HIGH SCHOOL INSPECTOR'S REPORT

We take the following extracts from the report of High School Inspector A. J. Husband on his visit on April 17th and 18th, 1939:—

The interior of the building is in fair condition and is being kept neat and clean by the janitor. The following improvements in the accommodations are desirable: (1) The classrooms occupied by Forms V, IV and IA are in need of redecoration; the condition of the first is worse than that of the others. (2) Lockers on cupboards for holding the lunch boxes and the running shoes of the pupils would be appreciated. (3) The step at the boys' entrance should be rebuilt. (4) Wire mats should be placed outside the doors at the entrances to the school and fibre mats should be used inside the entrance doors. This would lessen the amount of dirt carried in on the pupils' shoes and less oil would be required on the floors.

Satisfactory additions have been made to the library and to the equipment for teaching science. I hope that it will be possible to make reasonably generous additions to the library each year. Some new books for supplementary reading help to maintain the interest of the pupils in the library. New books of reference will also be needed, if the pupils are to have accurate information regarding some of the subjects of the new course of study. The teachers are giving the pupils helpful guidance in their reading. The entire equipment should be revalued and reallocated. A new catalogue of equipment will be supplied by the Department.

Ratio of pupils to teachers: 148:6; 24:1.

Division of duties among teachers:

Satisfactory provision for teaching courses: The organization prepared by the Principal makes suitable provision for teaching the subjects of Grades IX and X with the exception of shop work and home economics. Provision is made for teaching the usual subjects of the senior grades, including the limit of work of no fewer than fifteen papers of the Upper School. I was pleased to find that music is taught in the Middle School as well as in the Lower School. The day is divided into ten periods for teaching. Staff: legally qualified; discipline: good; attendance: 148, 66 boys, 82 girls, all regularly admitted; textbooks: all authorized; registers: neatly kept; catalogue of equipment: entered to date; English literature: choice has been made; supplementary reading: the usual plan is followed — the reading is tested; sight translation in foreign languages: provision is made for this work; additions to classroom decorations: none; fire-drill: practiced once a month; work of janitor: the janitor is giving good service.

The teaching that I observed in all the departments of study was satisfactory and much of it was good. The teachers are to be commended for their interest in progressive methods as well as for their practice of making careful preparation for the work of each day. Miss Fatt is developing into an efficient teacher. As I had opportunity, I discussed methods with individual teachers and also at a meeting of the staff.

The reading, writing and spelling of the pupils in Grade IX are, with a few exceptions, quite good. The pupils should continue to make progress in these studies as regular instruction is given in them. Satisfactory work is being done in business practice and writing. Much practice is being done in writing. The pupils are interested in the new course in art and they have done some good work along creative lines. The records of practical work in science are neatly written and well illustrated. Generally satisfactory work is being done in Physical Education although very meagre accommodations are provided for teaching this subject.

I was pleased to find that provision has been made for teaching music to the pupils of the first four grades. Mr. Sullivan has made a satisfactory beginning and appears to have won the co-operation of the pupils.

This school continues to meet in a very satisfactory way, the needs of Georgetown and the vicinity with respect to secondary education. It is well organized and managed and it has a staff of teachers who are working in close co-operation and seeking to promote the welfare of the pupils entrusted to their care.

It gives me pleasure to speak very favourably of the general bearing of the pupils. I found them courteous and, as a rule, interested in the work of their classes. It is regrettable that the somewhat limited accommodations of the present building do not permit the pupils to enjoy all the usual activities of secondary school life.

The present enrollment is slightly higher than that of a year ago. Of the 148 pupils enrolled, 52 are in Grade IX, 41 in Grade X, 27 in Form III, 11 in Form IV and 14 in Form V. As the pupils of Grade IX are divided into two classes, the work of this grade can be carried out very satisfactorily. In the first year, it is very desirable to have reasonably small classes so that every pupil can get the individual help that is often necessary when pupils are beginning new studies in a new school environment. The Principal has wisely divided Grade X into two sections for experimental work in science. As noted elsewhere in this report, the organization makes provision for teaching a large number of Upper School subjects.

The work of the classes is quite well advanced, and the courses of study in most subjects should be completed in time to permit the pupils to review the work under the guidance of their teachers.

During my visit to the school I had the pleasure of meeting Mr. Ross who gave many years of valuable service to this community as Principal of the High School.

—Dogs in London will all be tied up during the Royal visit. But presumably a cat can still look at the Queen.

WILL CELEBRATE ARRIVAL OF MISSIONARY AT NORWAY HOUSE

The centenary of the arrival at Norway House of Rev. James Evans, first Wesleyan missionary to the Indians in Western Canada, will be celebrated by The United Church of Canada in 1940. It was announced by officials of the Board of Home Missions of The United Church who are charged with the responsibility for the marking of the anniversary.

