LOCAL NEWS

—Clive Holiday, Monday, August 1st, The Herald now enters upon its 72nd year of publication.
—Dr. F. R. Watson will be in his office on Friday, July 20th, at 26.
—Some of the most important news is found in the ads columns.
—If you have summer visitors send in their names for publication.
—The cutting of fall wheat is now in full swing in this district.
—Be careful of your thoughts lest they break into words or actions.
—Georgetown Fall Fair this year is on September 28th and 29th. Now is the time to prepare your exhibits.
—If the party who left their umbrellas in Mrs. Fieck's car will call at the Herald Office they may have same.
—Massey-Harris springtooth cultivator, 17 tooth, in first class working condition.—J. N. O'Neill & Son, Phone 14, Georgetown.
—Now that the 12th of July is past, many persons will be looking forward to Friday, August 12th, which is "Derry Day."
—Every little item of local or personal nature helps to make a better newspaper. Bring it in—send it in or phone it in. We welcome news.
—Georgetown merchants are now offering summer merchandise at reduced prices. Help to boost the home town by buying at home.
—Pupils of Holy Cross Church Vacation School held an exhibit of their work on Friday night last. Many took the opportunity to see this fine display of work.
—Camera Owners—Picture weather ahead. Films developed 30 cents, reprints 3 cents each. Pictures taken and enlargements made.—Gordon Martin, McNabb Street.
—After two months of delay, trustees of the Caledon school board have let the contract for a new four-room school for \$12,000. to Roe and Son, general contractors of Toronto.
—Norman Cameron, reeve of Chingacousy Township, suffered painful injuries to his feet and ankles when he fell through a trapdoor in his barn on the Fifth Line West. He is improving slowly.

—The annual picnic of the United Church Sunday School was held at Stanley Park, Erin, on Sunday afternoon last. There was a large turnout and a very enjoyable afternoon spent by all.
—Monday, August 1st, will be observed as civic holiday. Many towns and cities in Ontario will observe the same date. The firemen will attend the annual tournament at Barrie on that date.
—Brampton Citizens' Band has a new bandstand from which to play the summer concert series. The band may not compete at the Canadian National Exhibition this year. Some years ago, the band, then under the aegis of the Peel and Dufferin Regiment, won the Class "B" championship of three successive competitions.
—This is an era of big bands at the Canadian National Exhibition. This year the feature band is that of the Royal Artillery of England. This band, composed of 70 musicians, is unique among musical organizations because each member can play at least two instruments and in five minutes the band can change over from one of the world's outstanding military organizations to a symphony orchestra of equal merit.

Harris-Sanger

A popular wedding took place at the parsonage of Inglewood United Church on Saturday, July 16th, when Miss Dorah Aileen Sanger, daughter of Mr. and Mrs. John Sanger, Isabella street, Brampton, became the bride of Clifford Harris, son of Mr. and Mrs. George Harris of Cheltenham. Rev. J. A. H. Hodgson officiating. The bride wore powder-blue chiffon, with white hat, hose and gloves. Her corsage was of Hollywood roses, and she was attended by her sister, Miss Edith Sanger, who wore pastel blue chiffon, with white accessories and similar corsage. Mr. Jos. Harris, brother of the groom, was best man. Following the reception at the home of the bride's parents, Mr. and Mrs. Harris left for a honeymoon in the Muskoka district. On their return they will make their home at Cheltenham.

THREE LEAVES FOR POISON

Health authorities state that in many parts of Canada ivy poisoning is common. In those sections where it does occur, hikers should avoid touching poison ivy, poison sumac or anything resembling them. They should not walk through underbrush or let their clothing come in contact with any three-leaved vine.
Poison ivy which sprouts over so much of the countryside is also known as poison oak, poison vine and poison creeper. It can be recognized by its leaf, which is divided into three leaflets. Its flower is a small greenish one and its fruit pale green during the early part of summer. After ripening the fruit turns ivory white. The Virginia creeper, which is also very common, is not poisonous. It is distinguished by having five leaflets.
Far less common, but just as poisonous, is a large shrub known as poison sumac, poison elder and poison ash. Its bark is light gray, its leaves compound, from seven to fourteen inches long.
Persons who come in contact with poison ivy are likely to find a peculiar inflammation of the skin break out at the point of contact with the ivy, a few hours afterwards. Sometimes there is a slight redness and itching; with others, large swellings with sensitive blisters, accompanied by a severe burning sensation.
When poison ivy or poison sumac has been accidentally touched, the hands should be immediately washed with coal oil, alcohol or kerosene. If unable to obtain any of these at one washing with strong soap is recommended. As cold creams and ointments may dissolve and spread the poison, they should not be used.

