CASEY CONTACT. A low-priced gold mining venture that has all the earmarks of being a "winner". The Company has 1,600 acres (approx.) situated in the Patricia Gold District, one of the most active and promising gold mining areas in Canada to-day. There is ample scope in this large acreage to develop a very large mine. Location is exceptionally favorable, adjoining Casey Summit Gold Mine, a proven mine going into production this Summer. The same geological conditions under which Casey Summit is developing high-grade ore have been noted on Casey Contact. Preliminary investigation has revealed several gold bearing veins on Casey Contact. Work is now being pressed forward with vigor under the direction of H. F. Pancy, M.E., who, prior to taking charge here, was mine-manager of Casey Summit Gold Mine. Finances for a thorough campaign of exploration and development have been assured through an underwriting of a substantial block of treasury shares. Administration of the Company's affairs is entrusted to men of proven business ability and integrity. Casey Contact shares are readily marketable and can be reasonably expected to reflect favorable developments mine-wide. We recommend the purchase of shares in this Company as a worthy speculation.
