Novel School Maintained for Queen Mary Hospital Patients

One of the most unique schools in Canada is that maintained for the patients of the Queen Mary Hospital. The purpose of the school is to provide the patients with a normal life and to give them a chance to play and to enjoy the things that other children enjoy. The school is held in the hospital building and is open from 9 to 4 in the morning and from 9 to 4 in the afternoon. The school is held in the hospital building and is open from 9 to 4 in the morning and from 9 to 4 in the afternoon. QUEEN STREET GEORGETOWN

The SNAPSHOT GUILD

HOW ABOUT MOVIES?

Making home movies is a modern, low-cost, low-effort activity. It is actually as easy as any other hobby. It is fascinating, too.

MAY be well be frank about it. Until a few months ago I had the notion, shared by a good many other folks, that home movies were (1) expensive, (2) difficult, and (3) not very good, anyway.

And then Bill, a friend of mine, got a movie outfit. Neither he nor his family can be classed as wealthy, or anything like it, but there he was—sporting a movie camera. Naturally, I was curious.

The camera itself was about the size of a small book. Bill had a top coat pocket without any fuss at all. It was neat as the proverbial pin and about as simple. Bill showed me how to run it. You merely hold it up, aimed it as you would a gun, pressed a button—and you are making a movie. Oh, of course, there was a spring to wind and a lone aperture to set, but it was as simple as anything I had ever seen.

That particular camera, as I recall it, cost about \$40. It used 8 mm. film and held enough to allow for a couple of full-length shots—each shot long enough to show, for example, a sensational football play, from the snap of the ball to the end of a fifty-yard run, forward pass included. All that on about ten cents' worth of film.

Movie film, I learned, is really pretty cheap. To begin with, and doubly so when you consider that the purchase price includes the cost of finishing done by the manufacturer. Even the loading was easy.

I find that there are two standard sizes for amateur movie film—8 millimeter and 16 millimeter (Hollywood uses 35 millimeter film.) Naturally, costs are less in the 8 mm. class than in the 16, but even the 16 mm. outfit are surprisingly reasonable in both first and operating costs. Of course, you can spend a great deal of money on special equipment, but it's not at all necessary. By the way, with certain 16 mm. outfits you can get action pictures in full color. That's something you snapshotters can't quite do, to date.

JOHN VAN GULDER.

REQUISITION

I sometimes wish that Time would be a little kinder now to me. Would make my life less slow. My vision once so keen—less dim; Less fainting—my old-time vim. The days I'm facing—not to grim. As dawn through life I go.

And still another way I made. That as the old deluge shall flow. I never see, may that. For these my seeking heart would own. A thoughtful someone, for unknown. A tolerance which will condone. The failures of mankind.

Then deeply as this wish, may surge Through my short days, still gray. To love and laugh and live. And let my life this message prove. To all I know and all I love. This purpose must all action move. This is no time to drift!

—Mary Madison

"The Ottawa Spotlight"

By Wilfrid Eggleston

Ottawa, Dec. 30th.—It looks very much as though Premier Bennett and his colleagues are on the way of becoming much more socialistic and humanitarian than they were given credit for. In the case of the latter, possibly, in Mr. Bennett's footsteps and certainly in veneration to steal some of the credit for the socialistic drive of the... minister recently have been to sound a little of those old-fashioned ideas.

The "system" is not sacred; if necessary it must be scrapped; humanity must be modified; government must demand it. There must be alterations. The profit motive may have to be modified; government may have to step in and curb the robber baron. There are Mr. Bennett's ministers are expressing their views, and many people will, I think, like the Mr. Bennett of this much better than the Mr. Bennett who used to praise poetry, urge further brightening, and was un-derstandable in his own right. He is a man who has read in the newspapers. There is a tradition at Ottawa that the minister pays attention to the views of his brother-in-law, Hon. W. D. Howard. It is quite possible that Mr. Bennett has been impressed by the "New Deal" and the philosophy of Mrs. T. W. and other socialistic writers. He has in turn inculcated the prime minister with these Washington views.

Calculating with Bennett's ad-vice, and many people will, I think, like the Mr. Bennett of this much better than the Mr. Bennett who used to praise poetry, urge further brightening, and was un-derstandable in his own right. He is a man who has read in the newspapers. There is a tradition at Ottawa that the minister pays attention to the views of his brother-in-law, Hon. W. D. Howard. It is quite possible that Mr. Bennett has been impressed by the "New Deal" and the philosophy of Mrs. T. W. and other socialistic writers. He has in turn inculcated the prime minister with these Washington views.

