THE FARMER

ONTARIO POTATOES OF BETTER QUALITY

Show great improvement over last year, states J. T. Cassin, Potato Expert, Ontario Dept. of Agriculture.

"The quality of the Ontario potato crop is much better than last year. Better seed has been used in all potato growing districts of the province, and growing conditions have been more favorable, particularly in the last two weeks," states J. T. Cassin, potato expert of the Ontario Dept. of Agriculture, who has just completed an extensive tour of provincial potato fields.

During June and July the moisture supply was not sufficient to produce a heavy crop of early potatoes. The crop was completely cleaned up, and there was a strong demand all over the province for new potatoes. This resulted in steady prices and there was no glut or surplus.

Mr. Cassin believes the intermediate crop, now in the process of digging, will have a steady demand until late potatoes are available. There has been no change in acreage from last year, he states.

"A number of growers and farmers were careless last year. They didn't plant certified seed and they didn't spray as they should. The result, of course, resulted in poor and diseased crops. However, it taught them a lesson and this year," said Mr. Cassin, "they planted certified seed and as a result there is little disease."

He warned that there is a danger of late blight and advises that plants should be well-covered with Bordeaux mixture, especially in wet, rainy periods.

EARS EXPORT CATTLE NOT TO BE PIERCED

Canadian cattle for export to Great Britain with their right ears pierced or in any way mutilated are not eligible for the subsidy payment on cattle which have been held on feed for the required period. This subsidy ranges from about 30 to 40 shillings per head. Exporters should, therefore, call out steers that show marks of any kind on the right ear, as examiners are particularly strict in this respect and will not pass any animal that has any mark or deformity on the right ear.

The British regulations provide that imported cattle will not be eligible for the subsidy in all cases where the right ear has any punch hole of any shape in any position on the ear, half an inch or more across, and in the case of an animal which has any notch, snip or cut out of the edge of the ear, half an inch or more into the ear. It is quite clear that anything other than the insertion of a tag is inadvisable. The clinch in this respect may be made or less general use for identification purposes, seems to give reasonably good satisfaction and is rarely torn out or lost.

In order to qualify for the subsidy, animals must have been on feed for 90 days, otherwise they are not eligible for the subsidy. Hence the large number of unmutilated right ears. The subsidy is apportioned as follows: for quality import cattle five shilling per 112-pound cwt.; and ordinary import two shillings per 112-pound cwt.

NEW ACT ON JANUARY 1

The Pest Control Products Act which was passed at the last session of the Dominion Parliament, together with regulations made under its provisions, will become fully effective on January 1, 1940. This Act is designed to bring about an improvement in the products sold for controlling pests affecting agriculture, industry and household use.

The new regulations contain many new features. Perhaps the most outstanding of all is the provision for guarantees of biological effectiveness as apart from chemical analyses. Any claim made by the manufacturer or vendor, in respect of the utility of the product is construed as a part of the guarantee, and in cases where the product does not lend itself to reasonable chemical analysis, the guarantee will be confined to the simple statement "satisfactory biological effectiveness for the purpose claimed when the product is used according to directions." The guarantees in this respect are to be checked periodically by biological tests conducted by the scientists of the Department.

THE WEED OF THE WEEK

TOAD FLAX

Toad flax, sometimes known as Wild Snapdragon and "Butter and Eggs" is another Ontario weed that should be eradicated at this time of the year, says John D. MacLeod, Crops, Seeds and Weeds Branch, Ontario Dept. of Agriculture, Toronto.

Toad flax is a deeply rooted, persistent perennial with erect wiry stems. The leaves are stalkless, linear, without teeth or divisions. The flowers are sprout one inch long, pale yellow, in erect, dense clusters.

The weed propagates by seeds and rootstocks and is general throughout the province, especially on light, shallow soils, meadows, pastures, roadsides and occasionally in grain fields. It sprouts rapidly and complete eradication is imperative.

Badly infested pastures and meadows should be broken up and a short rotation with deep, thorough cultivation followed by a hoed crop, another crop or grain crop. Do not reseed until the weeds are eradicated. If proper cultivation is followed, it should be possible to kill this weed without the loss of a crop.

Chemical spraying is recommended where cultivation is impossible. See your district weed inspector or write to the Crops, Seeds and Weeds Branch, Ont. Dept. of Agriculture for further information.

GAIN MORE KNOWLEDGE ABOUT PLOUGHING

Experiments conducted by the Field Husbandry Division, Dominion Experimental Farms, have shown that shallow ploughing produces as high yields as deep ploughing at a considerable saving in power requirements. Furthermore, tillage beyond that required for weed control and reasonably good seed bed preparation has no beneficial effect on yields.

