Dairy Income is regular income

The dairy farmer sells his product every day. Spring, summer, fall and winter—good weather or bad weather—the milk crop is the surest and most regular farm earner. Every day of every year, Borden distributes and takes care of work to speed the flow of milk from the farm and of milk money back to the dairy farmer. It is this highly specialized job of creating new milk products and finding new milk markets that helps make each dairyman's income a better year-around income.
