Issurance of SAFETY

The first requirement of the investor, particularly the small investor, is assured safety; income yield is of lesser impercance. That is why so many hundreds of thesisands of Canadians regard their savings deposits in this bank as the best type of investment. The income may not be to attractive as the promised yield of certain securities, but it is sure and steady, while the principal itself is take and always remains at full face value.

IN CANADA

THE THE LAND

In the transition being raised from 141 to 214. The key Laying contests also have demonstrated what is possible to be done in good farm flocks. Bince the contest started in 1919 the average yield has increased from 150 to 118. The average production in the 1931-32 contest was 175 eggs, and as this average was taken from a total of 4370 birds, entered by 437 breeders in the 13 contests throughout the whole Dominion, the average may be taken as fair for the better classes of breeders in Canada. Further, the hatchery approval and cockered distribution policies of the Dominion Department of Agriculture are at the disposal of THE FINEST IN THE LAND Canada's Rollable Sand House for 64 Years Creed Regards Yearste, ple. 254 WAL RENNIE SEEDS LINES

This will be followed by a parade of the prise winners of the various events before the Queen, and the awarding of the prises.

At night there will be a musical feature presented in the Arena, and a Mammoth Street Dance and Carnival will close the Festival in "A fairyland of tinted blooms and fragrance pare

The Big Success

The native genius had attained a big success without much aid of education. Asked to distribute prizes at a school closing, he made the usual speech of good coursel.

"Now boys," he said, "always remember that education is a great thing. There's nothing like education. Through it we learn that twice two makes twelve, that seven sevens make -and then there's geography."

stock offerings during the five trading days of each week. A Bad Pate ume of live stock is offered on Mon-days and Tuesdays. The result of this condition is that a considerable Mrs. Jones! A friend of mine broke percentage must be held over some-hers, and she didn't have seven years' times until Friday, necessitating the bad luck. She was killed in an ex-plosion next day!"

Other tharged.
This angle of marketing must recoive more study if losies in live stock are to be reduced to a minimum.

"This is the year when those tapable becksepers who have studied their business and know how to meet emergencies should profits," says Dr. K. J. Dyos. bro-

Sanitation in the Brooding Quarters
Colony houses are preferable for brooding purposes as they can be moved to fresh ground. Feed and water containers should be scrubbed clean daily. Litter should be kept clean and sweet.

Biands covered with small mash coming of save-consciousness is of the coming of Stands covered with small mesh wire should be used to place feed and water vessels on, preventing chicks from picking up disease germs in the waste feed spilled on the litter. There is no need to draw wrong that the waste feed spilled on the litter. Where hens are used for brooding dust often to control wermin, using Bodium Fluoride or Bulphur. Bisse Ointment weakened with lard or vase-line may be used on the young chicks and more attention than they swar and mothers. and more attention than they needed before or will need again. Youth holds that inestimable tree

Necessity

A survey of conditions at the Union
Stock Yards. Toronto, made by the
Ontario Marketing Board, would indicate that there is a definite need
for a more even distribution of live
stock offerings during the flux tradition. Excited Lady: "Porter, two of my trunks are missing." worry your head about 'em. This isn't a dressy place."

I'm glad the aky is painted blue; And the earth is painted green; And such a lot of nice fresh air All sandwiched in between. COULD NOT KNIT FOR NEURITIS

> him a long way back in time and space. He'll see a booksood scene-a purpose along the ready borders of pasture-lots and plots of woodland with a mossy dam and an old mill compothers in the distance, and a barefooted youngster in a battered, over-third strew hat loading content-edly toward its banks, a crooked fish-Honk! skrimp! squark) Damn these ing pole over his shoulder and a tomato can full of worms in one tisk.

Two factors that have most to do with the revenue from eggs are the prices received and the rate of production. Unfortunately, the price paid for the product is not always subject to the will of the poultryman, but the rate of production is in his hands and his alone. A much higher yield is within reach of any breeder who will give some care to his flock. A good male has been known to pay for himself many times over. At one of the Dominion Experimental Branch farm, a careful selection of breeder.
