H. D. Watson 3.00
 - x 21 Best bushel of Northern Spy Apples, by David Orickton 3.00
 - x 22 Best bushel of Cels, open to Boy's Grain Club, 1st \$2.00 and 2nd \$1.00, by Dept. of Agriculture 3.00 1.00
 - x 23 Best bushel of Winter Wheat, open to members of Field Crop Competition, 1st hat valued at \$2.00, 2nd shirt valued at \$1.50, 3rd pullover valued at \$1.00, by H. Harro 3.00 1.00
 - x 24 Best Display of Grain in Sheaf, not less than 3 sheaves. Sheaves to be not less than 6 inches in diameter, 1st Carroll's Store donation No. 29; 2nd St. Lawrence Starch Co. 3.00 2.00
 - x 25 Best Hand Bound Sheaf, to be bound day of Fair, 1st by M. Williamson 3.00 2.00
 - x 26 Best bushel of Red Clover, by Morley Pettit 3.00
 - x 27 Best bushel of Alfalfa, by Peal Seed House 3.00
 - x 28 Best bushel of Sweet Clover, by P. D. Walker 3.00
 - x 29 Best and largest dozen Fresh Hen Eggs, 1 year's subscription to the Milton Champion 3.00
 - x 30 Best 1 dozen of Brown Biscuits, 1 year's subscription to the Brantford Conservator 3.00
 - x 31 Best 1 dozen of White Biscuits, 1 year's subscription to the Brantford Conservator 3.00
 - x 32 Best collection of Home-made Baking, 3 varieties, by Zeller's Chocolates, donation No. 10 3.00
 - x 33 Collection of Pastry, by J. D. McArthur, Guelph, donation No. 13 3.00
 - x 34 Best Lunch, suitable for working man, on display, by St. Lawrence Starch Co., carton of goods 3.00
 - x 35 Largest Family on the Grounds at Judge's Stand at 3.30 p.m., 1st Premium ham, Swill's Abbotsford, donation No. 17; 2nd by St. Lawrence Starch Co., carton of goods 5.00
 - x 36 Best Chocolate Cakes, by Harry Robertson, Harroby 1.00
 - x 37 Magic Baking Powder Cakes Competition—Best Layer Cake (made with Magic Baking Powder), 1st, one 8 lb. can Magic Baking Powder; 2nd, one 3 lb. can Magic Baking Powder. Can of baking powder used must be displayed with the cake. Donated by Standard Brands Ltd. 3.00
 - x 38 Best Collection of Vegetables, 1st by Cole Bros., Guelph, donation No. 15; 2nd, cottage roll by A. E. Wright; 3rd, carton St. Lawrence Starch Co. product 3.00 1.50
 - x 39 Best two loaves of Home-made Bread, goods value \$2.00 by Mrs. Adler, Guelph 3.00
 - x 40 Best 3 Pies, 1 apple, 1 lemon, carton St. Lawrence Starch Co. products 3.00
 - x 41 Best bushel Snow Apples, by Kenneth M. Langdon 3.00
 - x 42 Best Dressed Chicken, by F. C. Thompson 3.00
 - x 43 Best Layer Cake, sweetened with honey, by Sidney Morris 3.00
 - x 44 Best Display of Out Flowers, by Wm. Fennie, goods (seeds, bulbs or plants selected from their catalogue next season) 3.00
 - x 45 Best Barrel of Northern Spy Apples, by W. C. Bessley 5.00
 - x 46 Best bus. of Talman Sweet Apples, by A. Livingstone 5.00
 - x 47 Best Essay on history of British Empire by girl who has just passed Entrance examinations to High School, gold-filled, 15-jewel watch, valued at \$10.00, donated by M. Malina. An affidavit of sole work to accompany each entry 10.00
 - x 48 By J. M. Moore—Best Loaf Home-made Bread, Georgetown Herald 1 year 1.50
 - x Largest 1/2 Dozen Fresh Eggs, Georgetown Herald 1 year 1.50
 - x Best and neatest 1 lb. Butter, Georgetown Herald 1 year 1.50
 - x Best bushel Table Turnips, Georgetown Herald 1 year 1.50
 - x Best Dressed Young Goose, not less than 12 lbs. cash 4.00
 - x 250 Best bushel of Northern Spy Apples, by Erwin & Goldham 3.00
 - x 51 Special prize donated by Milton U.F.O. 5.00
- A sample of 1 dozen apples need only be shown where bushel or barrel is called for. Apples to be delivered to donor after the fair.