Rev. Mr. Evans went to Western Canada in 1840 and became famous not only as the inventor of the Cree syllable, now used throughout Northern Canada, but as the originator of a home-made method of printing the language.

First he whittled type-faces on wood blocks and later cast type in handmade moulds from bullet lead and the lead from tea-caddies. He made ink from soot and fish oil, and did his printing with a Hudson Bay Company fur press, using birch bark for paper and moosehide for binding his first book.

On the suggestion of the Home Mission Committee of the Manitoba Conference, the General Council of The United Church of Canada instructed that a special committee be set up, representing the whole church, to organize an adequate celebration of Evans' life in the interest of Canadian missions.

Dr. J. A. Cormie is chairman of the committee. Members are Major G. H. Atkins, Judge F. A. E. Hamilton, Mrs. William Robinson, Miss McTannis Semmens, Rev. J. W. Woodside, Rev. Gordon A. Saseo, Rev. Hiram Hull, Rev. James Endicott, Rev. J. R. Mutchmor, Rev. George Dorey, Rev. R. B. Cochran, Rev. A. W. Kenner, Rev. John A. Doyle, Rev. E. G. D. Freeman, Rev. F. G. Stevens, Rev. E. M. Baird.

Representatives of a number of leading United Churches will be invited to Norway House to participate in a celebration. Other plans include a Winnipeg gathering and special services in many other parts of Canada. In 1932 a cairn was erected in front of the church at Norway House, which is to be named the James Evans Memorial Church. A permanent memorial is now being discussed.

BALLINAFAD

Mrs. B. Vannatter and Rev. N. Wadcell were week end visitors with Mr. Leslie Wadcell in Hamilton.

Mr. and Mrs. Wm. Kirk of Barrie were Sunday visitors with Mr. John McKechnie.

We are sorry to report that Miss Beattie Cole has been quite ill for the past few weeks. We hope she will soon be recovered.

Two maple trees were planted in front of the United Church last week to mark the visit of the King and Queen to Canada.

Mr. and Mrs. C. McEnery and Ernie visited Sunday with friends in Woodbridge.

Rev. A. O. W. Foreman and Mrs. Foreman were in Toronto on Monday to view the Royal procession. Sherlock Foreman left Wednesday for Toronto where he has accepted a position with the Hydro Electric Co.

THE PROS AND CONS OF THE PROPOSED SEWAGE SYSTEM
(Continued from Page 1)

man for upkeep and is above all very costly to install. The initial estimate being at least \$127,000 and who is to guarantee that we may not have to finish it.

Is it not worthwhile to consider this suggestion of a less costly, but quite effective means of meeting the recognized need of a better system of hygiene in our town.

Yours truly,
A. G. M. Bruyns.

To the Editor of the Herald.

In reply to the article in your paper regarding sewerage system for Georgetown, I am sure all the citizens concerned wish we already had one.

Judging from the cost of similar systems in other towns and our town being spread over a large area, I believe \$127,000 would be quite insufficient for a complete installation covering all of Georgetown. As I understand it, this figure covers merely the initial installation and would serve only a small portion of the homes.

As our taxpayers are burdened with heavy taxes and this year with the additional cost of paving the much needed connecting roads, which I understand have been sanctioned, and this fall the question of the addition to the High School has to be voted upon—and should be passed as otherwise we will be faced with more expense for transportation and education of our children to other towns as compelled by law, than the cost of addition; and considering other necessities we must have I feel the heavy expenditure is more than our town could stand at the present time.

In regard to the sewerage system being necessary for the prevention of disease in our town, may I point out that while so many of our nearby towns and cities have had more or less continued contagious diseases, this winter, you have only to look at the record as printed in your paper each month to note that Georgetown has been practically free of any such diseases. We could help to keep it so at a very small cost to the town by having a semi-weekly garbage collection from May 1st to November 1st, and once a week from November 1st to May 1st, this giving even the poorest person in our town the same chance to dispose of his garbage.

Living in a district of the town which would, no doubt, benefit from the initial installation of the sewerage system, I still feel this is too much of a burden for our taxpayers at the present time.

Thanking you for space in your paper.
Yours for economy and health,
A. M. Nielsen.

"I'm a changed being, Jane Seymour"

A Year ago this woman came to my Salon and said: "I've never done anything for my skin, but your advertisements have made me feel I'd like to try. Will you tell me exactly what I should use?" "Certainly," I said. "You've a good skin, but it's dry. You need Cleansing Cream and Juniper Skin Tonic every night, and Orange Skin Food to supple those tissues. In the morning, more Juniper, and then a day-long finish with Petal Cream, Dry Skin Powder, Paste Rouge and Lipstick." I met her at a party recently, looking, as she said "a changed being." "Since I've looked after my skin regularly, I've felt younger," she said.
