When it comes to saving fuel—put common sense to work in your hand.

FARSIGHTED householders are seeing the urgent need of preparing their homes now against this winter's coal shortage. They are acting now!

HEATING SYSTEMS MUST BE EFFICIENT: HOMES SHOULD BE ADEQUATELY INSULATED.

Here are some jobs you should be doing NOW!

- 1 Have your entire heating system inspected. Order necessary repairs.
- 2 Have your furnace thoroughly cleaned by a competent man. Insulate furnace and pipes where necessary.
- 3 Be sure that you have sufficient storm windows and that all windows and doors fit tightly. Have cracks in walls repaired. Weatherstrip wherever it is necessary. Consider seriously the insulation of ceiling and walls.

Many homes waste as much as 60% of their fuel through inefficient heating equipment, inadequate insulation and other heat losses. Winter is just around the corner. Prepare NOW!

SYMBOL OF SECURITY

Those who go down to the sea in ships risk much for our security... yet what greater symbol of the nation's safety can be found than these same rulers of the waves?

As they protect against the enemy that would threaten our shores, so Brantford Roofing protects countless homes against the ravages of the elements. But just at present, because strategic materials go into its making, the supply of Brantford Roofing is limited.

Every effort is being made to distribute the available production on an equitable basis in all communities. To simplify inventories and increase supplies, all lines have been standardized on a minimum range of colours and styles.

When Victory is ours and hostilities have ceased, Brantford Roofing products will again be available in ample supply for civilian use. Plan now for your home's renovation when the war is done, with Brantford Roofing products for security and smartness.