PERSONALS

Mrs. B. Petch is visiting her sister, Mrs. Gibson in Hamilton.
Mr. Jack Kennedy of Toronto spent Sunday with the Misses Kennedy.
Master Ross Petch is holidaying with friends in Stratford.
Mr. Fred Search and daughter of Montreal were visitors in town last week.
Mr. R. B. Foulis and Mr. Roy Foulis sailed last week for a holiday in Scotland.
Miss Susie Colman has returned home after holidaying with her aunt in Toronto.
Mr. Claude Burnside of Meaford, was visitor at his home here during the past week.
Miss Norma Downs of Hornby, is holidaying with her aunt, Mrs. Walter McGilvray.
Rev. Kenneth and Mrs. MacLean, of Wingham were welcome visitors in town on Monday.
Miss Doris Green of Toronto spent the week end with Mr. and Mrs. Charles Burnside.
Miss Helen Querin of Kitchener, is holidaying with her sister, Mrs. Garfield McGilvray.
Mrs. W. Sahli and daughter Muriel of Toronto are visiting with friends in Georgetown and Glen Williams.
Mr. and Mrs. Michael Licata and Mrs. S. Licata of Hamilton spent Sunday with Mr. and Mrs. Richard Licata.
Mr. and Mrs. E. L. Arnold, Mary Jane and Billy have returned home after a pleasant holiday in Gloversville, N.Y.
Mr. and Mrs. W. Rodgers and daughter Connie of Copper Cliff, were guests at St. George's Rectory on Sunday.
Master Wesley Miller of Streetsville, is holidaying with his grandparents, Mr. and Mrs. W. Campbell, Queen St.
Mrs. E. Hicken and Misses Lucy and June Hicken left on Saturday for a holiday at Otter Rest Beach, Lake Simcoe.
Mr. and Mrs. W. Fraser of Dayton, Ohio are visiting with Mr. and Mrs. Haddell. Mr. Fraser is also spending a few days in Parry Sound.
Sailing on the S. S. Kingstons, last week were Mrs. Alfred Collins and daughter Elaine, where they are visiting friends in Rochester and vicinity.
Mr. T. L. Aldell and family and Mrs. Tate of New Orleans, Louisiana spent the week end at Mr. W. B. Shortill's, Eighth St. and also visited Callendar and Toronto.
Mr. and Mrs. Milton Hollingshead and children of Collingwood; Mrs. W. J. Brown, Miss Islay Brown and Mr. Earl Stubbs of Caledon were visitors during the week with Mr. and Mrs. F. L. McGilvray.
Mr. and Mrs. D. J. Ferguson of London, Ontario, announce the engagement of their daughter, Jean Bell, B.A., to Garfield Ernest Payne, B.A., son of Mrs. E. E. Payne of Toronto and the late Rev. H. E. Payne. The marriage will take place August 10th.
The engagement is announced of Laura Natalie, daughter of Mr. and Mrs. Charles Herbert Barber, Georgetown, and granddaughter of the late Mr. John Roaf Barber, to Harold Gordon Wood, son of Mr. David Wood and the late Mrs. Wood. The marriage to take place August 6th.

DOLLY VARDEN

Messrs. Sandy, Russell and Norman McDonald, Alex. Dobbie and Willie and Edith Service motored to Tilsonburg on Sunday. They report the tobacco crop in excellent shape.
Mr. Clifford McDonald visited with his brother, Archie, at Mr. and Mrs. Earl Smith's, Erin.
Mr. and Mrs. Edwin Currie of Milton West spent Sunday with Mrs. Angus McDonald, Dolly Varden.
Master Bobbie McDonald of Milton has returned home after spending a week at his grandmother, Mrs. A. McDonald.

News and Information

For the Busy Farmer
Must Be T. B. Tested
The judgment of the majority of county councils in Ontario in supporting the Live Stock Branch of the Ontario Department of Agriculture in its efforts to have every county in Ontario make a T. B. restricted area for cattle has proven sound in view of the recent action taken by the United States Department of Agriculture governing cattle being shipped to that country.
These regulations in substance state all Canadian cattle being exported to the U.S.A. other than those for immediate slaughter, must have a qualified veterinarian's certificate showing they have been tested within 30 days of date of shipment and found free of bovine tuberculosis. This, however, does not apply to cattle exported directly from an accredited area. It means that a veterinarian's certificate is not required for cattle in the Ontario counties already tested and the owners will be able to export freely.
The reason given by American officials for their new law is that practically all United States cattle are tested and they wish to maintain this status and keep T.B. out of their herds.
This new ruling will probably require the testing of at least 100,000 Canadian cattle annually sent to the U.S. for feeding purposes.

