THE SOLID FUEL FOR SOLID COMFORT

Large Yields of Wheat and Other Crops Indicated by Final Report

Heavy Yields of Principal Field and Fruit Crops in Ontario—Other Provinces also Show Satisfactory Report.

Below will be found a brief synopsis of final reports received at the Head Office of the Bank of Montreal from its branches under date of Oct. 6th.

General

Outstanding features of the crop year in Canada have been the successful harvesting of large yields of wheat and coarse grains in the Prairie Provinces, heavy yields of all the principal field and fruit crops in Ontario, and moderately good yields of the leading crops in other provinces, with output curtailed in British Columbia by prolonged dry weather and in Quebec and the Maritime Provinces by excessive moisture during the harvesting season. In the Prairie Provinces this year's total wheat crop is estimated to be the largest since 1922. The grain is of high grade and quality and compares favourably with that of 1937. The Dominion Bureau of Statistics estimates the wheat production of the three Prairie Provinces at 334,000,000 bushels, which is 175,000,000 bushels more than last year and compares with a ten-year average of 310,850,000 bushels. The estimated average wheat yield per acre by Province is: Manitoba 15.7 bushels, Saskatchewan 10.4 bushels, Alberta 17.7 bushels. The 1938 wheat acreage in the Prairie Provinces, officially estimated at 24,946,000 acres, is over 300,000 acres in excess of last year. Production of coarse grains is substantially higher than in 1937 and winter feed supplies are sufficient except at a few points in Saskatchewan. Oats are estimated at 247,775,000 bushels and barley at 86,140,000 bushels. Favourable harvest weather has prevailed and, threshing is finished in Manitoba and is practically completed in Alberta and Saskatchewan. Deliveries of wheat by farmers to country elevators from August 1 to September 30 totalled 172,118,000 bushels compared with 86,263,000 bushels during the same period last year.

The apple crop is good.

In British Columbia, yields of fodder crops, grains and vegetables have been lighter than last year, owing to prolonged dry weather, while all fruit crops have been heavy and of good quality. Generally, agricultural returns have been fairly satisfactory.

Province of Ontario

Fall wheat, clover and meadows wintered well. Early spring weather was favourable and seeding was completed about ten days in advance of normal. Growth was rapid and crops maintained their healthy appearance throughout the season. Some damage from rust and wet weather during the harvest season affected the quality of grain and a considerable portion will be used for feed. Estimated yields are—wheat 27 bushels per acre, oats 37, barley 31, as against a ten-year average of 25, 34 and 31 respectively. Pasturage was excellent throughout the season and little supplementary feeding was necessary. A heavy hay crop was stored in good condition. Yields of fodder and huckling corn are estimated to be above average. Canning corn and peas were satisfactory crops with tomatoes in over-production. Late potatoes are of good quality, but the yield is slightly below average. Sugar beets, mangolds and turnips are satisfactory. Late varieties of peaches were damaged by heavy rains and the total yield is estimated at 80 per cent of average, pears 100 per cent, plums 110 per cent, grapes 70 per cent and cherries 130 per cent. Transplanting of tobacco was commenced earlier than usual under favourable conditions. Frost and wind in late May necessitated considerable re-planting. Hail damage during July was limited to relative small areas in Norfolk county. It is estimated that there were approximately 60,000 acres planted in flue tobacco in Southern Ontario which will produce over 60,000,000 pounds as against 54,000,000 pounds in 1937. The quality is satisfactory but slightly below that of last year. It is estimated that the production of burley and black varieties will amount to over ten million pounds from approximately 11,000 acres.

SHE COULD NEITHER WALK NOR SLEEP

Arms and Feet Swollen with Rheumatism

This woman suffered for many years. Pain sapped her strength until she lost hope of recovery. Many remedies were tried, but nothing broke the grip of her crippling rheumatism. At last her husband persuaded her to try Kruschen Salts.

"My arms and feet were swollen with rheumatism," she writes. "I could not walk nor get regular sleep, and nothing did me any lasting good. I was so hopeless of ever getting better, I lost my good nature entirely. Then my husband persuaded me to try Kruschen Salts. After two weeks I began to feel better. I persevered, and in six weeks, I was doing housework. Later, I was able to go for a walk. Now I am free from pain and I feel grand."—(Mrs.) F.W.

Rheumatism is commonly caused by deposits of uric acid crystals, which lodge in the muscles and joints. Kruschen helps to break up these deposits of troubling crystals and to convert them into a harmless solution, which is removed through the natural channel—the kidneys.

Dubious

The teacher had been discussing heaven and the merits thereof. She asked the class to raise their hands if they wanted to go to heaven. All hands but one went up. "Don't you want to go to heaven?" she asked this little girl. "Mamma told me to come right home from school!" was the reply.

TESTED RECIPE

By Frances Lee Barlow

Once upon a time there dwelt in the fashionable Bath watering-place of Bath a lady by the homely name of Sally Lunn—she ought to be the patron saint of all folk who gather together for an afternoon visit and refreshment. For she made a famous little tea cake which bears her name. But we've improved Sally's original recipe. Today we make our Sally Lunns more quickly—and more surely, with the aid of double-acting baking powder and cake flour, to give that feathery lightness so essential to hot breads.

