Canada to Supply Army with Universal Carriers

UNIVERSAL machine gun carriers will soon be added to the list of army vehicles made in Canada for the fighting forces at home and overseas. These are equipped with caterpillar treads and are very manoeuvrable and speedy. They are armoured against small arms fire and will carry three Bren guns, or can be used to carry ammunition, wireless sets and other necessary equipment. They will be produced in the Windsor plant of Ford Motor Company of Canada, Limited, which has been selected as the most suitable for the production of this vehicle. In the lower photograph, Mr. Wallace R. Campbell, president of the Canadian Ford organization, is shown with Lieut.-Col. D. C. Warnica, officer commanding the Essex Tank Battalion, Windsor, inspecting one of the Universal carriers. Other army vehicles now made in the Ford plant in

Windsor include the powerful four-wheel drive gun tractor pictured above. These and other types of military vehicles are rolling off the assembly line of the Canadian Ford plant which is supplying nearly 10,000 units to the Canadian army and another 25,000 units for military purposes to other Empire governments. The plant is now being expanded by a \$700,000 addition to provide facilities for building Universal carriers and to increase production of other types of military vehicles.