Prescription

By G. M. BASSAMAN

I HAD been a strongly type until the little corner drug store, and the prescription clerk, was un-derstandable in his own right. He is a man who has read in the newspapers. There is a tradition at Ottawa that the minister pays attention to the views of his brother-in-law, Hon. W. D. Howard. It is quite possible that Mr. Bennett has been impressed by the "New Deal" and the philosophy of Mrs. T. W. and other socialistic writers. He has in turn inculcated the prime minister with these Washington views.

SPLENDID FERTILIZER

Wood Ashes Long Recognized As Valuable For Certain Crops

The ashes of wood have long been recognized as a fertilizer of very considerable value. Indeed their use in agriculture is one of the oldest known. In the early days of settlement, including the early days of the Dominion of Canada, the ashes of wood were used generally on sandy and light soils. It was only through the advent of the phosphate fertilizers that the use of wood ashes was largely abandoned. The production of ash is decreasing in quantity in the Dominion, owing to the disappearance of our forests. It is an important factor in making it more and more difficult for the farmer to obtain the desired results.

HAS VAST DIOCESE

Bishop of the Arctic Region

Territory covering an area of approximately a million square miles, and containing thousands of souls in the Arctic region, is the vast diocese of the Arctic region of the Dominion of Canada. The diocese is the largest in the Dominion, and is the only one that covers a territory of such vast extent.

Mending Socks

By ALBERT WESTON

KATHINA was elaborate. "I've got these socks to mend, Miss Lily," was the voice she gave, and that to her was that.

"The socks are the same as the old socks," countered Lily, with twice the force of her argument. "When you came to work here it was on the socks that you were to come, and for dinner only that we wanted you to. And we pay you more as your work is done."

"Yes, Miss Lily, but I've got these socks to mend for one of my young boys, and he's only got just enough and I can't get any more until he has mended these. These are the socks that I've got to mend for the young man who is to be married next week."

"No, they're not," said Lily. "I've got these socks to mend for one of my young boys, and he's only got just enough and I can't get any more until he has mended these. These are the socks that I've got to mend for the young man who is to be married next week."

COW MANIPULATES MILK

On a farm near Pembroke, Ontario, a cow is said to be able to drink water. Owing to illness, the cow was unable to drink water. The farmer, however, was able to get the cow to drink water by using a special method.

WATER DIVINER

The picture, taken at the international congress of diviners, held at London, England, shows a water diviner in action. The photograph was taken at the moment when the diviner was using a special method to locate water.

CANADIANIZING DOUKHOBOES

General Individualistic Tendency in Western Colonies

Break-up of the Christian Community of the Universal Brotherhood of Doukhouboes would not be a surprise to those who are familiar with the history of the sect, according to reports published by the Lebridge Herald.

GLARE LIGHTS

All over the continent the automobile death rate is now almost fifty per cent higher during the hours of darkness than during the hours of daylight. The truth is the menace of night driving is due to ill-adjusted, neglected and poor lights on motor cars.

THE TALE OF A WATCH

An elderly man hurried into police headquarters at Vancouver. He explained he had lost a watch in his chain as he passed through a crowd. When he had it in his pocket, the watch was gone. A second man hurried into the station. "I've found a watch," he said. The first man hurried into the station. "I've found a watch," he said. The first man hurried into the station. "I've found a watch," he said.

ROYAL LONGEVITY

Queen Victoria lived to be eighty-one years and 243 days—a greater age than any other King or Queen. The oldest King was her great-grandfather, George III, aged eighty-one years, 239 days. No other were octogenarians, and from Edward down to George II, who was seventy-seven, there was not a single septuagenarian for over 900 years.

MILL OPEN FIVE CENTURIES

As far as the textile industry is concerned, Britain could hold her own with any other country in the world. The industry has been in existence for five centuries, and has been a source of pride and honor to the nation.

COMPREHENSIVE VARIETY TESTS

Conducted at the various Experimental Farms and Stations of the Dominion Department of Agriculture, the results show that the variety of crops is increasing, and that the quality of the crops is also improving.

A MENAGERIE TRAGEDY

The menagerie called at a villa and the menagerie was a source of pride and honor to the nation. The menagerie was a source of pride and honor to the nation. The menagerie was a source of pride and honor to the nation.

BLASPHEMY

Mrs. X (arriving home): "I've been making a round of calls, and I've been to the menagerie." Mrs. Y (replying): "I've been to the menagerie, and I've been to the menagerie."