The Tobacco Crop

Weather conditions during the month were very favorable for the tobacco crop and early growth of the tobacco crop except for some wind damage on the lighter and poorly protected flue-cured fields in the Norfolk area. Approximately 6,000 acres of flue-cured tobacco were blown out by high winds in the Norfolk district and about 8,000 additional acres were damaged to some extent. These blown-out areas were practically all replanted but the rest tobacco started rather slowly due to dry soil at the

AIRCRAFT ORDERS LIKELY TO BE PLACED IN CANADA
(Continued from Page 1)
Chairman of the board, Mr. Sedgwick said he had difficulty in understanding why the spread should be so high. "In the automobile field" he said "the spread is about 25 per cent. In the airplane field it is 35 to 40 per cent. The spread will be handed over to the manufacturer."
—To hundreds of thousands of people on this continent and overseas the name Canadian National Exhibition is synonymous with pageantry, glamour and pomp. This is because the grandest spectacle is the outstanding event of their visit to the world's greatest annual exhibition. This year's pageant promises to be even greater and more impressive than ever before, comprising within its scope the pageantry, glamour and romance of the development of the great Dominion of Canada during the past sixty years.

time. As a result some of the fields in the Norfolk district appear rather patchy.
The tobacco crop, as a whole, got a very good start and growth in the majority of areas has been particularly rapid. A large proportion of the crop will be harvested early this year. Some flue-cured tobacco has nearly reached the topping stage and priming will commence about the middle of July.
While planted acreage of all types is somewhat lower than the allotted acreage, the total acreage will be considerably greater than in 1937. No accurate figures are yet available on the actual acreage planted, but it is estimated at approximately 70,000 acres as compared with some 58,000 acres in 1937.
Damage from insects and disease in the crop is practically normal to date. While cut worm damage was below average this year, the injury to Kent and Lambton counties, an average yield of 28 to 30 bushels per acre is indicated. Last year the yield for Ontario was 24.5 bushels.
Barley and early varieties of oats are now in and are reported as averaging to above average in condition, with the exception of several counties in Central Ontario where crops have suffered from lack of moisture. Crops are about four to seven days in advance of usual. In Northern Ontario the precipitation during June was fairly plentiful with the result that all crops have made very satisfactory growth and prospects are quite favourable.
Cutting of hay, clover and alfalfa has been about completed in Western Ontario and is nearing completion in Eastern Ontario. The yield is reported to range from only medium to average, but the quality is excellent and the feeding value will be much higher than last year. In Northern Ontario growth of hay was rapid during June and production is expected to exceed that of 1937.
In Western Ontario growth and development of tree fruits, grapes and raspberries has been good, but hot dry weather adversely affected strawberry production in many areas. Sour cherries suffered from a heavy June crop of fruit and yellowing of foliage. Some scab infection is showing on apple foliage and fruit in most districts, but is chiefly confined to poorly-sprayed or unsprayed orchards as yet. Otherwise insects and fungus pests have been well controlled by spot spray practices.
Prospects for fruit crops in Ontario at present are estimated as follows: Apples, slightly below average to average; sweet cherries, almost average; sour cherries, below average; Bartlett pears, below average; Keffe pears, average; peaches, average; plums, below average; grapes, average.

Current Crop Report
Crop conditions in Ontario at the first of July were average to above average, according to reports received from representatives in all parts of the province. Fall wheat has ripened rapidly and harvesting has commenced in many districts, with prospects favourable for an above normal yield. In Kent and Lambton counties, an average yield of 28 to 30 bushels per acre is indicated. Last year the yield for Ontario was 24.5 bushels.
Barley and early varieties of oats are now in and are reported as averaging to above average in condition, with the exception of several counties in Central Ontario where crops have suffered from lack of moisture. Crops are about four to seven days in advance of usual. to weight increase but low efficiency for the utilization of fibre. Except for this latter fact ordinary oats would be a suitable gain, but the hulls dilute the food too much, and unless very finely ground or else coarse enough to be rejected during mastication, they irritate and clog the digestive tract. It is often advised to screen out chaff for weanling pigs but this is a laborious task frequently neglected.
Unless mechanical means can be found to dehull ordinary oats, the simpler way to grow a variety that threshes free of the hull. Years ago the late Sir (then Dr.) Chas. S. Saunders bred two such varieties, Liberty and Laurel, for the express purpose of feeding young pigs and chickens and for making oatmeal porridge. Laurel proved slightly the heavier yielder but is rather short-tawed for droughty seasons. In 19 years' tests at Beaverlodge Liberty proved about three and a half days earlier than Banner and yielded nearly 50 per cent as much meat. In a brief comparison Laurel matured practically with Banner, yielding 53 bushels per acre as against 51 from Liberty.
Both varieties of hullless are prone to smut infestation and are easily injured by formaldehyde, but careful treatment with copper carbonate or mercuric disulfide ensures a clean crop.
Hullless oats cross readily with ordinary oats. It is important to take pains to ensure purity and then it may be necessary to go back from time to time for re-selected foundation stock.
Hullless oats are rather tough to thresh and summer storage in bulk is sometimes a problem.
Feeding trials at Beaverlodge years ago indicated that when hullless oats constituted a large percentage of the grain ration for pigs and poultry there was a pronounced tendency to overfatness, but this does not apply to a few weeks use for the weanlings. The hullless oats may be creep-fed whole on a clean board floor or in a flat trough.
