"As We See It"
(By J. A. Strang)

IN THESE MODERN DAYS we have become so used to seeing the ladies taking a man's place that anything new along this line is scarcely noticed. It is interesting though to read that there are eighteen girls taking the Science Course at the School of Practical Science at Varsity. Two are even taking Civil Engineering and the others are taking such subjects as Electrical, Mechanical and Chemical Engineering. If we remember correctly back in 1940 there was one girl attending S.P.S. as the school is popularly known, and she was taking Chemical Engineering. Her father in the Dye business and she was looking forward to going in with him after graduation. The Science course is the toughest of the lot at Varsity. The students spend about 35 hours per week in Lectures and Labs. In comparison Arts Students spend about 20 hours per week although the Arts students have extra reading to do. The Science Students have from 14 to 18 subjects to write each term as compared with about half that number for other students. Then again the Science Students are the first to write exams at the end of each term and as they are staged so early there is no time at all for review work. There are about 1100 men taking the Science courses this year and they have to be good in order to remain in School in these war times. Students that fail to make the grade are sent over to the Recruiting rooms. On the other hand Students that do make the grade are given certain privileges upon graduation and are given army positions in keeping with Engineering qualifications.

Halton Member Makes Maiden Speech in Parliament

"IT'S NOT LOVE EITHER"

If his hair is dishevelled and his eyes are red
If he looks as though he has not been to bed.
If he looks unshaven if he looks downcast
Don't blame him for drinking or a life that's too fast.

If his hand is shaking, if he talks very quick,
If he mumbles and stutters and looks very sick
If he wanders around and acts like a child
Don't blame him for going to parties too wild.

For here is a man, though he looks tucked out,
Who has finally proven beyond any doubt
That he is deserving a greeting so warm,
For he's just completed his income tax form.

—FRED JOHNSON

J. EDGAR HOOVER WARNS ON POSTWAR CRIME THREAT

Will postwar readjustment spawn a new horde of desperadoes whose ruthless defiance of law and order make Baby Face Nelson and John Dillinger seem like mere beginners? J. Edgar Hoover...writing in The American Weekly with this Sunday's (April 2) issue of The Detroit Sunday Times...reveals the threat of a new postwar gang era. Get Sunday's Detroit Times!

LONDON'S LORD MAYOR BROADCASTS OVERSEAS

Sir Frank Newson-Smith, Lord Mayor of London at the British Broadcasting Corporation's overseas microphone. A new Lord Mayor of London is installed by custom each year on November 9. Sir Frank Newson-Smith, who is sixty-four, has closely identified himself with the National Savings campaign. He also takes a deep interest in the people, not only in London, but in other parts of the country, who have suffered through air raids, and has presented many cheques from the Lord Mayor of London's Air Raid

Distress Fund. The present Lord Mayor is a member of the Honourable Artillery Company. He was formerly a Master of the Turners Company, one of the ancient City Livery Companies; and, as a member of the Stock Exchange for forty-three years has been an adviser to the University of Oxford in its investments. Sir Frank and Lady Newson-Smith have two daughters, both married, and two sons—one of the latter serving as an officer in the Royal Naval Volunteer Reserve, the other a Captain in the Royal Artillery.

You OWE IT TO YOUR CHILDREN YOUR CHILD'S EYES

Defective vision retards the school child seriously. It must be seen to learn—Have us examine your child's eyes.

If you need Eye Service you need the Best—
Consult us about your eyes.

O. T. Walker, R. O.

EYESIGHT SPECIALIST
who will be at his office over the Bell Telephone Co., Main St., Georgetown, the second Wednesday of each month, or you may consult O. T. Walker at his office in Brampton.

TELEPHONE: Georgetown 87, Brampton 888.

THE PLAYOFFS for the Stanley Cup in the National Hockey League are away to an exciting start as we write these lines. Most of us have a heart for the under dog always and although we were pulling for both Toronto Maple Leafs and the Chicago Black Hawks to win at least some of their games, we really didn't expect them both to win their first game of the series. During the final game of the regular schedule we had listened to Elmer Ferguson predict that the Canadians would take the Toronto, Montreal series in four straight games and the other members of the Hot Stove League really didn't have much argument in opposition to Fergy. As had not been beaten on their own ice during the last twenty-five games and to have the young inexperienced Toronto Team come down there and beat them three to one in the first of the series was quite an upset. The game

was perhaps the most interesting hockey game of the season to listen to. We had become so used to listening to Foster Hewitt broadcast Hockey that we had about decided that he was the only person that could do it however a Mr. Smith of Calgary was brought down to broadcast the game from Montreal and he did a good job of it. As though broadcasting that exciting game wasn't enough for one night the Imperial Oil Company who sponsor the Hockey Broadcasts, had this same Mr. Smith pick the three stars. Of course the series may look very different by the time that these lines appear in print, however even if the Leafs fail to win another game in the Stanley cup playdowns, they can be proud of their effort in the first game at least.

