IMPORTANT ADDRESS TO LIONS

On Thursday evening last, the Georgetown Lions Club met in the McMillan Hotel, the evening having been changed to accommodate the special speaker, Dr. Thompson, field secretary of the Canadian Dental Hygiene Council, who was in town for two days, at the invitation of the Lions, and with the co-operation of the public and high school boards and the local dentists.

Chief Harold McClure was in the chair. The National Anthem was sung and Grace said, after which an excellent dinner was served.

A voluminous correspondence was read.

Lion Ed. McWhirter reported for Lion J. D. Kelley that the Safety Patrol would be in operation in a few days, and that the children are required to cross Guelph street from the public school only at one point, that is, the crossing opposite the town hall.

Lion Dr. Jackson reported that the Juvenile hockey schedule was now in operation.

There were a number of guests present, including the local clergy and the dentists of Georgetown. Chief McClure offered them a very cordial welcome.

The Chief also announced that the drawing for the car would take place June 3rd, and tickets were now being sold.

Dr. Thompson was then asked to introduce the speaker of the evening, Dr. Thompson, which he did, paying tribute to the excellence of the work being done by the organization represented and especially by Dr. Thompson.

Dr. Thompson opened his remarks by saying that his duties took him from coast to coast, and that he addressed an average of about three service clubs a week. He offered strong commendation of their work, especially the Lions, saying it would be interesting to know the amount of money spent by this type of organization in a year on child welfare—that the amount would undoubtedly be staggering.

He said that today more attention than ever before is being given to public health. His organization is subsidized by the federal government, having been organized in 1925 by the Dominion Department of Health. The federal grant proving insufficient, a generous contribution is made each year by the Canadian Life Insurance Officers' Association.

The change in outlook regarding dental health has come about by education. Smallpox, typhoid, diphtheria have been conquered and almost eliminated. Tuberculosis is curable. All due to the education of the public, which means co-operation in the fight against disease, instead of apathy or opposition.

As to the teeth: are we concerned with an aching tooth, or the necessity for a denture? No. Those conditions which should not have occurred. But to save the teeth early, and to prevent conditions which may lead to other diseases, is the work of the Association.

We cannot tell the cause of dental decay as yet, but may ere long, as research is in progress.

A diseased tooth is one in which decay has progressed till the nerve is exposed. There is a tiny hole at the jaw-end of every tooth, at which point the artery, vein and nerve pass into the tooth's centre. If the nerve is exposed, the artery stands wide open. Every mouth contains bacteria, which can thus get into the blood-stream. Inflammation causes swelling, which owing to the confinement in the tooth itself, can only take place at that lower point where artery, vein and nerve enter. This cuts off the blood supply, and the nerve dies. Suppuration starts, and an abscess forms. The circulation can take care of part of the discharged poison, but, if there is too much, it is carried to the other parts of the body, causing arthritis, neuritis, nephritis, heart lesions, etc.

Pyorrhea is a disease of the tissue round the teeth, possibly caused by unequal pressure when the teeth come together.

At one time or another ninety-seven per cent of the Anglo-Saxon race have diseased teeth. Food has a very definite bearing on tooth-health. Eighty-four per cent of baby-teeth have the enamel crown imperfectly formed, which means that the mother has not used a balanced diet, during gestation, as the baby-teeth begin to form six months before birth. The important time to form good teeth for the child is during the mother's pregnancy. It will, no doubt, take years to bring about the necessary change, but the thing to note emphatically is that, for healthy teeth, everyone's diet should have mineral elements. Vegetables and fruit, cooked and raw, whole wheat bread, butter, cheese, cream, meat, are essential. Use as little water as possible in boiling vegetables, so that the mineral content, loosely held, may not be thrown away with the water.

The child's food for the first seven years, while permanent teeth are forming, is very important. Also during the period from eleven to nineteen, four times as much calcium as normally is required—the lack of this is the reason why there is so much decay before the age of twenty-two.