In many districts of the Prairie Provinces, ploughing for summer-fallow has been largely dispensed with in favour of the "ploughless fallow" by surface cultivation. In Eastern Canada, ploughing sod land in the summer with after-harvest cultivation where weeds are troublesome, and ploughing in late fall on less weedy land, have both proved superior to spring ploughing, especially on heavy soils. One advantage of summer or fall ploughing is that it facilitates the early seeding of cereal crops which experiments have clearly shown to be very desirable.

PEPPY'S IDEAS ON CABINS

The difference between modern outlook and the ideas of the seventeenth century is demonstrated in some notes on Peppy's ideas of cabins on board ship in the August issue of the Port of London Authority Monthly Magazine issued in London, England.

"The importance attached to cabins nowadays contrasts curiously with the attitude which prevailed when Mr. Peppy worked for the Admiralty. At that time cabins on board ship were not only considered a nuisance and a waste of space, but definitely undesirable. Peppy's attributes all the faults of the officers and slowness of naval ships to cabins.

"It was said that the unlimited number of cabins built in the King's ships were costly, gave rise to the pickering of the ship, contracting of sickness, and to officers neglecting their duties and mispending their time in drinking and debauchery, the danger of fire, and disputes between officers regarding the disposal of cabins."

What a different view is taken regarding passenger accommodation on a modern liner! Modern liners now supply comfortable cabins to suit the requirements of all passengers, whether it be third or first class. Palatial ships at moderate rates are to be had for the taking.

The spacious outside staterooms, modern ventilation throughout, large comfortable rooms and adequate deck space for promenade and deck sports are pleasing features of the "Lady" liners of the Canadian National Steamships in regular and frequent service between Canada, the United States and the British West Indies.

INTERESTING THE PUBLIC IN HEALTH

The world's fair, the national exhibition, the county fair—all are media through which public education is carried on. In Canada, one of the best means adopted by the Health League of Canada to interest the public in health is to present an annual display at the Canadian National Exhibition in Toronto.

This year, through the generous co-operation of the Exhibition authorities, a more attractive display than ever before has been made possible for Canada's health education agency.

The exhibition has been designed to impress upon visitors various phases of health work. One large section is devoted for the pasteurization of milk. Another section is devoted to the various activities of the Health League, attention being drawn to a spectacular manner to such topics as diabetes and its prevention by insulin, venereal diseases and their control, artificial respiration and periodic health examinations to reduce the toll of cancer, heart diseases and other causes of death.

An important point stressed by the Health League exhibit is the enormous cost of illness in Canada, half of which is preventable.

The Motion Not the Ocean

The two land lubbers were in a rowboat in the middle of the ocean. One handed the oars, rowing away for all he was worth. The second sat in the stern steering the rowboat by means of makeshift rudder.

Suddenly a passenger liner came into view. The man at the oars kept rowing frantically, pausing only when the liner crossed the path of the rowboat. Then he cupped his hands.

"Hey there, on board!" he shouted, "Go this way or the other, Pastry!"

A sailor aboard the big vessel gazed down at the rowboat.

"This is the Pacific," he shouted back.

"The rudder-man waved his fist at the oarsman. "You hear that, you dope!" he howled. "I told you not to row so fast!"

"Now, who has behaved best this week?" asked father, "and done all that mommy said?" "You, Dad," replied the angel child.

Customer—"If this is an all-wool jersey, why is it marked 'cotton'?" Shopkeeper—"That's to deceive the moths, sir."

Fixing Up THE FARM

"I see you're doing a lot of work, Henry, on the old homestead and about the farm. Did you come into a legacy?"

"No sir, I got a Home Improvement Loan from the Bank of Montreal. A simple matter—no fuss or bother. The rates are low, and I'm paying it back by instalments."

Home Improvement Loans... obtainable at \$3.25 per \$100 repayable in twelve monthly instalments. For borrowers with seasonal incomes repayment may be made in other convenient periodic instalments. Ask for our folder.

AUCTION SALE

Accredited Jersey Herd

The undersigned has received instructions from

FRANK McCULLOCH
to sell by public auction at Lot 13, Concession 10, just below Erin Village, **TUESDAY, SEPTEMBER 12th**

COWS

No. 1 Cow—Erin Scottie Girl 80013, tattoo BBB-1K, dropped Feb. 28th, 1932, freshened 30th Sept.

No. 2 Cow—Erin Lily 80509, tattoo BBB-5L, dropped Dec. 16th, 1933, freshened Nov. 17th, 1939.

No. 3 Cow—Erin Marie Dolly 80505, tattoo BBB-4L, dropped Nov. 15th, 1933, freshened Sept. 26th, 1939.

