

OBITUARY

MRS. MARY F. MCCOLL
 Mrs. Mary F. McColl, widow of the late Donald McColl, died at her home in San Diego, Cal. July 18th, after an illness of five months. Funeral services were held Wednesday, July 20th, Dr. Clair A. Morrow officiating. Burial took place in Glen Abbey Memorial Park. Mrs. McColl was born in Georgetown, Ont., Canada, 81 years ago and came to the United States in 1901. She had lived in San Diego 13 years. She is survived by one sister, Dr. Marjory J. Potter, one daughter, Mrs. Frank A. Wallace and three sons, Hugh R. McColl, Dr. James M. McColl and Dr. W. Fraser McColl, all of San Diego.—San Diego Union Tribune.

BLAKE FREDERICK VANNATTER
 Death came after much suffering, which was borne by patience and Christian fortitude, to Blake Frederick Vannatter, lot 3, 7th Lane Erin, in the morning session of the Halton County General Hospital, on Sunday, July 24th, in his 46th year. Deceased was born on the farm on which he lived all his life, a son of Mrs. Alberta Vannatter and the late Alfred Vannatter. A number of years ago he went into the fox-farming and operated the farm which bore his name up until the time of his death. Left to mourn his loss are his wife, the former Annie May Waddell, his mother, Mrs. Alberta Vannatter, Georgetown, also one sister and brother. Mrs. Arthur R. Speight and Pharris Vannatter, Georgetown. The funeral service which was held at his late home on Tuesday, July 26th, was conducted by his pastor, Rev. A. C. W. Furman of Ballinacree, assisted by a former pastor, Rev. Geo. Aitkens of Guelph, and Rev. C. Jolliffe of Glen Williams. Mrs. H. Caldwell and Mrs. C. Buck rendered a duet at the service. The pallbearers were Richard Shortill, Ed. Campbell, Robert McEnery, Arnold McEnery, Clayton Beswick, Jesse McEnery. Interment took place in Greenwood Cemetery, Georgetown.

MISS A. HUNTER DIES AT BRAMPTON
 Miss Amanda Hunter died at her home on Joseph St., Brampton, on Monday, following a lengthy illness. She was born at Campbell's Cross, 73 years ago, a daughter of the late William Hunter. She had been a member of the Brampton Presbyterian Church during a long residence there. Miss Mary Hunter of Brampton is the last surviving member of the family.

The leadership of the Canadian National Exhibition in the realm of Canadian sport has for years been unquestioned. This year in addition to a sport programme of outstanding attractiveness there is an event of major importance in the aquatic world—the world's champion professional sculler, Bobby Pearce, who will defend his title against all comers, including Eric Phelps of England and Evans Paddon of Australia.

THIS AND THAT IN SPORT

By G. "Mac" McGilvray
THE LOCAL baseball team is in Milton tonight, and the team should be due to take a fall out of the league leaders as they have not beaten them this season. However, prophecies are taboo this year, and especially at this late date. We wish them the best of luck.

HALTON COUNTY League postponed games have been arranged to be played as follows: August 6th—Oakville at Acton and Hespeler at Milton; August 10th—Acton at Milton, and August 16th—Oakville at Georgetown.

HESPELER RED SOX shared honors with the Oakville club in the Civic Holiday games held in Hespeler. In the morning session Oakville put on a 10th-inning rally to take the decision by a 6 to 3 count, and the afternoon session, while it finished with the count 5-11, was forfeited to the Hespeler club as Oakville's side couple of players had been banished for a run-in with Umpire Frank Terry of Acton, was unable to field a full team, and the announcement was made the game was forfeited to Hespeler.

THE STANDING of the Halton County League is as follows:—

	P	W	L	T	P
Milton	13	9	4	0	3
Oakville	14	8	6	0	2
Acton	14	6	7	1	2
Georgetown	14	6	8	0	2
Hespeler	15	5	9	1	1

UP IN SUDBURY Gordon Alcott has started "Pee Wee" baseball and according to the "Sudbury Star" it is quite a new wrinkle, as the caption of an article on the sports page reads: "New Wrinkle in Age-Limit Baseball." Following is the complete article: "Gordon Alcott, a smelter worker, is introducing a new wrinkle in age-limit baseball promotion at Copper Cliff. With the backing of the C.C.A.A. he is putting out a "new league." Three teams are to be picked and named the Nationals, Americans and Internationals. The idea is similar to the "Little N.H.L." started at Georgetown two years ago and since copied by other hockey centres. Each ball player in the new league will wear on his uniform the name of a star from one of the three big leagues. The new league is for youngsters 14 years and under and already 40 boys have been signed. Two games will be played each week, with a play-off between Copper Cliff, Sudbury and Creighton Mines in the fall."

Junior—"Mother dear, you said if I was good for half an hour I could do what I liked."
 Mother—"Well?"
 Junior—"I want to be naughty for two hours."

News and Information For the Busy Farmer

Apple Crop Conditions

In Eastern Ontario the weather has been favourable for the development of tree fruits during the last month. Apples are developing satisfactorily with present size average or better and a vigorous foliage in all well-cared-for orchards. The fruit is quite free from apple scab infection in at least 90% of the commercial orchards. Leaf roller injury is rather severe in a number of orchards near Newcastle and Bowmanville. Codling moth injury is also quite apparent in orchards where this insect has been troublesome in past seasons. The preliminary estimate of total apple production in Eastern Ontario shows a 25% increase over last season. In Western Ontario weather and moisture conditions have been favourable during the past month for good colouring and sizing of apples. Scab infestation on fruit is fairly well controlled in well-sprayed commercial orchards, and serious side-worm injury is only apparent in a few localities. Practically all varieties of apples show a decrease in estimated production except Spys, where a crop 20 per cent larger than last year is forecast.