Remember that the temperature of the mouth is 98.4 degrees, and the mouth is wet and dark. How rapidly then must food decay. The harmful elements are the carbohydrates or sugars. These sugars, between the teeth, lead to decay and abscesses.

Every boy wants to be a famous hockey player. It is believed that there is no A-hockey player with an abscessed tooth.

Give the children a chance. The only way to prevent dental decay is to get cavities when they are small.

Dental education may take a long time, but is tremendously important. May we say of our sons, "This is a boy. This is the best boy."

After the Club's hearty thanks had been extended to Dr. Thompson, The Maple Leaf was sung, and the meeting adjourned.

14 Fraud Charges Pile Up Against Former Circus Man

TRIAL AT MILTON

"I was working in a circus but when my home broke up I just tore around the country," explained Dawson C. Tufgar, 31, of Hamilton, who pleaded guilty in police court last week to 14 charges of fraud. He was remanded a week for sentence.

In each case, accused admitted that by issuing worthless cheques he obtained a car or other goods. "I don't think I was once sober. I was drinking right through these transactions," he told the court.

Tufgar was arrested in Campbellville by Provincial Constables George Cookman and A. J. Oliver of Milton on Dec. 15th. He has been in custody in Milton since his arrest, and during this time, charges have piled up against him to the present number of 14. Accused is wanted for various charges of false pretences, impersonation and fraud in Toronto, Hamilton, St. Catharines, Belleville, Welland county, Guelph, Georgetown and other centres, according to provincial police.

Provincial Constable Oliver told the court that Tufgar was of German extraction and that his real name was "Tauffkarch." He said the man, when arrested, was driving one of three sedans he allegedly obtained by

fraud in St. Catharines. Constable Oliver stated that on Nov. 20 Tufgar purchased a car from Louis Laird of Georgetown, giving the owner in exchange a worthless cheque on a bank in Orangeville. The next day, continued the officer, accused took the car to a wrecker in Port Credit, representing himself as Laird. In this way he got a cheque from the wrecker for \$10, and cashed it at a store in the town, the officer said. When the car was traced it was in pieces, which were distributed about the wrecker's yard. "So, Laird loses the car or \$30," Constable Oliver concluded, adding that while in Georgetown, Tufgar purchased gasoline for the misappropriated car, from J. N. O'Neill by giving the latter a worthless cheque for \$2.95.

In reading a record against accused, Crown Attorney W. I. Dick revealed that in 1934 he served three months in the Ontario Reformatory, when 12 charges of false pretences had been lodged against him in Hamilton. In 1935 he was given a sentence of six months definite and eight months indefinite, when convicted on two charges of false pretences, while in 1936 Tufgar went to Burwash for six months definite and six indefinite on two charges of false pretences. Last summer, accused obtained board by fraud, in Guelph, and was given 60 days in that city.

30 YEARS MAGISTRATE IN HALTON COUNTY

Oakville Man, J. H. Shields, Dies Last Week

One of the best known residents of Oakville and Halton County died at his home on Tuesday of last week, the person of Jonathan H. Shields.

Born in 1848 on a farm near Lowville in Halton, Mr. Shields was in his 91st year. For many years he carried on the farm and some 40 years ago he retired and came to live in Oakville. About 30 years ago he was appointed justice of the peace and shortly afterwards was made magistrate. For over 20 years, he sat on the magistrates' bench in Oakville court, retiring in 1928. He was a life-long Conservative and even in his later years he was an enthusiastic observer of the party and its welfare. Failing health of the past few months kept him away from his church, but he was always a regular attendant at St. John's United Church.

Surviving Mr. Shields are five daughters, Mrs. C. W. VanNorman of Roland, Manitoba; Mrs. E. M. Sinclair, Toronto; Mrs. C. E. McConn, Grand View, Manitoba; Mrs. R. A. McIntosh, Guelph, and Miss J. M. Shields, at home.
