His premonition was not unwarranted for within a few brief weeks he was among the slain. It was a commonplace for while to lace death before going into engagements from which only s very small percentage bould possibly eturn. Yet soldiers had the moral support of commediable and the fact that their sacrifice was for their country. Jeuns had to face his cross alone, knowing that he was being put to drath by his own nation, and by the very leaders of his church. At the support of his disciples, they failed tile. On their journey to Jerusalens Jesus told the disciples frankly what his crucifixion. Itis mood was that of a great coul in a tragic hour, but his disciples were incapable of feet-

Ambition is a great driving power. The provision of adequate electrical follow Christ, but they carried their power to meet actual demands. With personal ambitions with these liers cast out in three surveys are kept in mind.

The first consideration is what does past exprisoner indicate as a necessary provision for future needs? In other words, what has been the past normal rate of growth in demand?

Alroadly speaking, growth in electrical demand in the more populated portion of Ontario during the eighteen years up to 1930 was of the order of it per cent per year, a rate of growth that had been consistently maintained throughout this long period. The arrangements for new power supplies to meet these growing demands must be taken in hand well in advance, because it takes several years to arrange for water-power leases, to draw up define water public service that in time become corrupted by the self-imperience of those who want positions and salaries for themselves and their friends. Any order of society will be imperience at long as one tries to over-incent the notion of the power actually in use at any time.

Are Ve Ablet 22, 23 Jesus must have been grieved discover that when he was facing the cross his disciples were discussing patronage. He showed no enger, but asked James and John if they were able to drink of his oup and be bapthey were honest in thinking that they could measure up to the rebut they did not understand what it meant to share Christ's sacrifice maintain its service with a minimum reserve capacity of but 10 per cent. These minimum percentages apply to prosperous times, and represent the desirable spare capacity at the time of desirable spare capacity at the time of Christ's suffering James. Within a short time they demonstrat-Christ's suffering. James was the first of the disciple group to be martyred, and according to tradition John of the cup of which their Master had

FACTS ABOUT HYDRO - No. 3 of a series of official announcements by the Ontario Municipal Electric Association, representing the Municipalities who own the Hydro-Electric System of Outerio.

## Why Hydro Buys Power

Hydro has always obtained its power supplies from whatever source has, from time to time, been determined to be most economical.

In the earlier years of Sir Adam Beck's administration, 98% of the power distributed to Hydro municipalities was purchased from private sources. Then it became economical to build or acquire generating stations. At the present time Hydro owns forty power-producing plants.

Power demands must be provided for-years in advance. The Commission was prevented, by international and other circumstances, from further development of Ontario's large power resources on the Niagara, St. Lawrence and Ottawa rivers. The only economical course left was to purchase - as the Commission did - low-cost power from available sources.

The following table sets forth the growth of your great Hydro undertaking through the years:

### Growth of Municipalities and Consumers Served and Electric Power Generated and Purchased

1915 to 1919 Incl.	205	175,702	325,046	242,634	75	82,412	25
1920 to 1924 Incl.	345	343,280	769,952	726,867	94	43,085	6
1925 to 1929 Incl.	528	486,521	1,163,744	960,193	82.5	203,551	17.5
1930 to 1933 Incl.	728	603,880	1,514,040	974.084	64.1	110 016	15.7

It is the considered opinion of this Association that Hydro has pursued a cautious, businesslike, and far-sighted policy in the purchase of supplementary power and that present power reserves are not excessive.

The general policy of the Commission respecting purchased power has been initiated with the approval of the municipalities and endorsed by the Hydro associations. These Hydro municipalities know the power requirements, and are obligated to supply the ever-growing demand for low-cost Hydro service in their respective districts.