HIGH FINANCE

An Aberdeen employee of a large plant was delegated to purchase the wedding gift for a fellow employee. This is how he did it. He collected 25 cents from a thousand workers, and bought 1,000 25-cent packages of cigarettes from the co-operative store, keeping the 12 per cent dividend for himself. He then removed the premium cards from each package of cigarettes. He turned the premium cards into the manufacturer and received a radio set, which he gave to the bridegroom for a wedding present. To each person who donated 25 cents he gave a package of cigarettes. The bridegroom was satisfied. The worker was pleased and the Aberdeen was ahead 12 per cent, or \$250.00.

Blossom of Rice Plant

Varies in Localities
Temperature plays an important part in the flowering of the rice plant. It has an effect on the timing of the State Department of Agriculture, who works up the improvement of the rice crop has studied the flowering habits of the plant in connection with the cross-breeding of varieties. The rice plant blossoms suddenly and for only a short time. The observer noted a complete opening of the flower in thirty seconds. The blossoming continued for only about two hours. His flowers were fairly open before the sun has warmed the earth and air, and they close before the sun is far down in the United States and in Japan the rice blossoms later than in warmer areas, such as Java, India and the Philippine Islands. In India, observations will not blossom until the temperature has reached 72 degrees Fahrenheit. In the rice-growing areas, such as Java, India and the Philippine Islands, the rice blossoms most freely in the early morning hours soon after the dew evaporates, and the flowers close before the heat of noon. In California the maximum period of bloom is the two hours after noon.

Rice has a complete flower, and usually fertilizes itself. It "breeds true," and there is little cross-fertilization. The pollen from the stamens fertilizes the stigma in the same plant, usually before or at the time the flower opens.

Easy Way of Inducing Bees to Change Abode

Bees often take up their abode where they are not wanted, as in a cavity in a wall. A good way to get them out is to put a bee "escape" over the entrance to the cavity, so the bees can get out but not in. A cone of wire cloth about 8 inches high with a hole at the apex just large enough for one bee to pass through will serve as an escape. A regular hive should be placed beside the entrance for the return of the escaped bees. The queen remains in the old cavity and goes on laying eggs, but as the colony is quickly reduced in size the quantity of the brood decreases. The younger bees leave the cavity and join the bees in the hive. A new queen should get on to the bees as soon as possible.

After about four weeks, remove the bee escape and make as large a hole as possible at the entrance of the cavity. The bees will go in for the honey and carry it to the hive. For this method to work successfully it is necessary that the bees have only one exit from the cavity. —United States Department of Agriculture.

First American Flag

A standard with 15 alternate blue and silver stripes, carried by the Philadelphia Troop of Light Horse in 1775, is the first known attempt to provide a national flag. At Cambridge, Mass., on January 2, 1776, General Washington, acting on his own initiative, raised a flag consisting of 15 alternate white and red stripes with the crosses of St. George and St. Andrew in a blue field in the upper left-hand corner. Under various designations, this was employed until displaced by the Stars and Stripes, adopted by the Continental Congress, June 14, 1777.

His Way

"Don't you sometimes get lost in the woods when you go out poonung hunting and get separated from your brookwater?" asked a motorist in the Rumpus Ridge region. "None!" replied young Blasty, son of Gap Johnson. "When I don't know where I'm at and there ain't nobody around to ask I just pick out the way I know leads toward home and turn right around and go the other way; that always fetches me home by the shortest trail." —Kansas City Star

Canadian Thinker

It is estimated that the Dominion forest service that the only economic use for three-fourths of the land area of Canada lies in the growing of trees. This vast area of territory, while incapable of successful agricultural production, is, if permanently dedicated, protected and managed, suited to the production of a timber crop which would guarantee for all time the supply of raw material for Canada's wood-using industries.—Natural Resources Bulletin.

London's Fall Mail

The average American and Canadian tourist may have difficulty in recognizing Fall Mail, as the "Fall Mail," which the London postman carries along when he asks for the famous street. It was named after the French game of fall-mail, which was first played here in the days of Charles I. On this street were the homes of the Duke of Robinson, Cruise Pime, Swift of Gulliver's Travels, Streets of the "Sentimental Journey," and Gibbon, the historian.

