

# THE GEORGETOWN HERALD

PHONE No. 3  
J. M. MOORE, Editor and Publisher

A weekly newspaper devoted to the best interests of the Town of Georgetown and surrounding country; including the villages of Glen Williams, Norval, Limehouse, Stewarttown, Ballinac and Terra Cotta. Issued every Wednesday evening at the office on Main St., Georgetown.

**SUBSCRIPTION RATES**—\$1.50 per year in advance. United States 50c additional. Single copies 3c. Both old and new addresses should be given when change of address is requested.

**ADVERTISING RATES**—Legal notices, 12c per line for first insertion, 7c per line for each subsequent insertion. Readers, 8c per line for each insertion; if in black face type, 5c per line additional. Notices qualifying as "Coming Events," such as concerts, entertainments, society church or organization meetings, etc., 8c per line, minimum charge 25c. Reports of meetings held gladly inserted free. In memoriam notices 50c and 10c per line extra for poetry. Birth, marriage and death notices 50c. Small advertisements: one inch or less, 50c for first insertion and 25c for each subsequent insertion. Display advertising rates on application.

Although every precaution will be taken to avoid error, The Herald accepts advertising in its columns on the understanding that it will not be liable for any error in any advertisement published hereunder unless a proof of such advertisement is requested by the advertiser and returned to The Herald's business office duly signed by the advertiser and with such error or corrections plainly noted in writing thereon and in that case, if any error so noted is not corrected by The Herald, its liability shall not exceed such a proportion of the entire cost of such advertisement as the space occupied by the noted error bears to the whole space occupied by such advertisement.

THE HERALD DOES JOB PRINTING OF ALL KINDS.

### NIGHTFALL

Fold up the tent! The sun is in the west.  
Tomorrow in untraced soil will range  
Among the blest. And I am well content.  
For what is sent, is sent—and God knows best.  
Fold up the tent, and speed the parting guest!  
The night draws on, though night and day are one  
On this long quest—this house was only lent  
For my apprenticeship—what is its best.  
Fold up the tent! Its slack ropes all undone,  
Its pole all broken, and its cover rent,  
Its work is done. But mine, though spoiled and spent—  
Mine earthly tenement—is but begun.  
Fold up the tent! Its tenant would be gone  
To fairer skies than mortal eyes may look upon.  
All that I have loved has passed  
And left me at—The last—Alone!  
Fold up the tent! Above the mountain's crest,  
I hear a clear voice calling, calling clear—  
"To rest! To rest!" And I am glad to go  
For the sweet oil is low, and rest is best!  
—John Oxenham.

