HOW TO GREASE YOUR OWN CAR

First—Put on your dirtiest clothes so you can crawl under your car.

Second—Buy a supply of transmission, differential, universal joint, water pump, and pressure gun greases, a grease gun, and a spray gun. Also some penetrating oil and No. 40 oil.

Third—Equip yourself with lots of good strong words such as "Darn," "Oh, Hang," and such to use on the joints where the grease doesn't want to come through. Keep using those words until the grease comes out the other side.

Fourth—Buy yourself a complete set of wrenches to use on the containers that must be opened to inspect the lubricating supply inside. Also some new skin to graft on your knuckles when the wrench slips.

Fifth—Fill your spray gun full of penetrating oil to spray on the springs. Be sure not to breathe for about ten minutes while spraying the springs or you may oil plate the insides of your lungs, which is bad.

Sixth—Be sure not to miss any place that should be lubricated as it may cost you the price of twenty grease jobs for repairs.

Or, if this seems like too much trouble and expense, drive your car into THE WHITE ROSE SERVICE STATION, and just ask Fred Sinclair or "One of Our Specialized Lubrication Men." We assure you it's the latest thing in complete lubrication service. It
