CENTRE-POISE RIDING in V-8

PASSENGERS LOCATED CLOSE TO CENTER OF CAR

Three major engineering principles combine to give to the new Ford V-8 for 1935 what Ford engineers term the "center-poise" ride. These principles are:

Correct spring suspension, involving equality of front and rear spring flexibility. · Proper car weight balance and pas-

senger weight distribution. Location of passengers close to the center of the car.

Utilization of these in combination, as practiced by Ford engineers, achieves for the new Ford V-8 remarkable improvement in riding comfort without sacrifice of either safety or

worth and Mits Klais Naill.

The Norval Junior Institute and Junior Harman hair and Junior Parmare held a very successful meeting Tuesday. Feb. 12th at the gracious home of Mr. John Ruddell.

The main feature of the program was a debate, subject: "Whether a tractor is more use to a farmer than horses." Mr. Claude Molaughlin and Mr. Frederick Nurse, the animative claimed the victory over Mr. John Bird and Weir Reid, the negative.

The debate proved very interesting and was enjoyed by all. The Juniors take this opportunity to thank Mesars whitelock, J. Simpson and Bedgeloft for their services as judges.

Mr. Jamas Simpson presented the criticiams, which were quite complimentary and encouraging.

Mr. Bedgeloft atated that sixty per cent. of the area of Canada. Mr. Sedgeloft stated that sixty per cent. of the area of Canada was potential mining country, as yet undeveloped. He stated that while the United States industrial nations in the world, yet it has only three per cent. of the mining possibilities that Canada possesses.
