

NOW is the time to roof TITE-LAP is the roof to use!

CALVANIZED
DURABLE

Prevent rust and decay from eating into the heavy beams, joists and rafters. Protect against rot, against fire. Roof with Tite-Lap. Prices may never be so low again.

Tite-Lap is permanent, leak-proof, fire-proof. Easily and quickly erected—comes in sheets 4, 7, 8, 9 and 10 feet long. Saves shingle lumber on new buildings. Lay it tight over old shingle roofs. Made to Council Standard and Avere Quality Brand.

Tite-Lap is Canada's greatest roofing value. Let us prove it. Send us ridge and rafter measurements and we will send free estimates.

Calvanized Rib-Roof
Beautiful, inexpensive, easy to lay. Another unequalled roofing value. Comes with corrugated, crink, cut or lapped. Waterproof, fire resistant.

LATEST IMPROVED Coleman Iron

"Smooths the Way on Ironing Day"

CUT your ironing time one third... finish ironing day tonight! You can do it with the new Instant-Gas Iron. You can do better work, too, do it easier and faster.

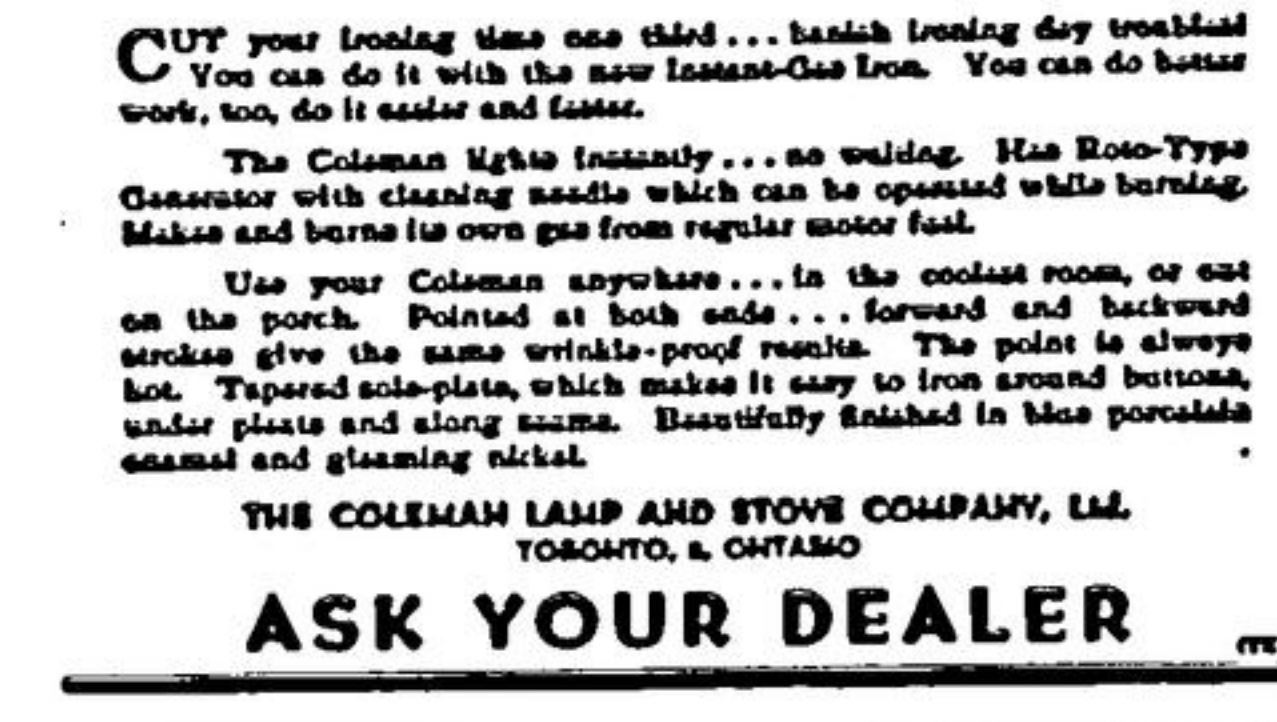

The Coleman lights instantly... no waiting. Use Eco-Type Gasometer with cleaning needle which can be operated while burning. Makes and burns its own gas from regular coal fuel.

Use your Coleman anywhere... in the coolest room, or out on the porch. Pointed at both ends... forward and backward strokes give the same wrinkle-proof finish. The point is always hot. Tapered sole-plate, which makes it easy to iron around buttons, under plates and along seams. Beautifully finished in blue porcelain enamel and gleaming nickel.

