"IN OUR MAIL BAG"

Air Armament School, Mountain View, Ontario. June 21, 1941.

Dear Walter: Just a letter to express my appre- ciation to you and your staff for the copies of the Georgetown Herald which are finding their way to me, as well as to all the others who are on Active Service and far from the home town. It is indeed a welcome gift to re- ceive every week, bringing news of all the friends back home. Thanking you again for this very gratefully received contribution, I remain Yours truly, ARMAND SWACKHAMER, R100579.

Tifton, Georgia, June 5, 1941.

The Editor, The Georgetown Herald, Georgetown, Ontario.

Dear Sir: Although we have severed our con- nection with Georgetown rather com- pletely we still read the Herald and like to keep in touch with the old home town. One of the ways I used to have of doing this was to write and tell any good "colored" stories I heard, not off-color, you understand, they travel without being published, but about colored people. We still work colored men in shop and bee yard and find they have many good qualities and some very amus- ing. Now you can believe this one or not but it is the actual truth and the latest episode happened just a few minutes ago. Several days ago James came in with the sad report that a buddy of his was in the hospital and could he get off to go and see him. Enquiry produced the story that his wife had shot him the night before, he didn't know why but the other colored boy in the shop suggested he had prob- ably been running after some other woman. Well poisoning soon set in and the leg had to be amputated. After that he seemed to be doing fairly well un- til yesterday the nurse telephoned over for James. The hospital is only a few blocks from my shop. When James came back he explained that the amputated leg was causing the patient a great deal of suffering, and it would be necessary to go out to the cemetery, dig it up, burn it over and re-bury it. So this morning I loaned James my car, he went to the

hospital and got the nurse who is a white girl, went with her to the cemetery, dug up the leg and chang- ed its position, reburied it and took the nurse back to the hospital. He brought me the report that the pati- ent had known the exact moment they moved the buried leg and had relief from his suffering at that instant. Well, I say, you can believe it or not, but I started writing this just after James came back and reported, and left me to resume his work in the shop. Then of course the other colored MORLEY PETTIT.

Now is the time to have your Electric Stove checked over before the warm months.

Milk Production Down?

THERE IS no need for it. A well Balanced Dairy Ration containing carefully selected grains and the proper amount of digestible proteins will not only maintain milk production, but will also keep your cows in the high- est physical condition. Why not prove it for yourself. Remember it is easier, much easier and less expensive to maintain production than to restore it.
