"STEP

OF THERE ever was a year to start good chicks early. 1942 is it! Starting good chicks good and early is good policy any year. This year it's better policy than ever.

Figs have become a munition of war. These huge British orders at known-in-Advance prices, plus the Government subsidy of 3c per dosen on Grade A-Large for export, have fixed a floor under egg prices, away above last year's levels. And poultry meat is in strong demand.

QUICK INCOME!

If you have the breedor accommodation, you can make yearself seems meeful extra income, fast, by putting in seme fast - growing . Bray cackerel chicks. Check up an breller prices. De a little figuring. Then sak about Erny cockerel prices.

So figure on Bray Chicks early. this season . . . just as early as you can get things ready for them. Don't oversoad or overcrowd . . . just make full use of what you have. Pill up with Bray Chicks to the limit of your poultry equipment, but not beyond it.

We people who watch the Bray organization working from the inside have all sorts of confidence in Bray Chicks, because we have seen the care and work and skill that go into them. And a good many other people agree with us, because they've seen how Bray Onicks work out for them. Maybe you've seen it,

If you haven't already received your Bray catalogue, it's yours for the asking. If you have received it, be sure to read it carefully . . . there's a lot of real "meet" in it. But don't delay-act today. The days are aliding by, and this is the year to start Bray Chicks early!