### BOTANICAL NOTES FOR OCTOBER

The supreme beauty of the country, at this season, cannot be adequately described; but it can be seen and admired by all. Everyone will be stimulated both physically and mentally by spending a day in the woods in close communion with Dame Nature and her cornucopia of fleeting magnificence, as she chants the soul-stirring "Nunc Dimittis" of her departing botanical year.  
Leaf, fruit and fungus all share in the making of this transitory loveliness and bounty; so often portrayed by masters of literature and art. Literature is very ancient, but nature is older far. Words are wonderful, but the life of things around you is more than words.  
The scientist will not allow us to linger in our state of ignorance of the cause of our beloved autumnal tints. He says that these gorgeous colours are not due to frost, as is generally supposed, but to the presence of waste products.  
With the first retreat of vitality, and the withdrawal of the sap to the roots, the red and gold, the orange and the purple are but the mingling of many chemicals in the leaf, held apart when the foliage is in full vigor.  
When the leaves have performed their functions, when the fruits have appeared, matured and ripened, vegetation has entered into a new phase; the leaves lose their brilliant green. But whatever may be the variety of shades which leaves take in their decay, a certain air of sadness pervades these ornaments of our fields, which proclaims the imminence of the cold season. Cold will soon arrest the sap and disorganize the leaf-stems; the leaves withered and deformed will soon cumber the ground, to be blown hither and thither by the wind. It is the season of the fall of the leaf with all its melancholy associations.  
But everything Nature has its use. Leaves huddled together at the foot of the trees, or which have been disseminated by the autumn winds over the naked country, disintegrate slowly upon the soil, where they are transformed into vegetable mould (otherwise known as humus) indispensable to the life of plants. Thus death prepares for new life, as the old must always give way to the new. "There is no death! What seems so is transition."  
This life of mortal breath is but a suburb of the life Elysian, whose portals we call Death.  
Wild fruits and fungi add usefulness as well as beauty to October's brilliant, if sad, requiem. The wild edible fungi, mushrooms or toadstools in their various weird forms and colours, await the collector who knows quite well that delectable dishes can be prepared from the puffballs, coral fungi and a host of others quite unlike the ordinary wild mushroom in appearance, but with a flavour just as good.  
Many people hesitate—and rightly too—to eat any form of wild fungus because they lack the knowledge necessary to recognize the poisonous from the edible kinds. But this knowledge is accessible by means of fascinating study and observation, which will lead to the acquisition of many delicious dishes hitherto undescribed.  
In order to meet the demand for this knowledge, a work has been published entitled *Mushrooms and Toadstools* by Gussow and Odell, obtainable for a small fee from the King's Printer, Government Printing Bureau, Ottawa. It is written in a comprehensive and non-technical style; indeed in a way which will appeal to those with little or no previous knowledge of fungi. The book contains 128 plates, with hundreds of illustrations; chapters on how to recognize the various forms of fungi; hints to collectors; fungi as food; suggestions for the preparation of fungi for the table; poisoning by fungi; mushroom culture, together with other information indispensable to the would-be student of fungi.  
With the passing of October gardeners are, once again, offering up the sweet incense of burning plant remains—those beloved friends whom they have reared with such tender care from birth. Dame Nature seems to take her well-earned vacation; when some plants die, others enter upon what appears to be a period of repose. But the evergreens are always with us—smiling and serene—as oases in a snowy desert.  
"Oh, the glad sounds of the joyous earth!  
The murmurs that live in the mountain pines."  
—You will find the greatest results through Herald advertising.

### Fire Prevention Week October 9th to 15th

#### PREVENT FIRES

These simple suggestions, if followed by everyone in the family, will make your home safe from fire:  
Put lighted matches and smokes out before you throw them away. Keep matches where small children cannot reach them. Never smoke in the garage, barn, or attic, or in bed.  
Remove rubbish, waste papers and all unnecessary combustible materials. Provide metal ash and trash cans. Burn rubbish only in a safely covered brick or metal incinerator. Watch the fire.  
Examine all stoves, furnaces, and smoke pipes to make sure they are safe and well away from woodwork or other burnable materials. Have needed repairs made at once.  
Value the advice of your fire chief who says that many fires are caused by dirty or defective chimneys. Have the chimney cleaned regularly, and have all defects repaired.  
Escape the danger of flammable liquids by keeping them in their original containers, and no gasoline in the house. Do dry cleaning with safe liquids or send the work to the cleaner. Never start fires with kerosene.  
Teach everyone in the family to be careful of fire, to watch stoves, fireplaces, electric appliances and all other possible fire causes, and every day to remove old rags, papers and other rubbish.  
Explain to everyone in the house what to do in case of fire, how to put out fire in clothing by wrapping in a rug or blanket, what to do when grease catches fire in the kitchen.  
Save life and property from needless destruction by fire by keeping the principles of fire prevention always in mind and never taking a chance with fire.

#### LADIES ARE AIR MINDED IN MATTER OF CLOTHES

According to Trans-Canada Air Lines, this is what the well dressed woman can carry with her on a flying trip without exceeding the excess baggage regulations:  
"Suit case 21-2 inches by 16-2 inches by 9 inches; two street dresses; 12 handkerchiefs; jacket; one pair dinner sandals; evening gown and bag; four pair gloves; six pair hose; lingerie; lightweight dressing gown; one pair slippers; nightgown; jewelry case; sewing kit; rubberized toilet kit with cosmetics in lightweight containers."  
All this, according to T.C.A. officials who claim to be versed in such matters, weighs three pounds less than the maximum 35 pounds of baggage allowed each passenger without charge. Furthermore, they state a woman can exist for six weeks with such an outfit. Men, they complain, are forever carrying too much luggage and are always a problem to air-line baggage masters.

