MOTION PICTURES ARE YOUR BEST ENTERTAINMENT

The real dictators of motion pictures are not the men and women in the key positions of the film industry, not the producers, directors or the stars. Those who dictate the trend of motion pictures, select the stories and determine the casts are the millions who attend the theatres, and the fact that an executive in a Hollywood studio office signs the actual contracts and work-sheets does not stand to the contrary.

In the mind of everyone connected with picture-making is the question, "What does the majority of the world audience want to see?" What kind of a story? What manner of cast?

The successful producer is the man who is able to gauge instinctively and correctly the desires of the men and women who see the pictures he makes. In the case of Selznick's pictures, "A Star is Born," is a line worth remembering. It was spoken by Adolphe Menjou, in the role of a film producer, to Fredric March, in the role of a star. Menjou

said, "Every twenty-five cents they pay at the box-office gives them the right to be a critic."

A Last Affront
"Sorry to hear your engagement is broken off, old chap."
"I shall get over it. But the worst blow was when she returned the ring, marked, 'Glass; with care.'"

Re-named
The pianist was playing the first bars of the Wedding March.
"What's that?" she asked, turning to her weary husband.
"Oh," he replied, "that's the beginning of 'Stormy Weather!'"
