

GIFT OF CANADIAN MAPLE SUGAR TO H. M. THE QUEEN

When Their Majesties King George VI and Queen Elizabeth visited the Canadian Pavilion after formally opening the British Empire Exhibition at Glasgow on May 3, they were particularly attracted by the display of maple sugar and maple syrup in the section of the Dominion Department of Agriculture and Her Majesty graciously accepted a gift of maple sugar.

The maple sugar and maple syrup on display in the Department of Agriculture section was supplied by four well known producers in the Province of Quebec, from which province last year about 99 per cent of the total Canadian output of maple sugar and maple syrup was produced in 1937. Part of the display is in half pound pieces in the shape of maple leaves. The display is decorated with thousands of colored maple leaves, which were especially selected in the woods last fall.

F. C. Numnick, of Ottawa, Director of Publicity and Extension, Dominion Department of Agriculture, is in charge of the Department's section in the Canadian Pavilion.

COURT OF REVISION

Take notice that a Court of Revision will be held in the Municipal office, Georgetown, at 8 p.m., on **TUESDAY, the 31st day of MAY, 1938,** to hear appeals entered against the assessment roll of 1938.

P. B. HARRISON, Clerk.

TENDERS FOR COAL AND COKE

Sealed Tenders addressed to the undersigned and endorsed "Tenders for Coal," will be received until 12 o'clock noon (daylight saving), Monday, June 6, 1938, for the supply of coal and coke for the Dominion Buildings throughout the Province of Ontario.

Forms of tender with specifications and conditions attached can be obtained from the Purchasing Agent, Department of Public Works, Ottawa; and the Supervising Architect, 36 Adelaide St. East, Toronto, Ont.

Tenders should be made on the forms supplied by the Department and in accordance with departmental specifications and conditions attached thereto.

When the amount of a tender exceeds the sum of \$5,000.00—whether it be for one building only or more—the tenderers must attach to their tender a certified cheque on a chartered bank in Canada, made payable to the order of the Honourable the Minister of Public Works, equal to 10 per cent of the amount of the tender, or Bearer Bonds of the Dominion of Canada or of the Canadian National Railway Company and its constituent companies, unconditionally guaranteed as to principal and interest by the Dominion of Canada, or the aforementioned bonds and a certified cheque, if required to make up an odd amount.

The Department also reserves the right to demand from any successful tenderer a security deposit in the form of a certified cheque or bond as above, equal to 10 per cent of the amount of his bid, to guarantee the proper fulfilment of the contract.

By order,
J. M. SOMERVILLE, Secretary,
Department of Public Works,
Ottawa, May 6, 1938.

The Bray Chick does the trick. Let me show you the proof. Place your order here. No writing. No bother. Call or phone.

CONFERENCE OF THE ROYAL SOCIETY

Every year since the Duke of Argyll when Governor General, founded the Royal Society of Canada in 1852, outstanding Canadians in the field of learning and research have met each year to report progress. The numbers have grown so that the Society has been subdivided into five sections in order to cover the ground in the four days allotted to the annual conference, which this year takes place at Ottawa, from May 24 to May 27.

Under the Presidency of Professor A. G. Huntsman, the distinguished biologist of the University of Toronto, the section which can always be counted on to draw good attendances is Section II covering Literature, History, Archaeology, Sociology, Political Economy and allied subjects. In English, Dr. W. Sherwood Fox, President of Western University, London, Ontario, is President of this Section this year and has chosen for the subject of his own address an examination of his own three hundred year old family tree, which has given him some surprising discoveries.

Dr. Fox's first Canadian ancestor arrived from Britain at Sorel as long ago as 1670, a certain Gilles DuFaur, whose grandson built the fur-trading fort round which eventually grew the present Toronto. His son became Vicar General of Upper Canada. Along another branch of the tree appears Marie-des-Anges Perquet, who married an Irishman and became one of the first settlers on the Ottawa River.

That wedding apparently started an inter-racial habit, for their descendants are found marrying into English, Danish and Welsh families.

An 18th Century Racketeer in Canada is the subject of another address in Section II, presented by Professor H. M. Thomas, of Western University. The Racketeer in question was Intendant Bigot who, according to Professor Thomas was not more villainous but merely more effective in his villainy than his predecessors. Under his system there were separate lines of authority for ordering stores, for checking the issues and for paying for them, one line being military and the other civil. Bigot's plan was to have well disposed men in the key positions, particularly on the military side, although his close relationship with business men, both in Canada and France, facilitated his method of short-circuiting of accounts.

