## Clear telephone lines for ALL-OUT PRODUCTION

Your telephone is part of a vast interlocking system now carrying an abnormal wartime load. Don't let needless delays hold up messages on which production efficiency may depend.

### OTHER "WARTIME TELEPHONE TACTICS"

- BE SURE you have the right number...consult the directory.
- SPEAK distinctly, directly into the mouthpiece.
- ANSWER promptly when the bell rings.
- BE BRIEF. Clear your line for the next call.

These things may look trivial, but on 6,500,000 daily telephone calls, they are very important.

## Be Patriotic! Save Fuel and Money

### Two Ways to get the Same Heat with Less Fuel and Less Cost

- Insulate your house with Rockwool. Rockwool is plentiful and you can easily put in granulated rockwool or batts yourself. The upstairs ceiling of an average size six-roomed house can be insulated at a cost of about \$35.00.
- Burn Anthracite Pea Coal along with your Nut or Stove size. The smaller size will keep your fire in check and will reduce the cost of your fuel per ton. Most householders could use at least 500 lbs. per ton of Pea Coal and many could use 1,000 lbs. to advantage. Pea size is the only size of which there is an abundance.

We would ask our customers to co-operate with us in the matter of delivery. We require at least 48 hours notice for the delivery of coal and we are unable to deliver less than half ton lots of coal.