### USE ULTRA-VIOLET RAYS FOR PASSENGER COACHES

Ultra-violet ray sterilizers are being used to purify the atmosphere of a passenger coach now in experimental service on the Canadian National Railways, and should the test prove the contentions of the engineers who have developed the idea it is probable that the system will come into use on a large scale, particularly during the winter months.  
The complete equipment of this first class coach in use on the Ottawa run is a development of the air-conditioning practice in use on the Canadian National Railways. For summer, there has been incorporated a water spray, and the air driven through this spray is freed of all impurities. In winter months when the cooled water spray is not required and it becomes necessary to furnish warmed air, the recirculated air in the coach passes through a grille which protects a battery of ultra-violet ray sterilizers the emanations from which purify the air, clear it of germs and provide clean spray to be distributed throughout the interior of the car. Whether cool air is desired in summer or warm air in winter, the functions of the conditioning and sterilizing mechanism is thermostatically controlled.

### SHE WAS A VICTIM OF HEADACHES

#### Kruschen Got at the Cause

This woman's headaches were of the gripping kind that reduce the sufferer to something like helplessness. She tried tablets. She tried pills. All without avail. Only Kruschen could help her.  
"I used to get very bad headaches," she writes. "No tablets or pills of any kind could relieve them. One morning, casually, I tried Kruschen Salts in a glass of hot water. I continued taking it, but I have not had one of those awful headaches since. Kruschen suits me better than anything else. I find it very good."  
Headaches can nearly always be traced to sluggishness of the kidneys, liver and intestines, and to the unsuspected retention in the system of stagnating waste material which poisons the blood. The numerous salts in Kruschen stimulate the internal organs to healthy, regular action so that no clogging waste is allowed to collect. Your inside is kept clean and serene. And that is just how Kruschen Salts brings quick and lasting relief from headaches.

### C.N.R. TIME TABLE

(Standard Time)

Going East	
Passenger	7:00 a.m.
Passenger and Mail	10:00 a.m.
Passenger and Mail	6:40 p.m.
Passenger for Toronto	9:41 p.m.
Passenger, Sundays only	8:31 p.m.
Going West	
Passenger and Mail	8:34 a.m.
Passenger	3:35 p.m.
Passenger and Mail	6:52 p.m.
Passenger, Sunday	11:19 p.m.
Saturdays only, leaving Toronto at 11:20 p.m., arriving at Georgetown 12:25 a.m.—First trip November 5th.	
Going North

### NOTICE TO CREDITORS

In the matter of the Estate of WILLIAM BARBER, Deceased.  
NOTICE is hereby given pursuant to Section 51 of The Trustee Act that all creditors and others having claims or demands against the estate of the late William Barber, who died at Toronto on or about the 19th day of June, 1938, are required on or before the 31st day of October, 1938, to send by post prepaid, or deliver, to George Wallace and Mildred A. Mackenzie, Executors of the estate of William Barber, 424 Glencairn Avenue, Toronto, their full names, addresses, and full particulars of their claims, a statement of their accounts, and the nature of the securities (if any) held by them.

AND TAKE NOTICE that after such last mentioned date the said Executors will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which they shall then have notice, and that the said Executors will not be liable for the said assets or any part thereof to any person or persons of whose claims notice shall not have been received by them at the time of such distribution.  
Dated the 19th day of September, 1938.  
F. A. BURGESS,  
78 Adelaide St. W., Toronto,  
Solicitor for the said Executors

### NOTICE

#### Distributors of Milk IN GEORGETOWN

THE following regulations are quoted from "Amendments to the Public Health Act as enacted by Chapter 30 of the STATUTES OF ONTARIO, 1938.  
"No person shall sell, offer for sale or deliver in any city or town, or in any other municipality or other area to which by order-in-council made upon recommendation of the Minister this section is made applicable, milk which has not been pasteurized in a pasteurization plant to which the Department has issued a certificate of approval in the prescribed form."  
"Milk shall include whole milk and such products of milk as are supplied, processed, distributed or sold in any form other than butter or cheese."  
"Any person who contravenes any of the provisions of this section shall incur a penalty of not less than \$25.00 and more than \$500.00."  
This act came into effect October 1, 1938, and applies to the Municipality of Georgetown.  
S. V. WILLIAMS,  
Medical Officer of Health,  
Georgetown, Ont.
