

GET IT DONE

If it's the job we intended to do. Or the labor we had hoped. That puts it right on the balance sheet. It's the work we have really done. Our credit is built upon things we do. Our debt on things we omit. The man who totals the biggest plus is the man who completes his work. Good intentions do not pay our bills. It's easy enough to plan. To wish to do the work of a man. To do is the work of a man.

CRONKARDS

Good-bye, dear friend. Some day, I shall see you again. These pleasant hours shall know a glad return. The world is wide, yet we shall meet again. For there are many cronkards on this earth. And Death may not deny us time and place. No time between shall make our love the wiser. The more the learning stars, the vaster space. The more the cronkards of the universe. —Arthur Chatterman in the New York Times.

POSSIBILITIES

I'd rather have one honest friend. Today tomorrow to the end. That all the crowd that may attend. I'd rather have one little nod. The someone of a king. I'd rather have one little nod. That I can come to, rich or not. Than all the caresses, he has got. Or wishes that rank could bring. I'd rather have one honest friend. That all the crowd that may attend. And have the comfort of the night. That counsel of the mad. And then I have a soul or two. A house like that, a friend like you. I'm rather glad that all life thru I had just what I had.

SPECIAL RECIPES

By Betty Barclay

OSTRICH MACARONI

3 1/2 cups of rolled oats (oatmeal)
1 cup of sugar
1 teaspoon of vanilla
1 egg
1 teaspoon of melted butter
3 teaspoons (rounded) baking powder
1 level teaspoon of salt
1 cup seedless raisins
Omelet sugar and melted butter—add beaten yolks, then work in gradually oatmeal, to which has been added salt, baking powder. Then add vanilla and nutmeg and beaten whites of eggs and raisins. Drop in small quantities on buttered baking pan and bake in rather slow oven.

FROZEN FRUIT COCKTAIL

1/2 cup cranberry juice, drained
3 cups orange pulp
1/2 cup grapefruit pulp
1/2 cup powdered sugar
Mix thoroughly. Freeze in mold packed with four parts ice and one part salt for three hours.

ICE BOX LEMON PIE

Mix thoroughly.
1 1/2 cups sweetened condensed (not evaporated) milk
1/2 cup lemon juice
1/2 cup sugar
1 egg yolk, beaten
1/2 cup whipping cream
Beat into the shell, 8-inch. Cover with meringue made of 1/2 egg white, beat stiff with 1/2 cup powdered sugar. Bake in a moderate oven (350 degrees F.) until meringue is browned (10 to 15 minutes). Chill before serving.

LEMON SPONGE PIE

1 egg yolk, beaten thick
1/2 cup lemon juice
1/2 cup sugar
1/2 cup whipping cream
1/2 cup flour
1/2 cup milk
1/2 cup melted butter
1/4 cup salt

Orange Candied Sweet Potatoes

1 cup orange juice
1 cup water
1/2 cup sugar
3 tablespoons light corn syrup
4 teaspoons salt
4 cup butter
6-8 sweet potatoes or yams
Combine first seven ingredients and pour over peeled, uncooked sweet potatoes, arranged in casserole or baking dish. Bake covered in a moderate oven (375 degrees-400 degrees F.) until tender, 30 to 40 minutes. Remove lid last 10 minutes to brown or put under broiler. VARIATION: Just before removing from oven, add a layer of marshmallows and brown.

Fruit Meal Salad

On lettuce-covered salad plate, equal parts of cottage cheese (1 1/2 tablespoons). Around this at equal distances arrange three slices of orange slices. In spaces between or atop, place three or four sliced dates (first space); one dessert spoon sweetened raisins (second space); two walnut meat halves (third space). Serve with French dressing.

Simple

Abraham Lincoln was resting in a hotel lobby. As usual, the village dukes had congregated there and one bolder than the rest, remarked: "Mr. Lincoln, your speech was good but there were some points you beyond my reach."

