

BRILL'S 20th ANNIVERSARY SALE IS NOW GOING ON

A Few Words to Our Customers

THIS SALE marks a unique event which may not, perhaps, be noticeable to the average eye. It marks the completion of a FIFTH OF A CENTURY OF STEADY PROGRESS; clean business methods for you and for us; conscientious service and fair values; a Fifth of a Century of devotion to business for the pride of the name it bears! Twenty years! It is a long time; yet our stock is so clean and devoid of old goods, that clever business executives who visit us occasionally remark upon it, saying how many stores just three or four years in business have a worse stock, with a large percentage of poor accumulations. Good luck? No! Just applied study of modern business methods, not by imitating others, but by studying our own problems. Above all through your kind co-operation and appreciation of our services to you. Our motto: "Customers First!" The rest naturally takes care of itself.

Local and outside talent will take part in the program. Dr. J. P. Williams, Grand Warden of the I.O.P.F. of Ontario, and an old Georgetown boy will be the chairman. Program at 8:30.

News and Information For the Busy Farmer

Lamb and Wool Prices
Wool prices are an important factor in maintaining lamb prices. Lamb prices are now in the dollar range of value, and it is an essential item in the farmer's budget. Already, as a result of more encouraging lamb and wool prices, there are many inquiries regarding care to be taken in the selection of breeding ewes. It is to be expected, that there will be a broad market for all classes of stock in the near future. Demand for wools on British, Australian and New Zealand markets indicates a further increase in the price of the output for 1934 is concerned. World production is estimated to be lower and the wool market for 1934 is encouraging.

Crop Improvement Evidence
Evidence of crop improvement that has resulted from the production and general use of registered and certified seed of the principal crops of Canada, the relatively high yield per acre of the crop in a field and the substantial increase in the yield of the principal crops, as reflected in the premiums generally received for Canadian wheat and other cereals, the results are very much in evidence in the areas where certified seed of grain predominates. In those areas in which coarse grains form the main crop, the yield is also high and traceable as a rule within a few years to pure variety seed stock. It is from these areas that the most uniform quality grain for commerce is derived.

Bury Corn Stubble
Any corn grower this spring can do a great deal to save himself a lot of unnecessary hand-picking of corn stubble if he will use care and forethought in his method of dealing with his corn field. States H. O. Omer, Provincial Entomologist. "If he plows the field carefully and does not bury the stubble he is sure to drag it up in working the soil, and so will have a lot of hand-picking. Also, if he uses a toothed cultivator instead of a disc he will drag up a lot of stubble. In every county there are many men who deal with their fields in such a way that they rarely have to do any hand-picking. What one man can do in one field, every farmer who is so desirous as well as he, can do in every other field. It is hoped that every one will try to exercise the necessary care in plowing and cultivating, and a lot of trouble in complying with the act."

Current Crop Report
Reports received from the Agricultural Representatives would indicate that the condition of fall wheat in Ontario is about average. In certain sections report that the crop is growing up but a great many of the roots are still in the ground. It is favourable, a considerable area will have to be cultivated and plowed to get the crop up. Farmers who are dependent on 1933 seedlings for their hay crop will be obliged to rely on their own hay crops. At auction prices are considerably improved over last year, especially prices paid for timothy. This wood is expected to be a light run as the reports from practically all the maple syrup districts show a decrease in production.

SCOUT NEWS

Last Friday evening the first meeting of the two months' patrol competition was held and judging by the attendance and enthusiasm displayed, it was by no means a losing ground in Georgetown. The program consisted of a patrol drill, a flag-break, followed by a troop inspection. In this event a good display of bare knuckle and both patrols put up a very good showing. The boys then enjoyed a wild game of football, and the patrol leaders, in which Yessifoot W. Boyle won the honours for the Beaver patrol. The program was well conducted to their corners, where fifteen minutes were spent in teaching the new recruits the proper drill. The program and plans were also made for a corner inspection to be held in three C. E. Courts, rooms 119 & 2, Acton, last evening. The program was well conducted and the boys were then played with the Beavers emerged from the scene, victory was declared in their favour. The program was very good. The interpretations were a little slow but the boys were very enthusiastic and charmed to represent law No. 2. The boys were very enthusiastic and charmed to represent law No. 2. The boys were very enthusiastic and charmed to represent law No. 2.

Here's Joyful News For Rheumatic Sufferers

Swiftly and Safely Uric Acid Starts to Go—In 24 Hours

Killing the pain of neuritic, sciatic and rheumatic with dope doesn't end your agony—you've got to get the excess uric acid out of your joints and muscles.

Thousands joyfully praise ALLENHUI because they know by experience that when taken as directed the pain—the agony of rheumatism, sciatica and neuritis leaves the body in 24 hours—no matter how stubborn and persistent it is.

Leading druggists everywhere know this—often from happy children they hear the words "Father's on the job again" or "Mother's doing the house-work once more."

ALLENHUI is so swiftly effective that it is being sold by leading druggists everywhere for rheumatism, lumbago, sciatica and neuritis.