Baking Water

Water boils at 212 degrees F. At 115 degrees a person finds water almost too hot to hold in hand in it. Fabrics that are not injured by water can be freed of living clothes moth eggs and larvae by being dipped for 10 seconds in water heated to 140 degrees F. Care, however, must be exercised to have and keep the water at this or a greater temperature. Larvae and eggs in fanned dipped for 10 seconds in water heated only to 122 degrees F. remain unaffected.

Insouciance

The little daughter of an advertising man came home from Sunday school with an illustrated card in her hand. "What have you there, darling?" her father asked. "Oh, just a little ad about hee-ee."

BORDEN means MILK

The world around

"Borden" is a big name in the milk world. Yet Borden is only one of several principal concerns producing milk in Canada. Borden milk purchases in Canada are less than 3% of the Dominion's total production.

Borden buys milk in only 4 of the Dominion's 9 provinces and in less than half of the 48 states of the United States, but sells to almost every community in the civilized world. Borden's salesmanship of milk and milk products and constant scientific research helps build a bigger market for all dairy farmers.

WRAPPINGS FILE UP IN STREETS

One of our work-adjacent exchanges, amidst that the streets of their town are littered. Since we are making their capable editorial on the subject of the United States and in Japan the rice blossoms later than in warmer areas, such as Java, India and the Philippine Islands. In India, observations will not blossom until the temperature has reached 72 degrees Fahrenheit. In the rice-growing areas, such as Java, India and the Philippine Islands, the rice blossoms most freely in the early morning hours soon after the dew evaporates, and the flowers close before the heat of noon. In California the maximum period of bloom is the two hours after noon.

THE FERT OF AN EDITOR'S LIFE

This newspaper is deluged every week with numerous "how-to" letters. And we say letters? Well, a few of them are, and contain good stuff, but the large majority are nothing more than someone wanting us to boost their production over business, their products, and this is advertising. Advertising with The Statesman is just like sugar, tea or coffee on the merchant's shelves. They ask a price for it. If they give it away they'd soon be out of business. Advertising is worth a price. It is the commercial community. We cannot give it away. If we did, this community would not long have a newspaper. Advertising brings you value received. It brings the town value received. Its publication is worth every day in the week, sometimes long hours, to give you the news of your community. It looks everything that is good for the community. We must hold our noses and continue for news and paid advertising. Therefore, we'll our water bucket every week with the requests for free advertising and turn our hands to personal and phone appeals, not in any spirit of antagonism, but unforgotten, to ourselves and our patrons. Just step into any grocery store and ask for a dollar, worth of sugar, rice, and see what answer you get. Try it once.—Downmanville Statesman.

She Knows Her Chess

The bishop suddenly became aware that he was an object of much interest to the daughter of the house, aged five, who eyed him closely. "Any you really a bishop?" she asked. "Why, of course I am, really," the bishop answered. "Well," said the little girl, whose father was an ardent chess player, "you don't look like any bishop I've ever seen. We watched ever since you came, and your head isn't built down the middle and you don't walk sideways."

PERGUN PREPARING FOR 1938

Arrangements are progressing in Pergus for a large crowd when more than 100,000 Canadian and United States agriculturists, their families and friends attend the 25th annual international plowing match from October 12th to 15th. Attractions have been planned for the three jubilee of this event which is shared under the auspices of the Ontario Farmers' Association, such as a large parade, a fireworks display, and a parade of plowing competitors and spectators, the prize list at the

ESQUEUING AGRICULTURAL FAIR

Thursday and Friday, Sept. 16 & 17

BEST LADY DRIVER OF CAR
Driver to park car in space marked, then drive away. Points to count for neatness, quietness and time for parking, also obeying rules of the Highway Traffic Act.
FIRST—Broad Tires, value \$2.50
SECOND—Broad Tires, value \$2.50
THIRD—50 lb. Robin Hood Flour
FOURTH—24 lb. Robin Hood Flour
DONATED BY BROWN'S BAKERY, GEORGETOWN

CENTENNIAL YEAR BABY SHOW
FIRST PRIZE — \$2.00 in gold
SECOND PRIZE — \$2.50 in gold
For best baby under 18 months
DONATED BY INSPECTOR N. GUTHERIK, TORONTO