Lincoln looked up and chuckled: "The sorry for you; I once had a dog that had the same trouble with me."

News and Information for the Busy Farmer

An increasing export trade in honey is reported, over 600,000 pounds having been shipped for export by the Ontario Honey Export Association.

Six hundred bushels of soy beans are being crushed daily in the manufacturing plant recently opened at Chatham. Most of the meal and products, although others are likely to follow.

Market for Ontario Cows

Reports from the Western Provinces shipments of Ontario cows to Western Canada, are arriving at their destination in the cattle feedlots and because of the particularly high quality of this product, it is being well received. This was revealed in a statement from W. H. McManis, chairman of the Ontario Marketing Board, who has been in Western Canada.

Put Plans on Market Cattle

With the plentiful supply of feed, the cattle going on the market this week are of a high quality. A well-finished young cow commands a premium on both the home and export markets. The market is showing a steady advance and the price of a well-finished cow will fall what the profit will be in the hundreds of cattle going into the feedlots this fall. It is reasonable to expect that it will be the deep, well-finished bullocks that command the highest price, at 80 on the market. Interior feed of a skimpy ration does not make market cows of even the best type of cattle.

Clean and Sanitary All Dairy Utensils

The keeping quality of milk depends directly upon the number of bacteria present and this in turn depends upon the thoroughness with which dairy utensils have been cleaned and sterilized. The use of live steam or scalding with boiling water is always effective providing it is available in sufficient quantity. As a general rule the quantity available on the average farm is inadequate for effective results. It is in this connection that the use of chlorine in suitable form is recommended by bacteriological experts. It is easy to use and water and is cheaper and more convenient than the heat treatment generally recommended. It is also properly employed chlorine disinfection gives excellent results and the practice, already general among milk and other food plants is spreading in the dairy farms.

Two thousand lots of seeds were sent to approximately 18,000 farmers of Ontario last year by the Experimental Station. Some of the best strains of leading varieties were distributed through this agency to the gain of the farmers.

Control Potato Grading

"In an effort to offer the consumer still further satisfaction," said J. T. Cassin, Ontario Potato Growers' Association has established a central grading station in Toronto. "Growers are now shipping potatoes to this station, where the product will be graded and bagged the entire operation being inspected by the most modern machinery. "In my estimation," commented Mr. Cassin, "this will prove to be the most practical step, to insure the consumer of top quality and uniformity of pack."

British Meat Importation

Mr. J. A. Carroll, Director, Markets Branch, states that the import of meat into the United Kingdom from the United States, Argentina and Denmark in particular, is a very considerable item in British foreign trade. He further stated that reports indicate the British Empire as having one-third of the world's sheep, forty per cent. of its cattle, but not more than four per cent. of its pigs.

British Apple Market

The current market from Andrew Fulton, overseas fruit representative, states that the outlook appears more promising for a standard apple market in the United Kingdom as the indications are for supplies to be slightly lighter from North America with better distribution. It is the opinion of the trade that good quality red dessert apples such as McIntosh, continue to be in demand at values ranging from 34 to 38 shillings a barrel for No. 1 grade in sound heat in the season. The Ontario grade should range from 18 to 24 shillings, according to the amount of colour and attractiveness of the fruit. There is a good demand and Mr. Fulton will be wanted as red apples become more scarce. The above prices, Mr. Fulton remarks, are given only as a guide, as nobody can forecast exactly what the market will be between now and March, and supplies greatly influence values. Ontario shippers are advised to keep their marketing regular, supply each week to the markets best suited for the varieties and sizes available in order to realize the best average price.

Laymen Need a Real Home

While there are many factors that enter into the marketing of the poultry flock, there is nothing that will have greater influence on the poultry raiser's success or failure than the way in which he houses his stock. Birds of good breeding, no matter how well fed, will not return maximum profits unless well housed. The poultry house is the hen's home, and to be comfortable and give good production the house should have proper ventilation, insulation and sanitation; it should have a proper location, plenty of light, be dry and have ample floor space.