Quick Sally Lunns
 2 cups sifted cake flour; 2 teaspoons double-acting baking powder; 1/4 teaspoon salt; 1/2 cup butter or other shortening; 4 table-spoons sugar; 1 egg, well beaten; 1 cup milk.

Sift flour once, measure, add baking powder and salt, and sift again. Cream shortening, add sugar, and cream together thoroughly. Combine egg and milk. Add flour to creamed butter and sugar, alternately with milk mixture, a small amount at a time, beating after each addition until smooth. Bake in greased muffin pans in hot oven (425° F.) 25 minutes, or until done. Makes 12.

PEDESTRIANS WATCH YOUR STEP

Official statistics of the Department of Highways show that 40 per cent of last year's highway accident victims were pedestrians. There is a grim lesson in these figures which every pedestrian should take to heart, for safety depends upon his carefulness. Pedestrians—that is, the sort who run risks in traffic—are definitely gamblers.

They gamble with their lives every time they amble joyfully off the pavement into the midst of a stream of automobile traffic with an utter disregard of all safety regulations.

They are gamblers when they step from behind parked cars, unwittingly tempting death or serious injury every time they do it. They are gamblers when they select the middle of a city block as a good spot to cross the street, and forget all about the regulations made for their own safety against jaywalking.

And in the face of all these very evident demonstrations of carelessness on the part of pedestrians, the blame for the fatality which occurs is usually placed on the motorist. Very often he is not to blame, for if the pedestrian had used ordinary common sense, he would not have been in the path of the oncoming car, and the accident would not have happened.

Traffic regulations have been carefully prepared, warning lights and other signals are installed at busy intersections more for the safety of the pedestrian than anyone else. Yet they are disregarded by a very large percentage of the pedestrian public, despite the grim fact that more pedestrians are victims of highway traffic accidents than any other single group. The average motorist is careful; the average pedestrian is not.

"Pedestrians, watch your step" is certainly the best of advice. Walk carefully and you are more likely to live to enjoy your walks.

GOVERNMENT EXPENSES

The first move of the Dominion Government toward balancing its budget should be to cut down expenditures. This is the efficient, business-like procedure. It is a procedure that will give impetus to business in the best possible way; that will increase national productivity and in turn earn large revenue from various taxes imposed. It is the first and most important line of attack.

If, after curtailing expenditures, the Government's books still fail to balance, the most obvious source of new revenue would be to broaden the base of the present federal income tax.

At present there are less than a quarter of a million Canadians paying income tax. The actual number in the last year for which figures are available was 217,000.

Yet there are about a million and a half Canadian wage-earners with good incomes who pay no direct tax whatever. By lowering the present exceptions—especially the exemption for single men and women—the Government can readily tap a substantial new source of revenue at relatively small cost of collection and administration.—Financial Post.

The Difference

A motorist who was lost asked a native: "Is this the road to St. Ives?" and received the reply: "9 dunno."

Motorist: "Well, can you tell me which is the road to Cottenham?" "I dunno."

Motorist, exasperated: "Well, you don't seem to know much." "Maybe I don't, but I'm not lost."

MORE MEN TRAVEL IN THE AUTUMN

More men travel in the autumn on "Lady" liners of the Canadian National Steamships to the British West Indies than during the summer months, according to the booking records of the company. Judging by the inquiries made at the booking offices, this information seems to have considerable interest for some of the lady passengers travelling solo or with their lady friends.

Many people can just as easily travel in the spring or fall, rather than in the peak of the summer vacation season, and by so doing their employer would probably give them an extra week with pay for helping out. And then their fare the reduced Round Voyage rates on "Lady" liners during the last three months of the year, so everything considered, the spring or the fall seasons have something real to offer in West Indies travel.

COMPLETION OF NEW HIGHWAY EXPECTED BY 1941 OR 1942

The possibility of the trans-Canada highway being completed by 1941 was foreseen by W. G. Robertson, Toronto, general manager of the Ontario Motor League, in an address before the Essex County Club at Amherstburg last week. Robertson recently returned from a Northern Ontario tour with Hon. T. B. McQueen, Provincial Minister of Highways.

Mr. Robertson said he was greatly impressed by road work being pushed toward completion in Northern Ontario. The roads being built are not leading into "a wilderness," he said.

He noted that the Government had found practical a new low-cost hard surface road, which was being installed in certain parts of the north at a cost of \$2,000 and \$3,000 a mile. One of the great difficulties in the past, stumps and big logs, was now being removed by highway. When swampy quick-sand had been blasted, he added.

Sweet Potatoes 5 POUNDS 13c
 Delicious baked, fried or boiled. Nice size.

ONIONS 10 POUNDS 14c
 Nice size. Sound and dry.

Grapes TOKAY GRAPES 17c
 2 POUNDS. Delicious sweet. Large berries.

6 Marsh Seedless 23c
 Medium large.

BANANAS 3 POUNDS 21c
 Golden yellow. Sound and ripe.

TURNIPS Waxed 2c lb.
 Table quality.

Cranberries, Oranges, Apples, Etc.
