Out of the **FRYING PAN** and into the **FIRING LINE**

Save ALL WASTE **fats & bones**
Canada needs and must have every spoonful of fat dripping, every piece of scrap fat and every bone from every kitchen in Canada. Fats make glycerine and glycerine makes high explosives. Bones produce fat. Also glue for war industry. Don't throw away a single drop of used fat—bacon grease, meat drippings, frying fat—every kind you use. They are urgently needed to win this war. Strain all drippings through an ordinary strainer into a clean wide-mouthed can. Save your scrap fat (cooked or uncooked) and all types of bones—cooked, uncooked or dry. When you have collected a pound or more of fat dripping, take it to your meat dealer who will pay you the established price for the dripping and the scrap fat. Or you can dispose of them through any Municipal or Salvage Committee collection system IN EFFECT in your community. So a munitions maker right in your own kitchen. For instance, there is enough explosive power hidden in ten pounds of fat to fire 49 anti-aircraft shells. So—every day, this easy way, keep working for Victory for the duration of the war.