Ontario Apple Exports

"One of the most appreciable gains in the volume of apple exports," stated P. M. Hodggett, Secretary, Ontario Fruit Growers' Association. "To date approximately 100,000 barrels of Ontario apples have gone to export, while 50,000 more will be shipped in the next few weeks. Five thousand barrels have been sold for February delivery alone. "Total export shipments last year, through this Association, amounted to 125,000 barrels. This year's business will show an increase of some 35,000 barrels, which is most encouraging, in view of general market conditions."

Weekly Cows Report

Haldimand County was the scene of a sale of purebred Dual Purpose Shorthorn cattle, recently, at which the top price of \$120 was paid for bulls and \$135.00 for cows, with the average price for the sale running around \$80.00 for all sexes. This was considered most satisfactory by all concerned. The sale was very well attended and bidding was remarkably brisk at all times. Both Haldimand and Kent counties report that plowing was general in January.

Subjects of Grading

Administration of the regulations for the grading of farm products offered for sale in so far as such regulations have been established to date, is the responsibility of the Department of the Dominion Live Stock Branch. The grading of farm products in Canada was brought about by the fact that the Department of the Dominion Live Stock Branch, in its efforts to stimulate demand and to extend production by reason of the confidence in the quality of the products, has been successful in securing a higher price for the products than would otherwise be the case.

The securing of price differentials as an incentive to improved production is a principle of the grading system. The grading of farm products is a fundamental principle, that these products should be of a high quality and that the consumer should be able to identify the products with the grading system. The grading of farm products is a fundamental principle, that these products should be of a high quality and that the consumer should be able to identify the products with the grading system.

BIRD BANDING

Since 1923, when Audubon used silver wire to band a brood of phoebe and (fortunately) received two returns, bird banding in America has been a very interesting outdoor pastime for hundreds of nature lovers. Though the migration of birds has attracted attention for many years yet it is within only recent times that much attention has been given to their other habits. Today bird banding is under government supervision and one should not engage in it without first co-operating with the Biological Survey at Washington.

Permits are issued for capturing migratory birds for scientific banding purposes in the United States. The birds banded they must be immediately released. The large bands carry a record of the bird's capture and the Biological Survey, Washington, D.C. Records of banded birds are transmitted regularly to the Bureau of Biological Survey where they are indexed and filed so as to be readily available for reference and study. Thousands of birds have been banded and their records studied.

Bird banding methods are neither as simple nor as difficult as they are often thought to be. The birds are highly beneficial to the farmer. Each trapping station is in reality a bird sanctuary where birds are free from natural enemies, receive abundant and varied food, and find water for drinking and bathing purposes.

