AGRICULTURE IN WAR

It may be remembered that while agriculture is a vital arm in war, the full impact of the demand for farm products is not felt until accumulated stocks disappear and production areas are restricted. Agriculture may be regarded therefore as something of a reserve force, the power of which is not felt in the early stages, and the needs for which and the nature of which can only be accurately determined in the light of developments.

Dr. G. S. H. Barton, Deputy Minister, Dominion Department of Agriculture.

WHEAT SITUATION

The situation in regard to wheat is particularly difficult at the present time, states the Economic Annalist, published by the Division of Economics, Dominion Department of Agriculture. The carryover in Canada on July 31, 1940, will be close to 250 million bushels and the early estimate of the new crop indicates that from 250 to 400 million bushels will be harvested during 1940. After allowing for milling, seed and food supplies on hand will be adequate to meet the normal demands of the United Kingdom for three years. At present no other market of any consequence exists.

U.F.O. and U.F.W.O. Meet at H. Downey's Tenth Anniversary Party for Mr. and Mrs. Clarence Anderson

Here we are again. The recent rains have greatly retarded threshing operations in this vicinity.

We understand that Mr. Norris of Limehouse is operating the Roger quarry on the 5th Line this summer.

Mr. F. H. Lyons reports doing a rushing trade in threshing at present.

SUCCESS TO YOU, Fred.
Terra Gotta U.F.O. and U.F.W.O. held a very successful meeting on Monday at the home of Mr. and Mrs. H. Downey. Owing to the absence of the president and secretary, Miss Norma Hunter occupied the chair for the ladies meeting; while Miss Margaret Macdonald acted as secretary. The meeting opened with the singing of the Maple Leaf, after which the Lord's prayer was repeated in unison. The members responded to the roll call by naming a variety of apples. Mrs. Clarence Anderson gave a splendid paper on the motion, "Take the best of whatever you have." Miss Margaret Macdonald very skilfully demonstrated the making of fancy cookies and also passed them around to be sampled. Mr. T. L. Lealie presided over the joint meeting, which was opened with a guitar selection by John Fall of Astoria, a former resident of this community. During the evening Mr. Fall played several selections which were

INCREASED PRODUCTION OF MAPLE PRODUCTS

Though the season in 1940, as in 1939, was short and late, the output of maple products in Canada in the spring of 1940 was 30 per cent greater than in 1939 and the quality was higher. On the basis of ten pounds of maple sugar being equal to one gallon of maple syrup, the total production this year of maple sugar and maple syrup is estimated at 3,099,000 gallons, as compared with 2,392,200 gallons in 1939 and with the five-year average (1934-38) of 2,814,400 gallons. This year's yield represents an increase of 506,800 gallons, or 20 per cent as compared with 1939, and is also 18 per cent higher than the five-year average. The farm production of maple syrup amounted to only 11 per cent of the total crop, the same percentage as in 1939. The total production of maple syrup was 2,755,200 gallons and the farm make of maple sugar amounted to 2,427,500 pounds. These estimates show increases of 493,000 gallons of syrup and 537,400 pounds of sugar as compared with a production of 2,262,200 gallons of syrup and 2,900,200 pounds of sugar in 1939.

Record Production Hogs in Canada

The report on the June survey of the stock-raising with the number of hogs on Canadian farms, the 1940 pig crop and the number of hogs to fatten in the fall of 1940, indicated that hog production in Canada in 1940 will be the greatest since 1929. The 1940 pig crop is estimated at 2,500,000, the highest since 1929. The increase in the pig crop is due to a number of factors, including the fact that the number of hogs to fatten in the fall of 1940 is expected to be 1,500,000, an increase of 27 per cent in the number of hogs to fatten in the fall of 1939. The increase in the pig crop is also due to the fact that the number of hogs to fatten in the fall of 1940 is expected to be 1,500,000, an increase of 27 per cent in the number of hogs to fatten in the fall of 1939. The increase in the pig crop is also due to the fact that the number of hogs to fatten in the fall of 1940 is expected to be 1,500,000, an increase of 27 per cent in the number of hogs to fatten in the fall of 1939.