No. 4 Cow—Erin Belle 80510, tattoo BBB-1M, dropped Jan. 26th, 1934, calf at side.

No. 5 Cow—Erin Darling Lady 80512, tattoo BBB-3M, dropped May 21st, 1934, calf at side.

No. 6 Cow—Erin Darling Lassie 102138, tattoo BBB-2N, dropped Mar. 16th, 1935, calf at side.

No. 7 Cow—Erin Sultana Sweetheart 101733, tattoo BBB-3N, dropped Mar. 24th, 1935, freshened April 22nd, 1940.

No. 8 Cow—Erin Sweet Bride 101734, tattoo BBB-5N, dropped Oct. 1st, 1935, calf at side.

No. 9—Golden Marie 46465, tattoo BBB-222, dropped April 26th, 1928, bred May 16th, in full flow of milk.

No. 10—Wink Auler 51693, dropped Sept. 14th, 1928, freshened Sept. 30th, 1939.

No. 11 Cow—Gren Bride Vixen 51694, dropped Oct. 1st, 1928, freshened 23rd Aug.

No. 12—1 Grade Jersey, fresh.

No. 13—1 Grade Jersey, bred June 30th.

No. 14—1 Grade Jersey, bred May 19, HEIFERS

No. 15—Erin Sweet June — Reg. pending, tattoo BBB-4P, dropped June 1st, 1936, freshened Sept. 15th, 1939.

No. 16—Erin Clara Conscript 101736, tattoo BBB-5P, dropped Sept. 26th, 1936, freshened Sept. 13th, 1939.

No. 17—Erin Dolly Annesl 101738, tattoo BBB-7P, dropped Sept. 10th, 1936, freshened Sept. 7th, 1939.

No. 18—Erin Sultan Lilly—reg. pending, tattoo BBB-3R, dropped Mar. 12, 1937, freshened Sept. 23rd, 1939.

No. 19—Erin Silver Green Bride — Reg. pending, tattoo BBB-5R, dropped Aug. 22nd, 1937, open.

No. 20—Erin Wonderful Fern—Reg. pending, tattoo BBB-7R, dropped Aug. 24th, 1937, open.

No. 21—Erin Belle Sultan — Reg. pending, tattoo BBB-11R, dropped Oct. 19th, 1937, open.

CALVES

No. 22—Erin Sunbeam Wonder—Reg. pending, tattoo BBB-1S, dropped Jan. 9th, 1938.

No. 23—Erin Margreta Sultan—Reg. pending, tattoo BBB-4S, dropped Feb. 9th, 1939.

No. 24 — Erin Rosedale Pet, tattoo BBB-6S, dropped Aug. 29th, 1938.

No. 25—Erin Vallant Bride, tattoo BBB-10S, dropped Sept. 15th, 1938.

No. 26—Erin Silver Slipper, tattoo BBB-15S, dropped Sept. 17th, 1938.

No. 27—Erin Sunball Crop, tattoo BBB-5T, dropped Feb. 23rd, 1939.

No. 28—Erin Beauty Queen, tattoo BBB-3T, dropped Mar. 6th, 1939.

No. 29—Erin Taxpayer Rose, tattoo BBB-4T, dropped Aug. 5th, 1939.

No. 30—Erin Cutie, tattoo BBB-5T, Aug. 13th, 1939.

No. 31—Bull—Silver Creek Vallant Sultan 7904, tattoo BBR-25M, dropped Nov. 24th, 1934, bred by Silver Creek Farms Ltd., Caledon, Ont. This bull is a son of Vallant of Oaklands ARI14 Class AA.

No. 32—Bull—Shamrock Volunteer

Treasurer's Sale of Land for Taxes

TOWN OF GEORGETOWN COUNTY OF HALTON

TO WIT:

By virtue of a warrant issued by the Mayor of the Town of Georgetown bearing date of the 15th day of June, sale of lands in arrears of taxes in the Town of Georgetown, will be held at my office at the hour of 10 o'clock in the forenoon on the 8th day of November, 1939, unless the taxes and costs are sooner paid. Notice is hereby given that the list of lands for sale for arrears of taxes is being published in The Ontario Gazette on the 5th day of August, 1939, on the 2nd day of September, 1939, and on the 7th day of October, 1939, and that copies of the list may be had at my office.

NOTICE is further given that in the event of all lands not being sold on November 8th, 1939, the sale will be adjourned to the 16th day of November, 1939, at the same hour, on which day the Municipality intends to purchase any lands for which the total amount of taxes and costs is not ordered.

Treasurer's Office this 4th day of July, 1939.

P. B. HARRISON,
Treasurer.