Reproduced below are extracts from the first speech made from the floor of the Ontario Parliament by Stanley Hall, Streetsville district farmer, Conservative member of Parliament for Halton County.

Mr. Speaker:
I rise to address this Legislative Assembly for the first time.
I am a farmer. I drive from the farm to this assembly each day and I certainly enjoy the improvements in our transportation and highways. I teamed to Toronto thirty years ago with horses. At that time there was just one road running West from Toronto, that had any improved road surface. Today there are three Provincial Highways.
The people of Halton County saw fit to place their confidence in me as their representative and I deem it a great honour.

I know it is a great honour to be a British Subject but it is still a greater honour to have the privilege of sitting in one of the Legislative Assemblies of that great Commonwealth of Nations and I hope there is not a member of this Assembly but feels that his responsibility is as great as the honour he enjoys.

Mr. Speaker: at this point I would like to take the opportunity to extend to you my congratulations on being elected to your exalted position by this Assembly.
I believe with your former experience and knowledge of Parliamentary procedure that you will fulfill your duties with honour to this Assembly.

Mr. Speaker: I desire to direct my very brief remarks to the new department to be set up by this Government known as the Planning and Development Department. I believe it is a department which has long been needed in this Province.
With our great transportation systems by water, rail, highway and air, with the great development of our Hydro Electric system and with the great advancement in science and research, we should be able to develop our great natural resources to the advantage of all our citizens.

With the opening of Ontario House in London, England, we shall be in a position to attract industry and immigration of the right kind and at a time when it will not conflict with the re-establishment of our armed forces

or with labour now employed in the production of war materials.

We not only have much to be thankful for in the past but if we develop our God-given resources and promote all the great interests of this province in a co-operative and harmonious manner there is no reason why we cannot create a condition where all our people may obtain an ever-increasing measure of welfare and happiness to which they are entitled, and which will be a continuing benefit to the generations which are to follow.

Mr. Speaker: There is just one thought and wish that I would like to leave with this assembly and that is that we, as Members of this Assembly and citizens of this fair land of ours, shall so conduct ourselves both in the assembly and out of it, that we shall be worthy of the great sacrifices being made by those brave men and women

in our armed forces that free speech and democratic government shall prevail.

My wish is that we shall be worthy of the lasting peace for which we all pray.

THE TIME WHEN NAZIS WILL REVOLT

In occupied Belgium, a German soldier made the following spontaneous statement to a Belgian:
"I had five brothers, and only two are left: I lost one in France and two in Russia. I had a house in Munich, but that was destroyed by a bomb. My wife and my four children have been evacuated. Before the war, I served ten months' imprisonment because I did not like the Nazis. Germany will only surrender when she has been overwhelmed by the air raids. Then we shall revolt."—News out of Belgium.

On the Home Front too...

● When a gun goes into action every man has a job to do. Seconds count, and team work gets results.
Training... endless training... gets efficiency that makes each man part of a perfect machine.
But something more than efficiency is needed to make a top-rank fighting unit. There must be loyalty... that spirit of responsibility that each man feels toward his mates.
We've got efficiency on the farm front... we're producing more, and with less help to do it. Keep up the teamwork that will make each one of us go all out to support our men on the fighting fronts.
We too, are part of a fighting unit... citizens of a nation at war. We must not let our men on the fighting fronts down.

Invasion means high tension on the fighting fronts... combined operations... thorough team work in every detail. And that call for greater action comes back to us at home. We have a job to do here, too. We must all buy Victory Bonds. We have a responsibility to our mates on the firing line. We can't let them down.

And the job that we are asked to do is... save more, and lend more to our country. We are asked to let our country have the use of money that we do not need now. We will have the money later on to improve our farms and to buy stock and equipment; for new barns and silos; for new furnishings and conveniences for our homes.

Be ready to buy more Victory Bonds.
National War Finance Committee

EVERY ONE HAS A JOB TO DO
