

DEPARTMENT OF HIGHWAYS MOYOW VEHICLES BRANCH

# TO THE CAREFUL DRIVERS OF ONTARIO:

# Congratulations—and a Request!

There has been a gratifying decrease in the number of automotive accidents in Ontario. There were fewer deaths in 1933, sewer persons injured, less property damage. The decrease in accidents has been substantially greater than the percentage of decrease in registrations.

To those drivers who helped in this improvement the thanks of this department, the thanks of every citizen of Ontario, is due, and you have mine in large measure.

But, we have only made a beginning!

Despite the improvement shown, there were 8,634 serious accidents last year. 403 men, women and children were killed. 7,877 persons were injured!

By whom? Who were responsible for these deaths and injuries?

The drivers involved were, for the most part, honest, decent citizens; men and women who are usually careful, who only take a chance now and then. They were of no special class. Some of them live in your street, perhaps next door to you. One of them might have been you! Every one of these drivers is sorry now — truly sorry — but all the regret in the world cannot restore life or limb.

The habitually reckless, callous driver is a known, visible menace. Against him swift action can be taken. But it is to the usually careful motorist, like yourself, that this department must look for help in making Ontario's streets and highways safer for driver and pedestrian alike. Will you help? - this season more than ever before! The way is simple, the result can be far-reaching.

Careful driver, respond to this appeal! Remember that it only takes a moment for an accident to happen—one lapse from safe-driving. In that one moment may occur a tragedy which the offending driver may never be able to forget. Every time you sit at the wheel of your car be safety-conscious. Watch! Drivesafely always ... all the way.

Toronto, May 1st, 1934.

## Choose Chicks on Results

Last year, Bray chicks won 84 per cent. (more than half) of prise money, in a public chick-rearing competition, against chicks from 44 other hatcheries. This year's reports so far, show only 83 Bray chicks lost, out of 2.840-most of them brooded through coldest weather of February and March-and pullets weighing 31, ibs. at 16 weeks old. What further proof do you need that it pays to buy Bray chicks?

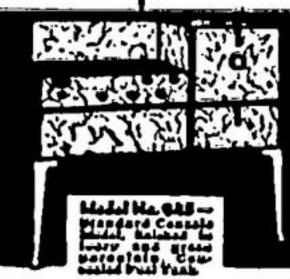

Write us for price list, or see the manager of the Bray Hatchery in MRAY CHICK HATCHTRY, & Chiptory Ave., St. Cultures, Oat.

## CATCHING BUCKERS

This week we secured a copy of the old home-town paper, writes the Stratford Beacon-Herald. For a spell we looked through the names of people who had been away for Kaster and those from the outside world who had been home, but that was not at all satisfactory. There were so few

names which we recognised. Then we looked over the advertising olumns, but the names of the merchants were different; only two did we see which were the same as they with the coal oil can. The store keeper in those days used to stick a small notate on the apout to keep the of rom spilling out, but of course that has nothing to do with what we started to say. There were three or four church notices, but the names of the preach-

ers were different. Of course ministers do move about considerably, that ts to be expected. But there was one item in the paper which sounded like the good old days. t mentioned no names, but it said

"Some of the boys are busy in the vening catching suckers in the creek." We are glad the people who, are unning the paper today put that lite plece of news in it. It was somehing to take hold on; it showed that anchorage and connection with se place had not been severed. They used to catch suckers in the creek a good many years ago; they are still loing it. The creek, the auckers and