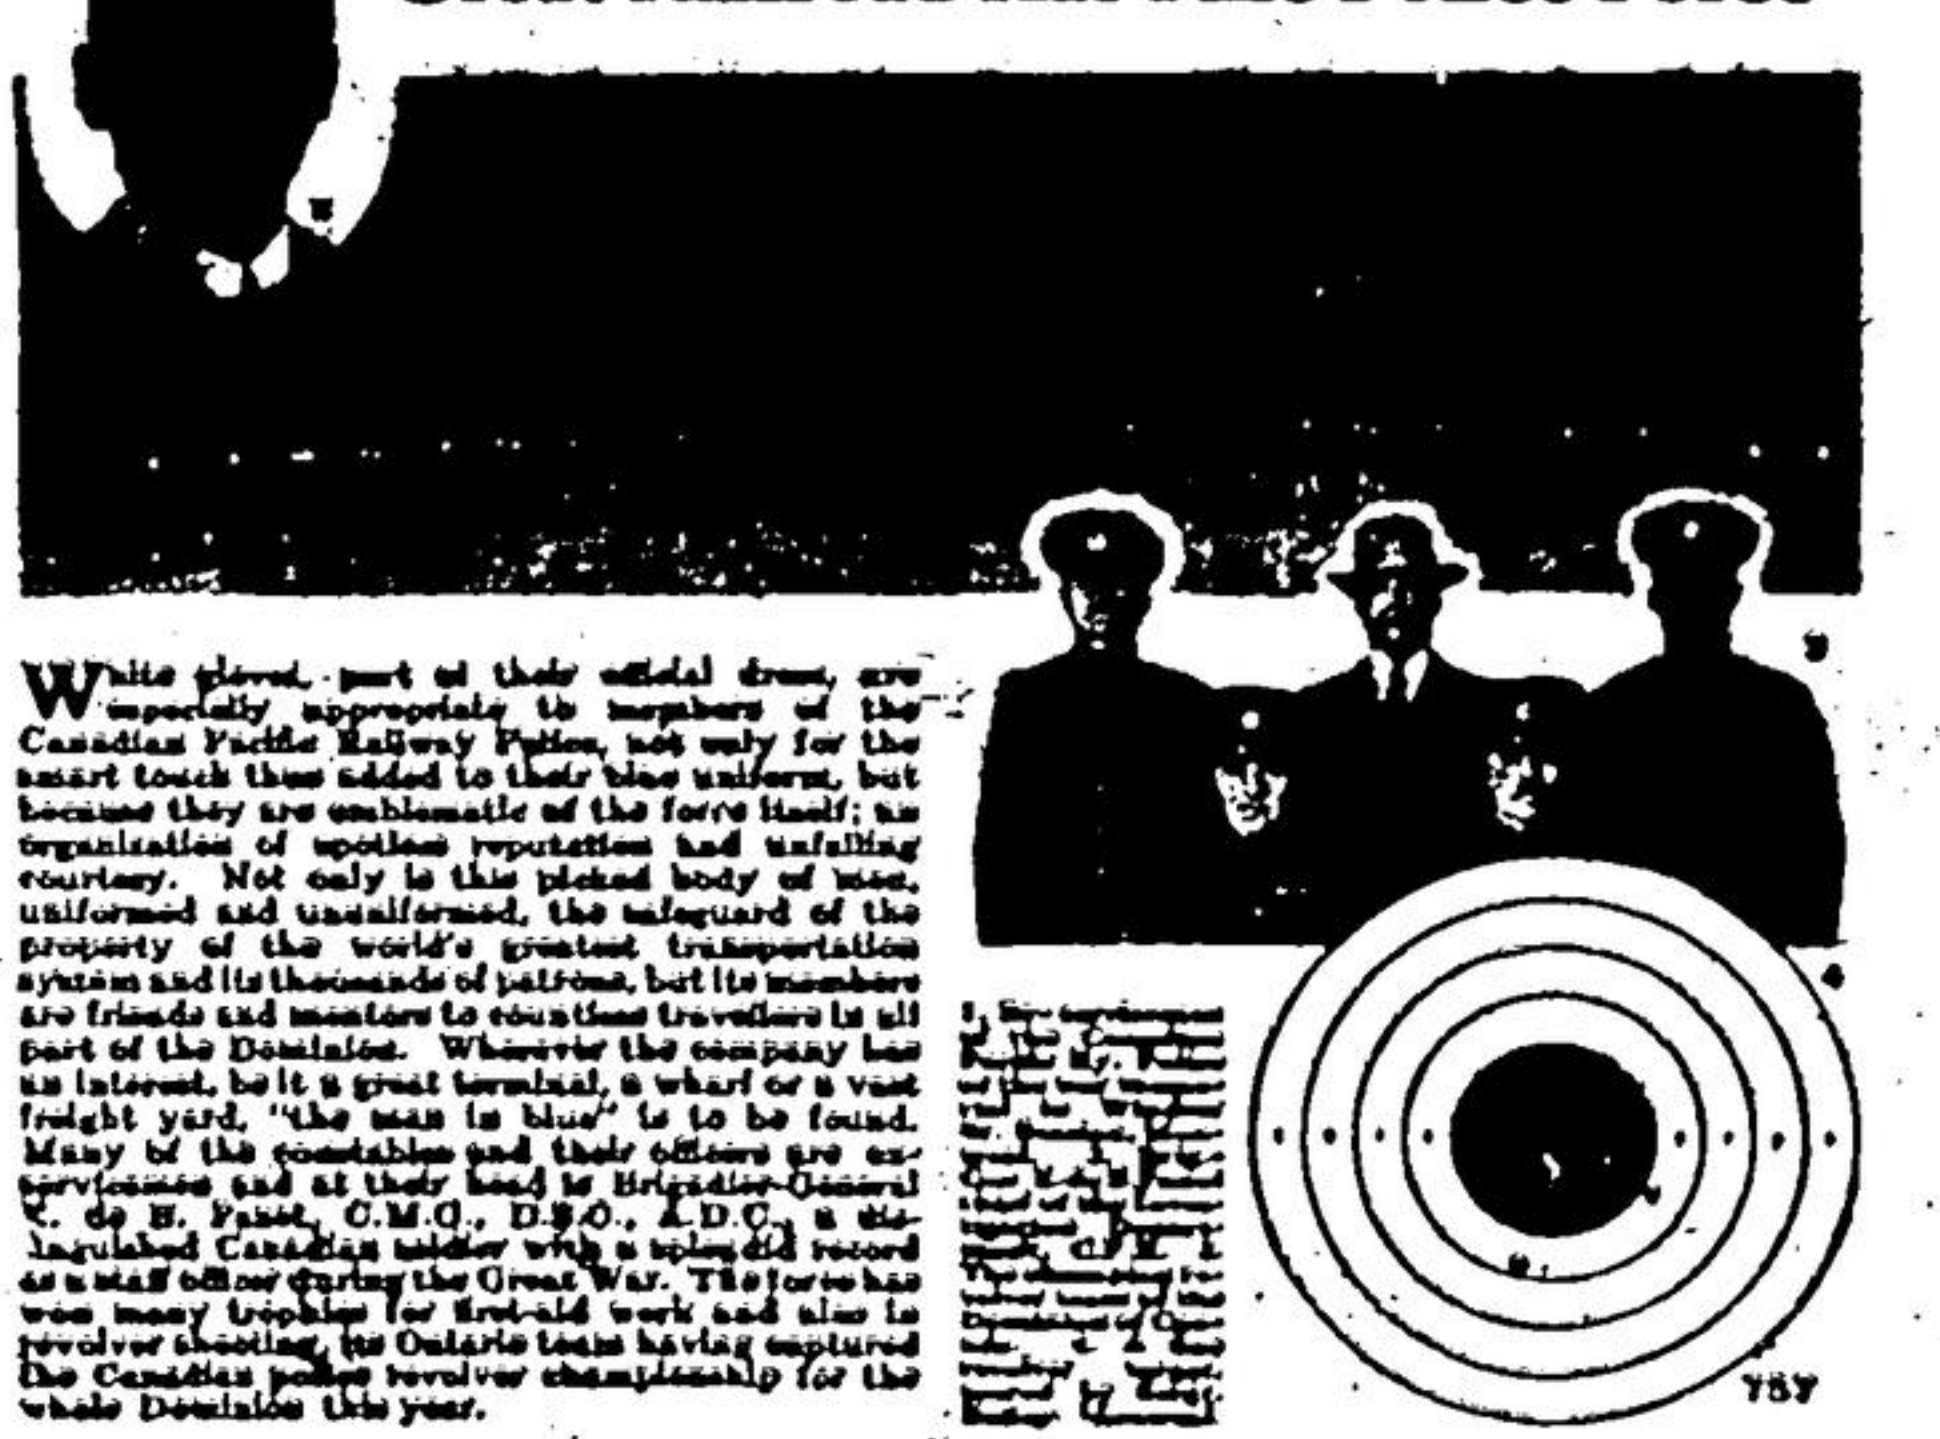

The underlying reason for all banding is the desire for more knowledge concerning migration. Records are interesting. A common tern banded on the coast of Maine was found four years later at the mouth of the Mississippi River. British West Africa. Gulls banded in England and Germany have been recovered in American waters. Gulls banded in the Great Lakes region have been reported in Florida, Louisiana, Texas, and Vera Cruz, Mexico.

Reports from captured mallards show a line of flight from Alberta, Manitoba, and Saskatchewan in the north to the coast of Louisiana and Texas in the south. Pintails banded in Kansas have been reported from California. Great blue herons banded in Minnesota have been recovered south in Iowa, Missouri, Texas, Mexico and Panama. Mourning doves banded in Illinois have been captured chiefly in Louisiana, Florida, and Georgia. The latter are being their chief wintering grounds. A young duck hawk banded at King's Point, Yukon, in July was taken at Duchesne, Utah, during the following February, about 2,300 miles from the point of capture.

Blue jays banded in Illinois and Iowa have been taken in Missouri and Arkansas. Crows banded in Wisconsin have been captured in Saskatchewan and Michigan; one banded in Saskatchewan in June was found in Oklahoma in the succeeding January, while one banded in Oklahoma in January was recovered three months later in Minnesota. An unusually long flight for a small non-passer, perching bird is that of a robin banded in Minnesota at Crow Bay, Minnesota, and taken a year and a half later at Pachua, Hidalgo, Mexico—in "Dumb Animals."