There was a deluge of German "Kultur" in Eighteenth Century Canada but not of the Hitler variety, according to J. Murray Gibbon of Montreal, another of the speakers. Not many Canadians of today realize that four thousand German soldiers were sent by George III to protect Quebec against the Americans in 1776. They were commanded by Baron Riedesel, whose name was found difficult to pronounce by the Cockney British soldiers already in the garrison, so he was nicknamed Red-Hazel. Fifteen years later a Hanoverian Prince made his mark at Quebec in the person of Prince Edward Augustus, afterward Duke of Kent and father of Queen Victoria. Prince Edward was a music lover and spent one-fifth of his private income on a military band which enlivened the Governor General's Court at Quebec. At that time morganatic marriages were recognized, and Madam Julie de St. Laurent, who was, so to speak, the Mrs. Simpson of her day, cut quite a figure both at Quebec and later at Halifax. A large proportion of the settlement of British North America in this century was German, scattered in settlements from Nova Scotia to the Niagara Peninsula. These were the forerunners of the four hundred thousand Canadians of Germanic racial origin who were listed in the census of 1931.

FARM ACCOUNTING

Modern farming is a business and to be successful should be conducted in a business-like manner. Farming has developed to the stage where it is a commercial enterprise in which the character of the management largely determines income and profit. It involves the production and sale of commodities as well as the use of capital and the purchase of supplies and labour the same as most other kinds of business.

Present conditions in farming emphasize the importance to the farmer of having a record of his business transactions as well as a permanent record of other details of his farm enterprise to which he can readily refer. The problem of the farmer is to meet conditions in such a way that his farm will give him the most satisfactory net returns, year in and year out, for the use of his investment, his labour and his managerial ability. Many farmers realize that some change or adjustment in their combination of enterprises or methods of management might increase their farm income. They may be unable, however, to determine what changes to make owing to a lack of records on which to base any changes in enterprises or methods. A farm account book, properly kept and analyzed, is the fact finder for the farmer. An account book points out the weak spots in the farm business and points out the holes through which the profits have leaked. A Farm Account Book may be procured from the King's Printer, Ottawa, at a nominal price.

FARM PRODUCTION

In 1937 the gross value of commodities produced on Canadian farms is estimated at \$1,051,698,000, as compared with \$1,079,571,000, the revised estimate of the gross value of agricultural production in 1936. This represents a decrease of \$27,873,000, or less than one per cent, and is accounted for largely by the decreased value of the field crops in Saskatchewan due to drought. Decreases are also shown in the value of fruits and vegetables, poultry and eggs, maple products, and honey. Increases are recorded in farm animals, wool, dairy products, and tobacco.

BEAUTY HINTS

Take care of your health and it will take care of your complexion. Good looks depend largely on a balanced diet of wholesome foods.

Exercise, in moderation, plays an important part, too, in making a woman beautiful.

Take a warm tub in the morning, ending with a cold splatter. It's a positive tonic to your system.