World's Largest Fire Alarm System Inaugurated

1. The new Fire Alarm Control Office Building on Mount Royal.
2. The first hand operated Fire Alarm call station in the history of the City of Montreal.
3. A special wiring system to the bank of all outlanded roads, about the same of electrical equipment.
4. A view of the switchboard showing the two hundred and twenty lines, handling and newspaper Office, all our lines.
5. A view of the large bank of the Fire Alarm call station, showing the two hundred and twenty lines.
6. The Fire Alarm Control Office Building, showing the two hundred and twenty lines.
7. The Fire Alarm Control Office Building, showing the two hundred and twenty lines.

It's a far cry from the days of Mount Royal, which was officially opened by His Worship Mayor Rinfret, on June 23rd, when the new central office took over the supervision of all fire calls and the old board was reported "Dead" after twenty-four years' service. Owing to the phenomenal growth of the city in the past few years the facilities of the old board have been outgrown.

This two million dollar project has taken over two years to complete. It now holds a unique position in the fire fighting circles of the Empire, and indeed of the world, since it is the largest Central Fire Alarm Station to be found anywhere in the world.

It is designed not alone for today, but very wisely provision is made for expansion with a view to the day when the whole island will constitute Greater Montreal.

ONE SOLUTION

I haven't any knowledge of political economy; I'm just a common pusher of a quill; I never studied Euclid or the masters of astronomy; All mathematics bothered me, but I think the man who buys should pay his bill.

For the problems which are intricate I offer no solution; I know that water doesn't run up hill; For high financial matters I've no gift of vision; I think the man who can should pay his bill; And no student's any good unless he will.

I hear the little merchants telling just how much more the cash is coming to the till; And some of them are rich folks, for I've heard their names and know their names; They continue asking shops their wants to fill; But appear to be haunted by a bill.

Now I haven't any knowledge of industrial definition; And I haven't any counsel war to sell; I merely think I'd help you all through the troubled nation; If everyone who can would pay his bill; And I'd give the little merchants such a thrill!

—K. A. Ouellet

THE CANADA YEAR BOOK, 1933

The publication of the 1933 edition of the Canada Year Book is announced by the Dominion Bureau of Statistics. The Canada Year Book is the official annual of the country and contains a thoroughly up-to-date account of the natural resources of the country and their development, its history, its institutions, its demography, its different branches of industry, its agriculture, its commerce, its education, etc.—in brief, a comprehensive study within the limits of a single volume of the social and economic condition of the Dominion. This new edition has been thoroughly revised throughout and includes in all its chapters the latest information available up to the date of going to press.

The 1933 Canada Year Book extends to over 1,100 pages, dealing with every phase of the national life and more especially with those susceptible of statistical measurement. Attention may be especially directed to the statistical summary of the progress of Canada included in the introductory matter and giving a picture in figures of the remarkable progress which the country has made since the first census of the Dominion was taken sixty-two years ago in 1871. There will also be found in the introduction a list of the special articles appearing in previous editions of the Year Book which it has not been possible to reprint in the present volume.

The main part of the Year Book extends to thirty chapters, the first dealing with the natural features of the country, embracing its geography, geology, mineralogy, natural resources, climate and meteorology, together with a special study on the West. Western Canada, history and chronology and constitution and government are dealt with in Chapters II and III while the composition of the population as shown by the latest compilation available from the census of 1921, vital statistics and immigration statistics are to be found in the next three chapters. Chapter VII is a general survey of production which brings together the data from the different fields of Canadian production in such a way as to eliminate the duplication of values as between primary and secondary industries, thus furnishing the basis for an ap-

proximation to the national income. Chapters VIII to XV include the general treatment of production in the leading industries of the country, namely, agriculture, forestry, trade, fisheries, mines and minerals, water power, manufacturing and construction. External trade is discussed in Chapter XVI and includes a study of the tourist trade of the Dominion and the balance of international payments. External trade is distinguished from external trade as examined in Chapter XVII with special emphasis on the grain trade, the trade in the stock and animal products and the ocean of wholesale and retail trading establishments. Transportation and communications is the subject of Chapter XVIII, which includes a treatment of the work of the Government in transportation, including a précis of the Report of the Duff Commission and the legislation passed thereon together with statistics of the activities of steam railways, electric railways, express companies, roads and highways, motor vehicles, air navigation, cable, shipping and navigation, telegraph, telephone, the post and the radio. Chapter XIX is concerned with labour, wages and cost of living and Chapter XX deals with the Dominion's foreign relations and international trade. The publication of this volume is a national and municipal, is the universal, involving subject of Chapter XXI, which also includes a treatment of national wealth and income and Canadian investments abroad and external investments in Canada. For those who wish to know more about the Dominion, this book is a must.