In a country newspaper appeared the following advertisement: "The man who picked up my wallet in Pure Street was recognized. He is required to return it." "The next day this reply was published: "The recognized man who picked up your wallet requested the loaner to call at any time and collect it."

Great Railroad Has Fine Police Force

White gloves, part of their official dress, are especially appropriate to members of the Canadian Pacific Railway Police, not only for the smart touch they add to their blue uniforms, but because they are emblematic of the force itself; an organization of spotless reputation and unflinching courtesy. Not only is the picked body of well-uniformed and well-trained men, the safeguard of the property of the world's greatest transportation system and the thousands of passengers, but its members are friends and mentors to countless travellers in all parts of the Dominion. Whenever the company has an interest, be it a great terminal, a wharf or a vast freight yard, "the man in blue" is to be found. Many of the constables and their officers are experienced and at their head is Brigadier-General C. de St. Paul, C.M.G., D.S.O., A.D.C., a distinguished Canadian soldier with a splendid record as a staff officer during the Great War. The force has been money making for first-class work and a revolver shooting in Ontario trains having captured the Canadian police force championly for the whole Dominion this year.

Queen Mary's Advice Was To Advertise

QUEEN MARY of England herself recently told a charity organization in which she was interested, "Advertise! It pays to advertise." Indeed times have changed. When Queen Mary must talk of advertising, what must the poor mouse-trap builder do? No longer will the world make a beaten path to his door, however wonderful his mouse-trap because his competitors are out telling the world all about their products in advertising. The world is listening. And buying.

For the Best Values Read "The Herald"

There's the situation, and as it may be to some. The most direct, effective, time-tested, economical way of reaching the public is through the medium of a newspaper. In Georgetown and vicinity, the buying public reads "THE HERALD" and uses its advertising columns as a shopping guide. Therefore, you who are trying to sell what the public needs and wants, be it a better mouse-trap or a better pound of cheese, let "THE HERALD" be your salesman.

You can sell it if you tell it in The Herald Phone 8, Georgetown

Partners for 115 years. The people of Canada and the Bank of Montreal are partners today, as they have been for 115 years and as they will be in the future. Bank of Montreal advertisement.