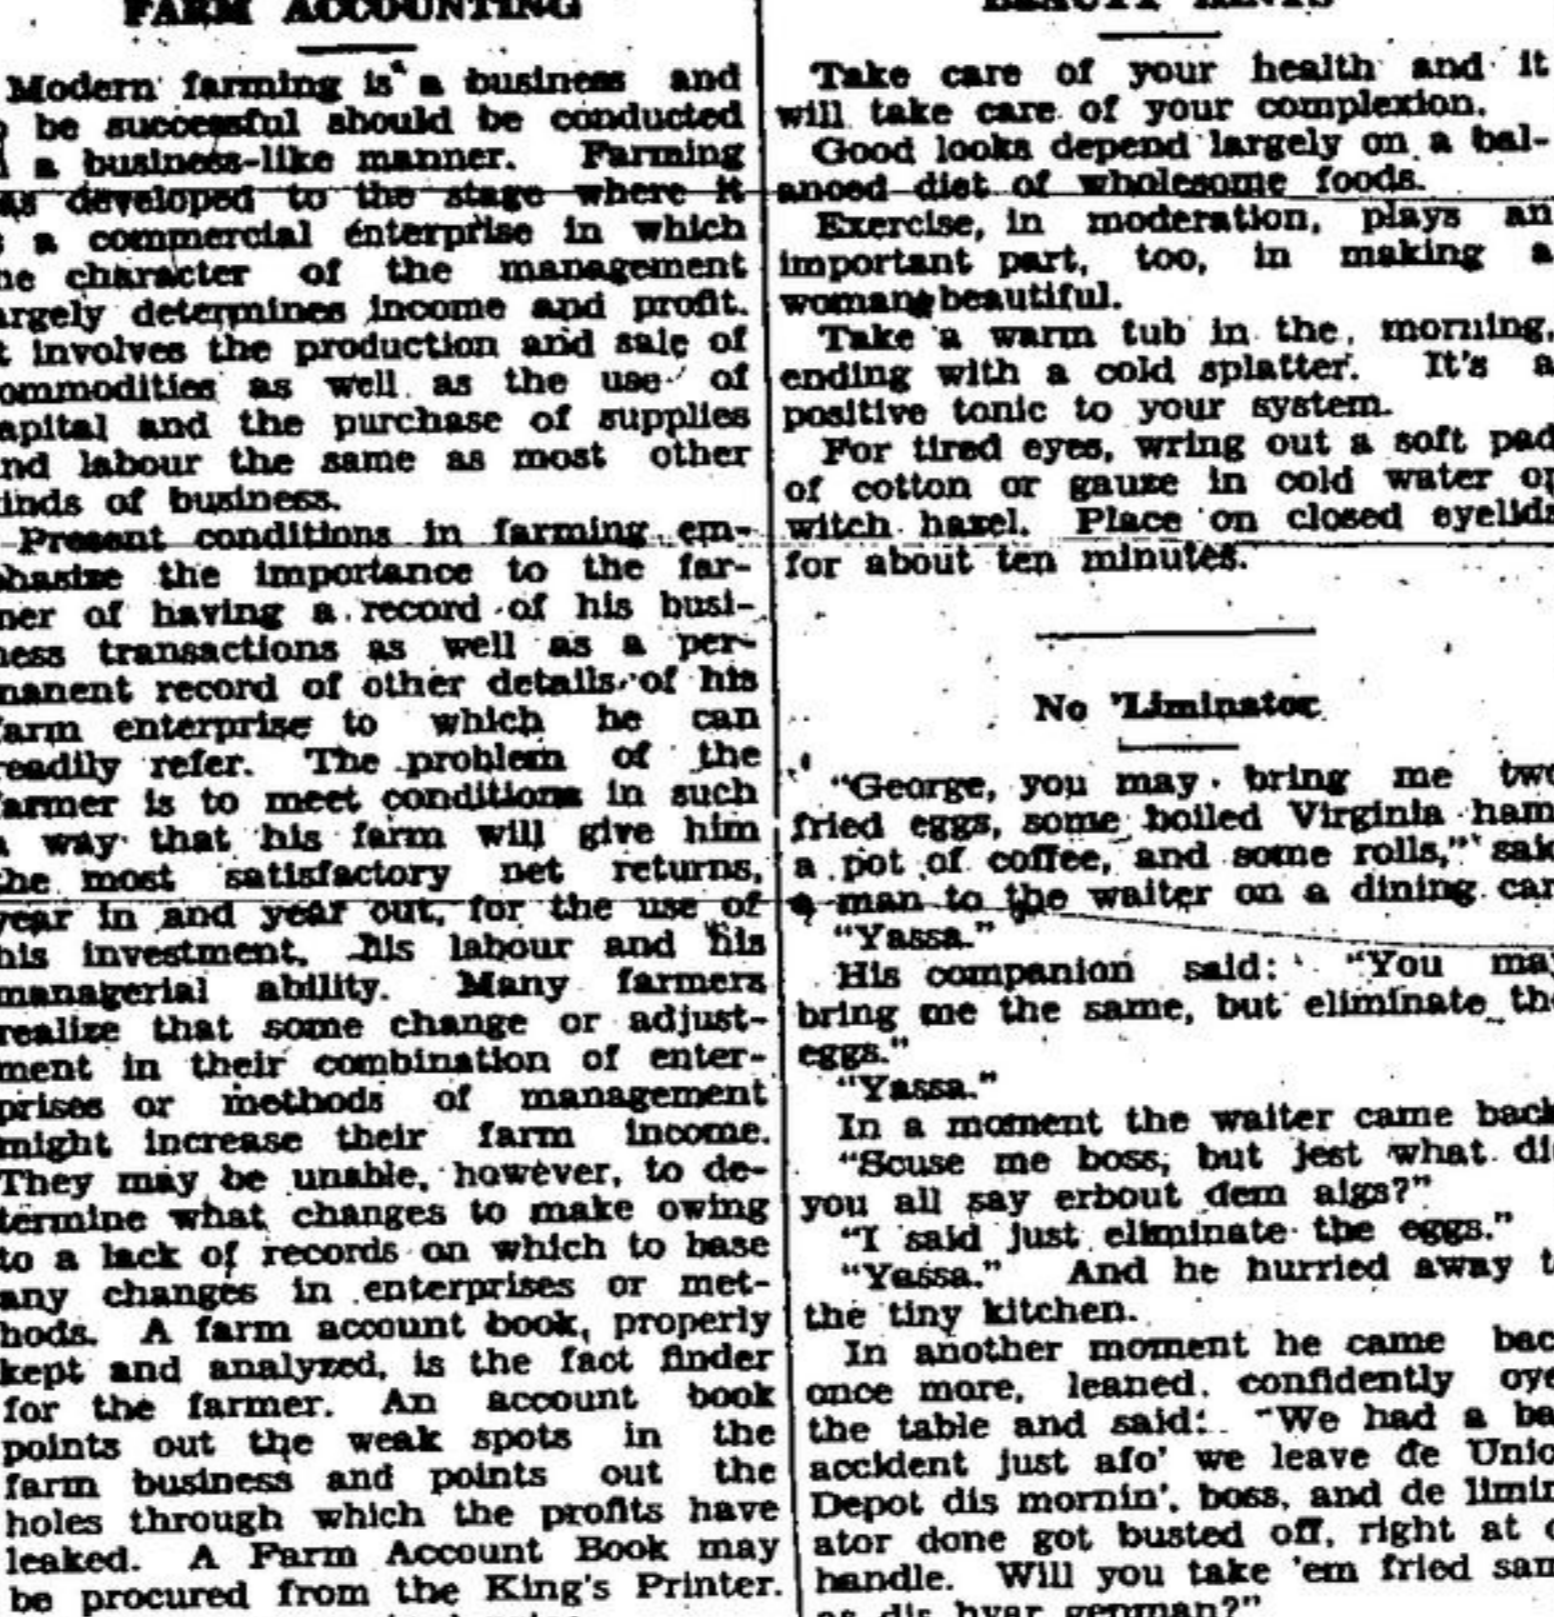

For tired eyes, wring out a soft pad of cotton or gauze in cold water or witch hazel. Place on closed eyelids for about ten minutes.

No "Eliminate"

"George, you may bring me two fried eggs, some boiled Virginia ham, a pot of coffee, and some rolls," said a man to the waiter on a dining car.

"Yassa." And he hurried away to the tiny kitchen.

In another moment he came back once more, leaned confidently over the table and said: "We had a bad accident just afo' we leave de Union Depot dis mornin', boss, and de eliminator done got busted off, right at de handle. Will you take 'em fried same as dis hyar german?"

WHAT WHITE GLOVES FOR THE COOK?

OF COURSE, we're not really suggesting that you wear your party gloves in the kitchen. But madam... you'd never soil them if you cooked the clean electric way.

There's no flame—no soot—no fumes—no smoke—when you have an electric range. Pots and pans stay clean and shiny new... no need for elbow-breaking scouring after every meal! Kitchen walls, ceiling and curtains never get that dingy, grimy look— seldom need washing—saving you much redecorating expense.

And you don't have to pay a high price to enjoy this clean, modern, labour-saving way to cook. Check today's reasonable electric range prices... and you'll find you can easily afford yours now.

Learn, too, about the attractive HYDRO Thrift Plan. It makes buying easy—shows you the way to end all your kitchen drudgery forever... to banish cooking failures... to prepare varied, delicious, thrifty meals every day of the week!

We're buying our ELECTRIC RANGE now!

HYDRO THRIFT PLAN

To all citizens of Georgetown and Glen Williams installing Electric Ranges the Local Hydro Commission will make a grant of \$30.00 towards paying the extra cost of installing a three-wire service where required. This offer is good until August 1st, 1938.

Ranges must be purchased from local dealers in Georgetown in order to secure grant.