The volume is illustrated by many maps and diagrams and the latest available data is everywhere included. Immigration and trade statistics for the fiscal year 1932-33 and miscellaneous agricultural figures of the 1931 Census will be found in the Appendix. Owing to the urgent need for economical publications, it has become necessary to make a change to all individuals receiving a Canada Year Book, though free copies will continue to be supplied to Government Departments, public libraries and newspapers. Individuals requiring the Year Book may obtain it from the King's Printer, Ottawa, as long as his supply lasts, at the price of \$1.50, which covers merely the cost of paper, printing and binding. By a special concession, however, university students needing the volume in their work, teachers and masters of schools, may purchase the volume from the King's Printer at the nominal price of 50c.

WORLD RAILWAYS

Based on an estimate made in 1925 on the occasion of the one hundredth anniversary of the first real railway, the Stockton and Darlington, in England, it is presumed that the total length of railway lines in all the world today is generously in excess of 700,000 miles. Naturally, the total length of steel rail laid over that distance and sidings, at others, is well over 1,400,000 miles.

REMEMBERED OLD FRIEND

Nellie McClung, the great Canadian woman, is remembered in the Toronto Globe. "Nellie McClung was born near Chatham, Ont., one winter, but left for the West when five years old. The house she was born in is no longer ex-

isting. Lectoring in Osewa Sound she recalled an incident that, slight though it was, remained vividly in her memory as a girl. When they were moving away from Ontario they had to take their furniture some distance to the west. The driver, Caleb, allowed Nellie McClung to hold the reins for a time on their way, and she thought that great privilege. She said her talk by saying: "Here, to you, Caleb, whenever you're hoping to be in the States."

WOMEN'S COMPENSATION BOARD

The month of August shows the highest number of accidents reported to the Women's Compensation Board to any month this year, there being 3,840, as compared with 3,260 in July, and 2,483 in August a year ago. The total benefits awarded amounted to \$344,000, of which \$199,253.47 for compensation and \$144,746.53 for medical aid.

A FAMOUS WRITER

President of Zionist Organization Most Famous Journalist. The venerable Nahum Sokolow, president of the world Zionist organization, perhaps the most ardent, erudite and versatile of living journalists. He is the author of historical novels, geographical studies, a "History of Zionism," and a vast output of doctrinal, controversial, political and economic literature. He has been active in the Zionist movement for fifty years.

Mr. Sokolow was born in Wisniow, Poland, in 1858, a descendant of a family of famous Jewish authors. At the age of ten he was known as a prodigy in scholastic achievements. Under his uncle, the rabbi of Lublin, he studied to become a rabbi, but, becoming a freethinker, he engaged in journalism in Warsaw in 1880, later becoming editor of the newspaper, Ha-Zefirah. Numerous other editorships followed and early in the century he was known as the leading journalist in Russia. He became head of the world Zionist organization last July, succeeding Dr. Chaim Weizmann.

GIVING ALL TO THE POOR.

"What I have given away I have, but what I have retained I consider lost," was a favorite saying of Louis Levinsky, a Toronto manufacturer, member of the Jewish faith, who died recently. The investigation reveals that this man gave away, during his lifetime, more than \$300,000 to needy charities, and that as estate at one time estimated at \$350,000 had dwindled to \$3,000, his possessor, at the age of sixty, died with a light heart in the knowledge that he had accomplished infinitely more than the building of a mere financial monument.

WORKED ONLY ONE WEEK IN TWO

It is the wife who sends us this information about her husband's activities. "For some time now my husband has been able to work only one week in two, on account of sciatica. He suffered so much from it that he could scarcely move for the pain. We tried many things, but without result. The law in the papers an account of the good results that had been obtained from Kruschen Salt, and we decided to give them a trial. For twelve months past my husband has been taking his little dose of Kruschen every morning. Now, he has no more trouble with the sciatica, and is working regularly."—(Mrs. J. M. Doctor)

CANADIANS REACH NEW ZEALAND MARKET

During the past year, sales and orders of Canadian manufactures have been selling in New Zealand in competition with Swedish and German products, reports the Industrial Department of the Canadian National Railway. Canadian manufactures also had to find sale in Norway for aluminum from plants in Quebec where cheap electric power enables low manufacturing costs.

MALTON COUNTY SCHOOL FAIRS

Malton County School Fairs will be held at the following schools: St. John's School, Malton, Sept. 14th to 15th; St. Mary's School, Malton, Sept. 15th to 16th; St. Michael's School, Malton, Sept. 16th to 17th; St. Peter's School, Malton, Sept. 17th to 18th.

Hubby—"It's queer, but the biggest thing I ever saw was the president who carried between 100 and 1100 on his back!"
Man—"Do you suppose that actually carried between 100 and 1100 on his back?"
Business Associate—"Yes, that's between 100 and 1100."
Friend—"Hi there! What are you doing up in my cherry-tree?"
Youngster—"Daddy's a doctor down here to keep off de trees!"
