> DOMINION OF CANADA SUSINESS I'nt following is a brist summary o

nformation received by the Hank of Montreal from its branches throughout Canada:-"With the general Pederal elections over and with an essurance of stable Scenario four states of the current year the advance years, there is a general disposition to the improvement has been carprovement in business throughout the month of October. This Pederal revenues are failing to some time past. Notwithstanding show the appeted buoyancy, as the capacity for sconnessione in October, this in milk and besten end. Still in milk and besten end. Still in milk and besten end. It is capacity for sconnessione in October, the capacity for sconnessione in October, the capacity for sconnessione in October, the capacity for sconnession recuperation which has been in evidence has chosen as sundry collections was for the interest of the current year the advance in these samings was approximately in the dinto the month of government for the next four or the the of the current year the advance

Prairie Provinces is disappointing and an unusually large proportion of the wheat is of low grade, in Eastern Canada the crops, for the most part, are well up to the average and in some cases above, and, since the prices in Canada in comparison with the July return, but still under those of a pear ago. Ourrent loans outside the Dominion also exceeded those of July, and at the same time were higher than the figures of the previous year, than the figures of the previous year. Hank debits to individual accounts in September amounted to \$2.435,000,000. vanced materially, rural purchasing as compared with \$3,580,000,000 in power promises to be substantially September last year. larger during the coming winter than during its recent predecessors. And a very healthy development is the gradual closing of the gap between price levels of farm and manufactured products; at the peak of the depres-sion in 1933 the disparity was as much as 56% (basis 1938) in favour of the latter but it has now been reduced to roughly 13%, which means that far-

Here and There

Our vanishing wildernesses have for some time elicited the concern of conservationists, but solicitude in behalf of some of the glacters which bid fair to disappear within a few decades, disappear within a few decades, if acorching summers succeeded by mild winters become the rule. Dr. Francois E. Matthes, of the United States Geological Survey, fears that within another 10 years Glacier National Park, Montana, may be minus its glaciers. Mount Rainier National Park, Washington, also has suffered from heat prostration. At no time within the memory of living persons has the recession of ink persons has the recession of the ice rivers in these areas been so rapid as during the long-pro-tracted heat wave of 1934. Dur-ing normal winters snowfall and frigidity are went to replace to a large degree the melting snows of

Third annual competition for the most beautiful autumn-tinted Maple Leaf is announced by the Canadian Government through the Canadian Travel Bureau at Ottawa in co-operation with the Canadian Pacific and Canadian National Railways. The price list for the 1935 competition pro-\$100 goes to the person sending in the most beautiful leaf; a second prize of \$40 and a third prize of \$20. In addition a prize of \$30 for the leaf with largest area, and for second largest \$10 will be

"Steel of Empire," the recently published work by John Murray Gibbon, while really the story of the Canadian Pacific Railway, has so much of other Canadian history that it, will find a permanent place as one of the outstanding contributions to the records of the Dominion. Starting with the first known arrival on our shores, a Chinaman, Hui Sien, in British Calumbia at the end of the fifth Columbia at the end of the fifth century, Mr. Gibson traces the remantic growth of the Canadian Pacific, many centuries later, with a wealth of incident and detail, the author's long association with the railway having been of the utmost value.

Possessing one of the finest col-lections in the world of colored pictures of scenes in the heart of the Rocky Mountains, T. H. Lons-dale, of Banff, recently exhibited them to the Wemen's Canadian Club at an illustrated lecture at the Vancouver Hotel. The plotures included seenes of mountains, valleys, lakes and bird, ani-mat and flower life.

Evangeline Booth, 69-year-old commander-in-chief of the Bilva-tion Army, told the "story of the Army" to the Men and Women's Canadian Club at the Royal York Hotel, Toronto, recently, "I was born in the Balvation Army," she common thing to me. It has always been a miracle." A capacity audience gave her an ova-

Keen outdoor man, onthusiastle member and past president of the Trail Riders of the Canadian Rockies and a leading stalwart in the ranks of the Trail Rikers, J. M. Wardle, chief engineer, National Parks of Canada, has wen well-deserved promotion to the post of deputy minister of the Department of the Interior, Ottown.

Premier Dyeart, of New Bruns-wick, was the chief speaker recontly when the City of Haint John played host at a dinner in the Admiral Beatty Hotel to New Brunswick's guides at their twoday 37th annual convention. Heavy fail guiding affected at-tendance, but a good membership under the chairmanship of William T. Griffin, of Bolestown, president of the Association, enjoyed successful gathering.

Professor-"What is it?" Nurse-"A boy, sir!" Professor-"What does

He rang my bell insistently until opened the door. Clearly he had a lot to perform and could not waste time.

'How about it, Buddy," he said.

'The butcher gave me a piece of meat and if I can get some vegetables or canned goods, I'll make a stew for the kids. No work! Have to keep the kids going."
"Not" I replied, and shut the door. to was the seventh panhandler that morning.

of me. I sat on my porch and watched that enterprising young man call
at the home of one neighbor after
another. A couple of peanies here, dime there, a can of tomators some where else-business was good.

And then, being mathematically inclined, I figured the number of calls that young man could make in a day figured what would happen if he devoted the same untiring energy calling upon prospective employerswhy, he would have to get a tob be

such active panhandling. Bay, that man had a job. He was in business for himself. He was making real

And just so long as there are suckers in the world, this shark and thousands like him will conduct profitable businesses of their own.

RPEAKING AT SCHOOL PAIRS

The St. Marye' Journal-Argus, reerring to a certain school fair, saws

"In the art of speaking in public the present day children have had a the present day children have had a big advantage over their elders and are showing the results. It occurred to us that public-speaking training would be more interesting and halpful if the children would prepare their own addresses without assistance from their elders. Many of the ideas that are fluently expressed by youthful orators at the Echool Pairs show the thought and outlook of adults with mature life experience. It spoils the effect of the speeches a bit. Pupils will have a greater chance of becoming real orators if they depend entirely upon their own thoughts and entirely upon their own thoughts and

This is quite correct. School fairs are a good idea, but dishonest competition of any kind should be guarded against, just as in the other fairs. In both it is a question if unfair practices can be eliminated. A great deal depends on the aims and character of the members.

IN YOUR HOME!

Here is a hint of what war is to be like in the future. In every package of cigarettes of a famous Italian make distributed in Italy there is contained a card with a picture of a girl and a man under an umbrella and bearing the following in-

"When rain falls from the heavens you open your umbrells and are assured. If tomorrow something else falls from the skies, for example, poison gas, just take out your gas mask and be equally assured. With the umbrella no fear of rain. With the gas mask no fear of gas." The cigarette card is described as issued by the Minister of War, Military Chemical Section. On the re-verse, the Pirelli gas mask is describ-ed as particularily commended by the Ministry of War.

War is certainly going to be a ter-rible thing in the future and that is one reason that so many responsible world leaders are bending every effort to prevent an outbreak.
