A Marathon Euchre will be held by the Ladies' Auxiliary of the Canadian Legion for four weeks starting around September 4th. Anyone wishing to join please let the committee know. Contact Mrs. Hewitt, Mrs. Parson, Mrs. Preston and Mrs. Kay. Further particulars next week.

On Sunday morning at St. George's Church of England, the Rector explained that, through the generosity of one of the families of the congregation, the action of the pipe-organ is being changed over by Love Bros from tracker to electric. This necessitates the use of the small reed-organ from the basement, for a couple of Sundays, after which the splendid, efficient new action will be in use.

Mary Cummins, member of the North American Champion Relay Team composed of the Laurel Ladies Athletic Club, Toronto, who also won a silver medal for placing third in the North American Championship for the 200 metre dash at the recent games held at Cleveland, Ohio, was interviewed by the well-known sports commentator, Clary Pettell, over radio station CBV early last Wednesday evening. And Mary didn't disappoint her many friends in town who were listening in on the broadcast, for she can turn in just as fine a performance on the radio as she can on the race track.

**FEED GRAIN SITUATION IS SERIOUS**

Hamilton grain crop is estimated by Agric. Representative J. E. Whitelock at approximately 25 per cent of that of 1942. In an interview with Mr. Whitelock recently, he stated that while there is a fair crop in the Northern part of the County it is in general very light on the heavier soil types. In the first place, he stated, there was not much cover on a third of last year's acreage sown, and this went in during the first two weeks of June. In general the weather has been fairly favourable but notwithstanding, the crop for the most part is short, thin, and badly rusted. Fall wheat, too, has with few exceptions been a disappointment and the average yield will not be much over 20 bus. per acre and furthermore the quality is considerably below standard.

In view of the urgent need of live stock products for our war effort, the immediate purchase of Western feed grain is the only solution, stated Mr. Whitelock. While a large quantity of Western grain is coming in, it will have to move five or six times faster between now and January if we are to anything like fill our commitments in Britain and at the same time keep our domestic market supplied. Our railroads were taxed to the limit last winter to bring down the grain ordered and that was following the heaviest crop of grain harvested in Ontario in many a year. It would certainly seem conservative to estimate that we will require three or four times as much as we brought in a year ago. Our authorities estimate that in Ontario, we will require 250 cars a day for the remainder of 1943. At the present time we are moving about 250 cars a week. That should give some idea of the seriousness of the situation.

We also discussed the matter with a few of our livestock feeders and while most feel that live stock products should command a higher price under present conditions, it was rather interesting to note that of the hog feeders contacted, those that keep a record of their feed costs, state there is still fairly good money to be made in hogs at present feed costs. Livestock marketing reports indicate an unduly heavy marketing of sows which is in-

deed a serious matter. Several of the hog producers contacted, stated they were retaining their breeding stock for the simple reason that when the other fellows are unloading is a good time to hang on.

The provincial and federal subsidies which are being paid on Western feed grain should certainly offset any increased cost due to interest and storage charges. Furthermore the quality of the grain received to date is excellent and certainly there will be less shrink-

age on this grain than there will be on the newly threshed grain later in the fall. There are ample supplies in the West, we are informed, although our Federal authorities are having difficulty in preventing it going to the United States where it can be sold at a premium over that being received from Canadian purchasers.

We also understand that our Bankers are only too glad to supply the necessary credit for the purchase of feed grain, and furthermore this credit will

not in any way interfere with other lines of credit which already may exist. This is a time when Victory Bonds make excellent collateral—on this basis money can be secured at 6 per cent. If you are a livestock feeder and require additional grain to carry your livestock over, may we suggest that you contact your dealer and get your order in as soon. Later in the fall or next winter, it is questionable if it will be possible for the railroads to cope with the demand.
