There are less to-day who recall the hand-made pioneers.

What great men were those early doctors. They were doctors, nurses, and training schools all in one. In the race with the human, the doctor's horse was not considered. When life was at states, nothing mattered. In this mechanical age, and humanitarian, what takes for "animal rights" might be told of the string of ten in our stable. Faither usually drove a pair, and well he loved them. They too knew his urge. "You old fool, why are you stumbling?" That means the limit of his patience. By day or by night, everyone knew by the sound of flying hoots that the doctor had passed by at a certain hour. "No one of the Dr. Alicins of Cleargetown."

Of the great Duke of Wellington my father atoud all night in line, and in the morning marched into Westminist as the remains as the morning marched into Westminist as the remains as they lay in state, and taking a position at Trafalgar Equare swaited the funeral procession, on its way to St. Paul's cathedral. This was the greatment of dig. Old cost-pools, distens, etc. cleaned on short notice; also white-funeral means the funeral seen in England until that of Queen Victoria.