The Potato Crop

The early crop is moving in volume from Leamington, Harrow, Durand and Burlington. Some growers in the Oakville-Clarkson district are also marketing to a lesser extent. The quality is reported good with no rot in evidence. Size is not so large as in 1937, but the No. 1 grade is better well maintained. Yields are lower on account of lack of sufficient moisture. Supplies are equal to demand and the market is firm at \$2.00 to the wholesale dealer. The early crop will be well cleared up in July. The average planted for mid-season marketing is equal to average. The crop is developing well but requires more moisture and flea beetles are plentiful and quite active. This crop will commence moving to market about the last week in July with the yield depending largely on the supply of moisture during the next two weeks. The planting of main crop potatoes are a little less than in 1937, but were generally planted earlier. Elimination was good, but growth to date has been uneven and while some fields are knotting for blossoms, the late planting are just well above ground. It is too early as yet to estimate the prospective yield.

Sanitation For Poultry

Hygiene and sanitation are factors as important to the poultry flock as good stock, clean water, proper feed and range. Failure to maintain clean and sanitary surroundings is frequently the weak spot in poultry management. Cleanliness is essential, as is mortality and reduced egg production follow disease and impaired vitality. To ensure healthy surroundings remove droppings daily and scatter an absorbent such as land plaster over the dropping boards. new litter before it becomes too dirty, and supply clean water in clean vessels; disease may spread rapidly through the medium of dirty water or containers.

At least once a year, with a hoe and broom, scrape and sweep clean the floors and walls of the poultry house, removing dust and cobwebs, and if running water is available use the hose at high pressure. Paint roosts and supports with a good coal-tar disinfectant, full strength, and spray frequently with a solution of the same product according to the instructions of the manufacturer. The range also demands its share of precaution. Gravel or sandy loam provide the best sanitary conditions and is easily worked with a one-horse plough. All range and yards should be ploughed and cropped yearly and seeded with a quick-growing crop. Sudan grass is palatable and greatly relished. To ensure a good supply, it is well to cut Sudan when about six inches high before it becomes too woody, and supply clean water in clean vessels. Ideal sanitary conditions are supplied with a two or three year range rotation; a hoed crop intervening in the three year rotation provides additional protection against parasites that flourish in contaminated soil.

Perennial Weed Control

When the infestation of perennial weeds has spread over a large area, cultural and cropping methods have to be relied upon for their eradication. It is advisable, however, to use sodium chlorate for the eradication of small patches of perennials. The latter half of the growing season is a good time to make an attack on perennial weeds. There is not quite the same rush of work then, as in the spring of the year, and the weather is usually more favourable for the destruction of perennials, particularly couch grass. The roots of this weed are killed by a few days' exposure during dry warm weather and since couch grass is a shallow-rooted weed, a large percentage of its roots can be brought to the surface by cultivation. Another advantage in favour of killing weeds in the latter half of the growing season, is that it permits the growth of the number of cuttings or oats cut for green feed before the treatment commences; or the land may be used for pasture during the time of the year when pasture is most productive. Part of summer-fallow consists of ploughing in mid-summer followed by cultivation to keep down weed growth during the remainder of the growing season. This treatment should not be commenced later than August 1st, because it takes about three months of cultivation each time any top-growth appears to exhaust the food reserves stored in the roots of such weeds as perennial sow thistle, Canada thistle and chicory. There is, however, considerable variation in the number of cultivations required to kill perennial weeds and it should be remembered that an old established stand of perennials is more difficult to kill than a young growth of the same species. Keeping down all top growth from

"Little World Series" for Pro Midget Championship

SUDBURY BOYS TO VISIT HERE THIS MONTH

Gordon Alcott, organizer of the first midget N.H.L. in Ontario, now of Copper Cliff and formerly of Georgetown, has almost completed arrangements for bringing a team of midget baseballers to Georgetown to play an all-star midget team here in a three-game series for the Pro Midget Championship. This novelty attraction will no doubt draw a large attendance, and may be sponsored by some welfare organization. The date is not yet set, but the series will take place around the last week of August. This "Little World Series" should revive the old baseball spirit in town and keen interest will no doubt be taken by the two teams. The Sudbury boys will be in full uniform and will remain in town for at least two-days during the series. Outstanding athletes, say Jimmie Fowler and Spl Apps of the Toronto Maple Leaf hockey team, will be on hand to umpire the games. Further details will be announced as plans go forth.

VACATION TIME

Everyone who works twelve months of the year is entitled to at least two weeks of that time to himself. We often hear people boast of the fact that they never take a holiday, but little do they know that they are boasting of their own inefficiency, for it is impossible for one to be 100% efficient the year round; he needs time to relax, to get a new outlook on life in general and to give his physical self the rest it so much needs. Employers are agreed that the best work of the year is done in the fall when employees have returned renewed in body and spirit after a time spent away from the place of their daily toil. No matter how much one enjoys his work, there comes a time when nerves become frayed, and the whole system calls for a change. Every man and woman owes it to himself or herself to take time out for a change, it will pay great dividends in both health and happiness.

July 15 to the end of the growing season will greatly reduce the stand of perennial weeds but for complete eradication of a persistent weed like couch grass, this treatment should be followed up in the next year by a hoed crop such as corn or potatoes.

GREGORY THEATRE