BEST OLD TIME SQUARE DANCE
TWO FIGURES — PRIZES \$1.50, \$1.00, \$1.00

ONTARIO

The Ontario Department of Health

Presents a Statement by

The Academy of Medicine, Toronto, on

"INFANTILE PARALYSIS"

(POLIOMYELITIS)

Realizing the anxiety which exists in the public mind today with respect to the increased prevalence of Poliomyelitis ("Infantile Paralysis") in Toronto and other parts of the province, the Academy of Medicine of Toronto, which represents more than one thousand physicians, called a special meeting of its Council, September 1st, to review the whole situation. To this meeting were invited representatives from all departments of medicine interested in this subject.

At the conclusion of the conference, during which time all of the pertinent facts of the present situation were presented and discussed, it was felt that, in fairness to the public, an official statement should be made to set forth the facts exactly as they exist. To this end, a committee was appointed to prepare and issue an official statement, which follows:

Poliomyelitis ("Infantile Paralysis") is a communicable disease. It is definitely known that it is caused by the entrance into the body of a minute form of life known as a virus. It is known also that this virus enters commonly through the upper part of the nasal tract. There is no evidence that the disease is conveyed by flies or domestic animals.

When an outbreak of the disease occurs, healthy persons as well as those ill with the disease are found to harbour the virus in the secretions of the nose and throat. The disease is, therefore, spread through the contact of persons one with another.

Usually the virus occasions only a mild illness but sometimes the virus enters the central nervous system, which may result in paralysis. The majority of adults are not susceptible to the disease.

Present Situation

While the number of cases reported in Toronto is greater than in any previous outbreak of this disease, and there is no reason to presume that the incidence rate is likely to decline within the next two or three weeks, it must be borne in mind that not 25% of these cases show any evidence whatever of paralysis. Furthermore, among those developing paralysis, the majority eventually will recover complete use of their paralyzed limbs. It would appear, therefore, that while there is every reason for the public to view the present situation with concern, there is no justification for undue alarm or hysterical behaviour.

According to figures computed by the Department of Health, Ontario, to date, there are estimated to be 750 cases in Ontario, of which 285 have occurred in the City of Toronto. Of this number, 212 cases have been admitted to the Riverside Isolation Hospital, only 54 of whom developed some degree of paralysis. There were 11 deaths in this group. Statistics of a similar nature apply to the Hospital for Sick Children, which has received its cases not only from Toronto but from other parts of the province.

Control Measures

These include the strict isolation of all persons ill with the disease and the quarantine of those who have been in immediate contact.

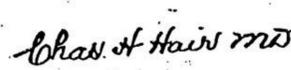

In as much as it is not known who are or are not carriers of this disease, it is advisable to reduce to a minimum contact with other people. In other words, keep out of crowds. As children are particularly susceptible, it is most important that they be kept as far as possible from mingling with other persons. For this reason, the opening of the schools of Toronto has been deferred and the Department of Health of the Province of Ontario has recommended to parents that they see to it that their children avoid attendance at theatres, playgrounds, bathing pools and beaches and other places of amusement where children congregate. The Academy agrees with the provincial and municipal health authorities that the responsibility for the control of the activities of children is primarily the duty of the parents.

The Department of Health of Ontario has completed within its own organization plans whereby serum for the treatment of this disease is available in any part of the province upon the request of the attending physician.

Nasal Spray

Experimental work with animals indicates that Poliomyelitis can be prevented by spraying the extreme upper part of the inside of the nose with a harmless solution of zinc sulphate. This was discovered during the past year. To date, its value in the prevention of Poliomyelitis in humans is not known. To be in any degree effective, the spray must be applied high up inside the nose. This can only be done with a specially constructed atomizer and by a physician thoroughly familiar with this type of work. The application of this or any other spray by an ordinary atomizer or to the lower part of the nose is quite useless. The possible value of the nasal spray properly administered is being determined at the present time in Toronto.

The Council of the Academy of Medicine of Toronto endorses the attitude adopted by the provincial Department of Health and the local Board of Health in respect to measures designed to control the present situation. We would respectfully suggest that the general public will best serve its own interests by endeavoring to follow the advice which is being given by these health authorities.

 PRESIDENT OF
 THE ACADEMY OF MEDICINE
 TORONTO
