Crops Look Promising According to Report

Below will be found a brief synopsis of telegraphic reports received at the Head Office of the Bank of Montreal from its Branches under date of July 15th 1943.

GENERAL—Crop prospects are promising in Manitoba and satisfactory in most areas of Alberta and Saskatchewan. High temperatures throughout the Prairie Provinces during the past week have promoted rapid growth. Wheat is mostly in shot blade and heading is becoming general in some districts. Moisture conditions are satisfactory throughout Manitoba, but rain would be welcome over most of Alberta and Saskatchewan and is urgently required in some districts. Loose from hail and pests have been small. Weeds are troublesome in some districts. Sugar beets are making fair progress in Alberta and good progress in Manitoba. In the Province of Quebec, recent warm weather has stimulated growth and progress is satisfactory, except in low-lying areas where there has been damage from excessive moisture. Harvesting of an excellent hay crop is in progress. Pastures continue in very good condition. Corn and root crops show good growth, except in low lands where damage is reported. Moisture is ample and continued warm weather would be beneficial in Ontario, crops generally continue to make satisfactory progress under favourable weather conditions, although rains would be welcome in some areas. Fall wheat is ripening rapidly and cutting will be under way within the next few days. Prospects for spring grains very considerably and total yields will be below average. Corn and roots are showing good growth. In the Maritime Provinces, heavy rains in most districts have caused some damage and, while warm weather has been beneficial, all crops are about two weeks late. In British Columbia, crops generally are improving with somewhat warmer weather. Most tree fruits have had a heavy drop and yields will be light. Picking of cane fruits has commenced and a fair yield is indicated. Field crops are now making good growth.

Province of Ontario—Fall wheat is filling and colouring well; harvesting is expected to commence shortly and, although the yield will be less than average, the quality generally is good. Spring wheat, oats and barley are making fairly good progress; heads are filling well, but yields in most districts will be considerably below normal. Storing of a heavy hay crop is well advanced. Seeding of a large acreage of buckwheat is completed and early growth has been good. Sugar beets from a reduced acreage and other roots are progressing favourably and a good yield of early potatoes is indicated. A light crop of canning peas is being harvested. Apples, plums and grapes are promising and pears are expected to be fairly plentiful, but peaches and cherries will be considerably below average. A heavy crop of raspberries seems assured. Tobacco plants are making satisfactory progress and prospects continue favourable. Pasture is very good.

Clarke Pegg, Nelson village, reports seeing two deer feeding in a field on his farm last Wednesday. Quite a number of deer have been reported in the mountain area during the past several weeks.

Sicily has given Halton County at least two place names, Bronte and Palermo. When names such as Nelson and Trafalgar were being given to townships, it was natural that places identified with Horatio Nelson's career should be added to the list. He was Duke of Bronte in Sicily (the town and its territory were bestowed on him), and his headquarters were for a time at Palermo. Hence the county place-names.

ACTON

The Public Utilities Commission have granted extra lighting service for the Firemen's Convention on July 21st, at the park, and the request of the Pull Pair Board, for lights on the grounds was granted.

The lawn and flower beds at the Wool Combing Plant and the Beardmore Co. plant are indeed beautiful just now.

A peculiar freak of a bolt of lightning was reported after the storm last week. A hay loader in the field on the farm of Mr. Fred Denny, adjoining Acton was struck and badly damaged. On the ground running away from the loader were two streaks of earth, fayed up by the lightning. At the end of each of these streaks in the ground was a distinct V in the soil. The Victory sign has been found on most every product of the farm, but this is the first time we had had lightning reported as leaving the sign.—Free Press

BRAMPTON

The part being played by Peel County in the Italian invasion campaign is not fully known, but word has been received that one Peel County nursing sister is at the scene of the conflict. This nurse is Jean A. McCannell of Inglewood.

Brampton Air Cadets, to which are attached a number of Georgetown boys, went into camp at No. 3 SPT in Bramford, Ontario.

Thieves broke into the Brampton office of the British American Oil Co. early Sunday morning and carried off a large safe with over \$500 in it, four commercial gasoline ration book and important office records.

About 25 employees of Dale's Limited are now being transferred to essential work, said an official of the company. These men are affected by the fourth compulsory order of the National Selective Service—Conservator.

MILTON

Eighty blood donors contributed to the Red Cross mobile unit when it visited Milton last week.

The Milton members of the Argyll and Sutherland Highlanders of Hamilton, who have been training at Camp Niagara for the past few weeks have been moved to a camp in Eastern Canada.

Among the Nursing Sisters in Africa who went there from Canada, we notice the name of Helen Elliott, youngest daughter of the late Walter L. Elliott, of Milton.—Champion

Quality counts most—for that rich, satisfying flavour which only a fine quality tea yields, use..

"SALADA" TEA

Make Them Last is Army Slogan

Fully repaired by Canadian Army, O. C. Montreal Stores (right) await final inspection and shipment to the British of Montreal whose job is to back to the units which sent them in to be repaired and to rap the repair assembly line.

ONTARIO SUBSIDY ON WESTERN FEED GRAIN

ONTARIO farmers will need at least 75,000,000 bushels of Western grain to feed the huge livestock and poultry population through the 1943-44 feeding season.

To prevent railway congestion next winter, to compensate for interest on investment, and to encourage immediate purchase and storage of Western grain on Ontario farms, the Ontario Department of Agriculture will pay the following subsidy on confirmed orders for immediate delivery of 5 tons or more, completed between May 15 and December 31, 1943:

May 15-August 31	\$1.80 per ton
September	1.20 per ton
October	.90 per ton
November-December	.60 per ton

- The subsidy will be paid direct to the farmer.
- The minimum purchase eligible for subsidy is 5 tons.
- Application forms may be obtained from any grain dealer, or the office of your county Agricultural Representative.
- Application forms must be signed by both the farmer-buyer and by the dealer or vendor.
- Applications must reach the Feed Grain Subsidy Division, Ontario Department of Agriculture, Toronto, not later than 30 days from date of delivery of grain. (Necessary levy will of course be allowed on May 15-July 12 purchases.)

Purchase Western Grains Now, and Ensure a Plentiful Supply for Next Winter!

IMPORTANT FACTS ON PULP & PAPER WAR EFFORT

HOW THE PULP & PAPER INDUSTRY HELPS PROTECT OUR HEALTH

NO OTHER INDUSTRY COULD FILL THIS NEED

IS PAPER ESSENTIAL? "The present war would come to an end in sixty days if we stopped the pulp and paper mills," stated Robert Porter of the United States War Production Board recently. "Paper takes its place along with steel, lumber, textiles." Canada has a right to be proud of this industry.

THE OLD ROLLER TOWEL ENCOURAGED THE SPREAD OF DISEASE; IT WAS A DANGER TO WORKERS' HEALTH. STRONG, HIGHLY ABSORBENT PAPER TOWELS PROTECT THE WORKER. THEY ARE ESSENTIAL TO MODERN INDUSTRY.

THE SANITARY PAPER DRINKING CUP IS ANOTHER IMPORTANT PRODUCT OF CANADA'S PULP AND PAPER INDUSTRY—IMPORTANT TO THE WAR EFFORT.

IN PEACETIME... CANADA'S GREATEST MANUFACTURING INDUSTRY
